Schedule D, Gains and Losses from Sales or Exchanges of Property	24

Introduction

The Individual Tax Model is primarily a research tool that will accurately test hypotheses regarding income, deductions, tax base, tax rates, or any combination of these factors. The Tax Model consists of (1) a file of 87,160 records selected randomly from the Statistics of Income sample of 343,848 Form 1040 and 1040A returns (input file—this file is available to research organizations at cost); (2) a generalized manipulation program designed to select, compute, compare, arrange, and recode data in the input file; and (3) a table generator program that will select, weight, and tabulate specified items in the manipulated input file, and provide for stub and column identification in a flexible format of 60 lines by 12 columns, in up to 36 tables per run.

The Model file (input file) can be partitioned into as many as 10 equal parts by use of the "select" code if it is desirable to replicate an experiment using several randomly selected sets of tax records.

The returns in the Model file are stratified by size of adjusted gross income, and type of return (presence or absence of business or farm Schedules). The Model file contains 80 data items, and 7 codes that provide identifying and characteristics information.

This general description indicates the codes and items that are included in the Tax Model file, the layout of the file, and the sampling rates for each class of return. Facsimiles of the tax return from which the information was abstracted are also included.

Technical Description of File

Each Data Record in the file, representing one tax return, is composed of one hundred (100), 10 digit, fixed point, numeric words the first 83 of which contain data. Logical Tape Records are made up of 5 data records. Logical tape records are separated by a 3/4 inch inter record gap (IRG). There is no special indication of the end of a logical tape record other than the IRG, and no indication of the end of a data record. Data are recorded at a density of 800 bits per inch on standard 2,400 foot, ½ inch, 7 channel, mylar tape in Binary Coded Decimal (BCD) notation with both horizontal and vertical even parity. Each logical tape record is preceded by a Delta (CB8421 in BCD). Numeric words are 10 or fewer characters because zero suppression eliminates up to 5 non-significant high order zeroes per word. The end of a data word is recognized by the zone bits in the units positions.

Header and trailer labels are 80 alphameric characters in length.

Alpha words are 5 characters in tape. No deltas preceed tape labels.

The last reel of the file carries an end-of-file (EOF) indication in the second, third, and fourth characters of the trailer label. All other reels carry an end-of-reel indication (EOR) in the same positions.

The file was created using IBM 729-V Tape Drives.

- 5 Blind (column 9, code value 0-2)
- 6 Total (columns 8, 9, code value 1-99)

^{1/} A maximum of 10 codes for each word. Codes may be 1 or 2 digits, and have values ranging from 0 thru 99

Field	Ttem.
()	Code field as previously described
1,2	Blank code fields as previously discribed
3	Taxpayer (s) Exemption code lines 2a and 2b (Regular), page 1.
4	Age Exemption code lines 2a and 2b (65 or over), page 1.
5	Blind Exemption code lines 2a and 2b (Blind), page 1.
6	Total Exemption code line 4, page 1.
7	Salaries and Wages line 5, page 1.
8	Total Income (AGI+) line 9, (line 7 on Form 1040A).
9	Total Loss (AGI-) line 9, (line 7 on Form 1040A).
10	Total Deductions in conjunction with the "Form of deduction" code (Field 0, col. 4) this figure is: line lla of Form 1040 returns with adjusted gross income \$5,000 or more, or the amount computed, based on the tax reported, for all Forms 1040A and 1040 under \$5,000 where the taxpayer used the "Tax Table". The amount of total deductions on many nontaxable returns exceeds adjusted gross income reduced by the amount of exemptions. A few "separate returns" (marital status code 3) are coded as itemized deduction returns yet they have no total deductions reported. In such cases it is assumed that the spouse itemized and claimed all of the deductions.
11	Taxable Income for itemized deduction returns, line lld of Form 1040. For Form 1040 returns with income \$5,000 or more and with the standard deduction, line lld. For standard deduction Form 1040 returns with income under \$5,000, and for all Form 1040A returns, the taxable income was computed based on the appropriate marital status and form of deduction.
12	Tax Savings, Income Averaging a computed amount which is the difference between the tax liability under income averaging and the tax liability if income averaging was not used.
	Income Tax Before Credits line 12, Form 1040 (line 8, Form 1040A). For Forms 1040, the tax was the result of (1) the regular tax computation (tax status code 1); (2) the alternative tax computation (tax status code 2); (3) income averaging (income averaging field); or (4) application of rates in effect prior to 1967 on prior year delinquent returns (sample codes 09 and 19). The tax

