 1.22 Female filers of non-joint returns: Source of income and loss, exemptions, taxable income, and tax items, by adjusted gross income classes, 71
 1.23 Exemptions and selected items by marital status and sex of taxpayer by adjusted gross income classes, 75

Returns Filed and Sources of Income

TAXPAYERS' INCOME EXCEEDED \$600 BILLION

Taxpayers' adjusted gross income reported on their 1969 individual returns totaled \$603.5 billion, increasing by \$49.1 billion or 8.9 percent over 1968. Table 1A and chart 1A show that most of the major sources of income except net gain from sales of capital assets and net income from rents and royalties increased over 1968 levels. Capital gains registered a sharp drop of 18.9 percent, contrasting markedly with the 31.5 percent increase for 1968 over 1967.

Income tax liability of individuals, labelled "income tax after credits" in table 1A and chart 1B, totaled \$86.6 billion for 1969. This was \$10.0 billion or 13 percent more than the comparable figure for 1968 and was the second largest single-year increase since the enactment of the Internal Revenue Code of 1954. The increase in tax liability was associated with three important

developments delineated in chart 1B: (1) an increase of 3 percent in returns filed, (2) an increase of 9 percent in adjusted gross income, and (3) the extension of the surcharge on income tax before credits to cover the whole of calendar year 1969.

A 49 percent increase in the surcharge was attributable not only to the increase in income tax before credits to which the surcharge was applied but also to the position of the surcharge at the 10 percent rate for the full year. For 1968, the 10 percent surcharge was in effect for only the last 9 months of the year amounting in effect, to a 7.5 percent surcharge. For 1969, the surcharge totaled \$7.7 billion. This was less than 10 percent based on the income tax before credits shown throughout this report, partly because only 52.3 million of the 64.2 million returns with tax before credits showed the amount of the surcharge. The small number and also the smaller amount resulted from

turn, and solely eligible to receive any refunds. However, unless his taxable income was under \$500, he ended up being taxed at a higher rate than if he had elected joint return filing status.

For the first time, on the 1969 Form 1040, the taxpayer filing a separate return was supposed to check a special box to indicate whether or not his spouse was also filing. Table 1C shows that of the 2.7 million returns of married persons filing separately for 1969, only 0.4 million indicated that the spouse was not also filing.

PATTERNS OF INCOME VIRTUALLY UNCHANGED OVER 2-YEAR PERIOD

In classifying a return for patterns of income tables, each source of income reported was classified as belonging to one of four categories. The four categories used in classifying the returns were salaries and wages, business income, income from sales of property, and all other income (mainly from investments).

As shown in table 1D, somewhat more than half of all returns for 1969 showed only one category of income, and, as expected, in the vast majority of cases it was salaries and wages. Roughly one-third of the returns showed two categories of income and these usually included salaries and wages and "all other income," which encompasses interest and dividends. Table 1.11

presents data for each of the fifteen combinations of one to four categories of income. It shows virtually no change in the percentage distribution of returns over the fifteen patterns of income since 1967, the last year for which such data were presented.

NONTAXABLE RETURNS

Characteristics of nontaxable returns are summarized in table 1E. About one of every six returns was nontaxable, that is, the returns showed no income tax after credits for 1969. About 97 percent of these returns indicated adjusted gross income under \$5,000. The dollar amount of exemptions on nontaxable returns with adjusted gross income under \$5,000 exceeded the adjusted gross income, indicating that many of these lower income taxpayers had less than \$600 of income for each exemption to which they were entitled.

Table 1E also shows that, for taxpayers with income of \$15,000 or more who paid no income tax, total deductions exceeded adjusted gross income. Some taxpayers reported deductions in excess of their income in order to qualify for the charitable contribution carryover. The carryover provision allowed taxpayers to "use up" in any of the 5 succeeding years that portion of their contributions to certain charitable institutions which could not be deducted in the current year, provided they were within the percentage ceiling limitation for each year.

More detailed information on nontaxable returns is shown in basic table 1.9. It shows that the 12.1 million nontaxable returns consisted of 0.5 million returns with no adjusted gross income, 11.2 million returns with positive adjusted gross income which was fully offset by personal deductions and exemptions, and 0.5 million returns with taxable income but with the tax offset by credits. Tax credits included those granted on retire-

ment income for certain types of investments, and taxes paid to foreign governments.