<u>Field</u>	Item
	reported by the taxpayer computed under (1) and (2) above was accepted if within a ±5 percent tolerance. If the reported tax was outside the tolerance, the tax was recomputed, and if necessary the tax status and/or marital status codes were changed. The tax reported by the taxpayer computed under (3) or (4) above was generally accepted without change.
14	Recomputed Tax line 14b, tax from recomputing prior year investment credit.
15	Self-Employment Tax line 15.
16	Income Tax Withheld line 17 (line 9 on Form 1040A).
17	1967 Estimated Tax Payment line 20, this includes prior-year overpayment credited to 1967 taxes.
18	Excess FICA Withheld line 18
19	Excess Net Long-Term Gain computed amount used in tax computation
20	Retirement Income Credit line 1, part V.
21	<pre>Investment Credit line 2, part V.</pre>
22	• Foreign Tax Credit line 3, part V.
23	All Other Credits line 4, part V, credit for tax free covenant bonds, plus credit for partially tax-exempt interest, and credit for a throwback tax on trust income distribution.
24	Income Tax After Credits line 14a, (line 8 on Form 1040A).
25	Credit for non-highway Federal Gasoline Tax line 19.
26	Tax Withheld by Regulated Investment Company line 19 of Form 2439 is attached.
27	Balance Due line 22 (line 10 on Form 1040A).
28	Tax Paid with Return equal to or less than balance due on line 22.
29	Total Domestic and Foreign Dividends line 1 page 2, Part II.
30	Dividend Exclusion line lb, Part II, limited to a maximum of \$200 on joint returns, and \$100 on all other returns.

Field	Item
31	Capital Gain Dividends and Nontaxable distributions total lines to and ld, Part II.
32	Dividends in Total Income line lf, Part II.
33	Moving Expense Total line 2, Part III.
34	Total Interest Income line 2, Part II.
35	Nonfarm Net Profit line 4, Part II, if positive.
36	Nonfarm Net Loss line 4, Part II, if negative.
37	Farm Net Profit line 6, Part II, if positive.
38	Farm Net Loss line 6, Part II, if negative.
39	Other Sources Income line 7, Part II, if the result is positive. Includes any positive adjustment necessary to balance the sources of income and loss to adjusted gross income.
40	Total Overpayment line 23 (line 11 on Form 1040A).
141	Tax Before Income Averaging (Computed) Based on taxable income (field 11) and tax status code (field 0, column 5), this item is income tax before credits computed without regard to income averaging.
42	Sick Pay line 1, Part III.
43	Other Sources Loss line 7, Part II, if negative. Includes any negative adjustment necessary to balance the sources of income and loss to adjusted gross income.
fή	Retirement Income in AGI (Computed) Pension & Annuites plus Interest Income, plus Dividends in AGI, plus Rent Income, less Rent Loss.
45	Employee Business Expense line 3, Part III.
46	Self-Employed Pension Deduction line 4, Part III.
47	Pensions and Annuities sum of line A6 and B5, Part I, Schedule B.
48	Rent Net Income rent portion of line 2, Part II Schedule B, if positive.
49	Rent Net Loss rent portion of line 2, Part II Schedule B, if negative.
50	Royalty Depletion line 1, col. 4, Part II Schedule B.

<u>Field</u>	<u> Item</u>
51	Royalty Net Income royalty portion of line 2, Part II, Schedule B, if positive.

61	Income - Age under 65 line la, cols. A and B, Part v, Schedule B.
62	Income - Age 65 and Over line lb, cols. A and B, Part v, Schedule B.
63	Net Loss Before Limitation line 10, Part I, Schedule D.
64	Social Security & Other Exclusion - General Rule line 3a, cols. A & B, Part v, Schedule B.
65	Earned Income under Age 62 - General Rule line 3b (1), cols. A & B, Part v, Schedule B.
66	Earned Income Age 62-72-General Rule line 3b (2), cols. A & B, Part v, Schedule B.
67	Base for Credit - General Rule line 7a, Part v, Schedule B.
68	Alternative Base for Credit line 7b, Part v, Schedule B.