While nearly all nontaxable returns showed modest levels of income, there were also 745 returns that showed adjusted gross income of \$100,000 or more. Total adjusted gross income on these high income returns amounted to \$338.0 million. The major reason for the nontaxability was the \$432.1 million of personal deductions reported. Data published for tax year 1968, last year for which we tabulated deductions by type, revealed that over half these deductions resulted from contributions to charitable, religious, and educational organizations. Personal exemptions totaled \$1.6 million for 1969. Only \$295.9 million of these deductions and exemptions were subtracted from adjusted gross income in the computation of taxable income. The amount subtracted over was in excess of adjusted gross income and could not be used (although some of the charitable contributions in excess of income may have been carried over and used in a later year). After deduction of these amounts, 90 had taxable income of \$42.1 million in aggregate.

On the 90 nontaxable returns with taxable income income tax before credits of nearly \$27.8 million was assessed as well as the additional surcharge which totaled \$2.8 million. These assessments were, however, more than offset by \$30.7 million of statutory tax credits of which the major type, the credit for tax paid to a foreign government, amounted to \$29.2 million.

DIVIDENDS ON 4.5 MILLION RETURNS TAX FREE

Each taxpayer may have been eligible to exclude up to \$100 of his dividend income in computing adjusted gross income. The logic for this preferential treatment was that dividends represented the profits of U.S. corporations that had already been taxed at the corpo-

level. Dividends from foreign corporations were not eligible for the exclusion. In the case of a husband and wife filing a joint return, each spouse could exclude up to \$100 of eligible dividends.

Table 1F shows that \$1.2 billion of the \$16.9 billion of dividends reported on tax returns were excluded from adjusted gross income. Of the 12.2 million taxpayers reporting such income, 4.5 million excluded the entire amount, indicating that their total dividend income was less than the allowable exclusion.

W-2 WAGE AND TAX STATEMENT PROVIDED

Tabulations of items shown on Form W-2, the wage and

Employees in turn were required to file this form with their tax return and to enter the amounts of wages, other compensation, and income tax withheld on the return. Columns 8 through 13 of table 1G show these amounts tabulated along with the associated return counts.

The wages subject to withholding and, as explained below, most of the other compensation shown on Forms W-2 were to be entered by taxpayers as salaries and wages on Form 1040. Income tax withheld was entered as such on the return. Columns 1 through 7 of table 1G show amounts tabulated from Forms 1040 to which Forms W-2 were attached. The amounts of salaries and wages and income tax withheld, taken from Form 1040, were closely related to the corresponding amounts of wages and other compensation, and to income tax with-

NOTE: Detail may not add to total due to rounding.

In addition, some taxpayers with income from pensions and annuities or from partnerships attached statements to their returns on these earnings, using forms resembling the W-2. These earnings are thus reflected in the Form W-2 compensation statistics. In general, the Form 1040 data on salaries and wages conform more closely to the concept used in other statistical series than do the Form W-2 data.

Income tax withheld tends to be slightly higher on Form 1040 than on Form W-2, since Form 1040 withholding includes "excess FICA withheld," the amounts in excess of \$374.40 withheld from the taxpayer's wages for Social Security purposes. On the other hand, in the case of separate returns from community property States, the amounts of withholding shown on some returns may have equaled only one-half the amount shown on the W-2.

While the tax return does not specifically call for an indication of sex of the taxpayer, a determination was made for this report on the basis of evidence on the return such as the taxpayer's title (Mr., Mrs., Miss); marital status (a joint return indicates one male, one female taxpayer); the taxpayer's first name; and, in the case of self-employed taxpayers, sex designation supplied on Schedule SE. On the basis of this information, returns were classified as returns filed by individual men, individual women, or as joint returns filed by married couples. In the case of joint returns, attached Forms W-2 were used to separate salaries and wages of husband and wife.

INCOME OF MEN, WOMEN, AND MARRIED COUPLES

Table 1H indicates that the average adjusted gross income shown on returns filed by unmarried men or by married men filing separately--\$3,966--about equaled the average adjusted gross income of \$3,973 shown on returns filed by unmarried women or by married women filing separately. Average adjusted gross income reported on joint returns of husbands and wives (\$11,100) was, however, more than two and one-half times that of "other" returns.

Average.....dollars..	4,883	3,224	3,000	4,493	5,195

NOTE: Detail may not add to total due to rounding.