<u>Field</u>	<u>Item</u>
69	Tentative Credit line 8, Part v, Schedule B.
70	Retirement Income line 1, Section B, Part v, Schedule B.
71	Other Property net Loss line 3, col. g, Part III, Schedule D, if negative.
72	Other Property net Gain line 3, col. g, Part III, Schedule D, if positive.
82	Ordinary Gain line 2, Part II, Schedule D.
83-95	Blank Fields used for computations and storage of data created during manipulation run.
96	Sort Field a code may be put in this field during manipulation that will provide a sorting of the file on the basis of any code or field. This permits production of statistical tables by the specified characteristic with only one pass of the file. This field will be blank in copies of the Tax Model file provided to government and nongovernment research agencies.
97	Weight Word contains the sample weight applicable to the return for making national estimates.
98	Social Security Number taxpayer identification that will be a blank field in copies of the Tax Model file provided to government and nongovernment research agencies.
99	Document Locator Number information required to provide identification of specific tax returns. This will be a "blank field" in copies of the Tax Model file provided to government and nongovernment research agencies.

The Sample

The sample for the Tax Model was designed to provide national level estimates. Since the Tax Model sample is approximately one-fifth the size of the Statistics of Income sample, it can be anticipated that the sampling variability of Tax Model estimates will be slightly more than twice that of similar estimates from the Statistics of Income sample. Measures of sampling variability for selected estimates are provided in Statistics of Income--1967, Individual Income Tax Returns.

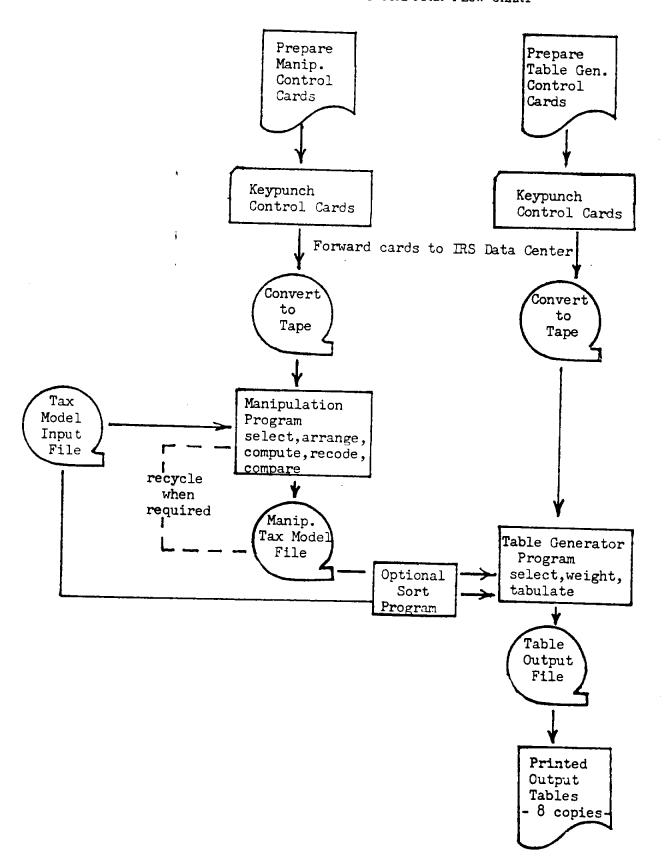

Although it is possible to identify returns for each State by use of the IRS District code, we do not recommend that the Tax Model file be used to provide subnational data estimates. The number of returns for each State are inadequate to provide reliable estimates for most data items, and therefore no sample weights were calculated for each State (or District).

The sample code identifies the stratum from which a return was selected and indicates the weight factor to be applied for that return. Because of the way returns are processed prior to sampling, there are a few cases where the adjusted gross income is outside the range for the sample code assigned. Similarly a few returns with business data (Schedule C or F) are classified in nonbusiness sample codes and vice versa. However, in all cases, the sample code assigned to the return is governing and should not be changed.