Average salaries and wages on "other" returns (i.e., nonjoint returns) filed by men equaled \$3, about \$250 higher than the average salaries and wages on "other" returns filed by women. Men also had higher averages for the following types of income: business or profession, farm, sales of capital assets and pensions and annuities. On the other hand, returns of women indicated higher averages for dividends and interest income, and for income from estates and trusts.

While the number of "other" returns filed by men was about the same as the number filed by women, there were noticeable differences in the number of returns by source of income or loss. For example, twice as many women as men reported dividends and pension and annuity income while three times as many women as men reported net income from estates and trusts. Additional detail relating to returns filed by men and women filing separately is shown in tables 1.21 and 1.22.

It is not possible in the case of joint returns, to attribute the detail of every source of income to either the husband or the wife. However, by making use of the information supplied on attached Forms W-2, one can determine the salaries and wages earned by each. Table 11 indicates that the average salary of husbands

reported on joint returns was \$8,954, as compared with an average \$4,883 for their wives. Just over one-half of the wives filing jointly with their husbands were wage earners.

Chart 1D indicates that among couples with incomes under \$5,000, only about 40 percent of the wives worked. On the other hand, 23 percent of the wives in this income group earned more than half of the couple's combined wages. The earnings of husbands and wives tended to be closer on returns with incomes of \$15,000 or more; 58 percent of the wives in this group worked, and on roughly one-third of the returns, the wife earned between 25 and 50 percent of the couple's combined wages.

Chart 1E shows that women earned only about \$94 billion of the \$413 billion in wages shown on joint returns. In contrast, the wages of men on nonjoint returns were only slightly higher than those of women, reflecting a more equal participation of male and female wage earners filing nonjoint returns. The average shown on Forms W-2 of men (\$3,836) and women (\$3,495) filing nonjoint returns also tended to be relatively close (see table 1.18).

SOURCES OF DATA

Individual income tax data in this report were estimated from a sample of unaudited tax returns, Forms 1040, filed by U.S. citizens and residents and revenue-processed during the calendar year 1970 in the service centers and district offices of the Internal Revenue Service and at the Office of International Operations in the National Office.

The statistics in this report are intended to represent the total returns for income year 1969. While the overwhelming majority of returns revenue-processed in 1970 were for calendar year 1969, a few of them were for non-calendar years ended during 1969 and 1970, and some others were delinquent returns for prior years. Prior year delinquent returns were used for the 1969 statistics in place of 1969 returns processed after December 31, 1970. In general, the characteristics of returns due but not yet filed could be represented best by the returns for previous income years that were processed in 1970.

All returns processed during 1970 were subjected to sampling, with a few exclusions. The exclusions consisted of tentative returns and amended returns for income year 1969, and certain returns for prior years. Tentative returns were not subjected to sampling because the revised returns may have been sampled later on, while amended returns were excluded because the original returns were already subjected to sampling. With the exception of returns filed at the Office of International Operations, returns for income years prior to 1962 (generally speaking, a very small number) were excluded to simplify sampling procedures.

An individual income tax return was required of (1) every citizen or resident alien of the U.S., and every bona fide resident of Puerto Rico, under 65 years of age (including minors), who had \$600 or more of "gross income" for the year, (2) every citizen or resident 65 years of age or over who had \$1,200 or more gross income for the year, and (3) every person, regardless of age or gross income, who had self-employment income of \$400 or more

during the tax year. Gross income, for purposes of filing, included income earned from sources outside the United States, even though the income was exempt from tax. However, in the case of individuals who were residents of Puerto Rico, gross income, for purposes of filing, did not include income derived from sources within Puerto Rico, except amounts received for services performed as an employee of the United States Government.

Individuals who had tax withheld from wages, but whose income was less than that required for filing, usually filed to obtain a refund of tax withheld, although they were not otherwise required to file.

DESCRIPTION OF THE SAMPLE AND LIMITATIONS OF THE DATA

Description of the Sample

The data presented for individual income tax returns for tax year 1969 are estimates based on a stratified sample of all Form 1040 returns processed in the calendar year 1970. The total sample consisted of 254,166 returns, about three-tenths of one percent of the total number processed for the year.

Sample selection

All returns filed with the seven Internal Revenue service centers, the 58 district offices, and with the Office of International Operations were initially grouped for revenue processing based on the presence or absence of business schedules. However, special criteria were needed for sampling.

For this purpose, service center and district office returns were stratified by computer in each service center based on size of adjusted gross income or deficit, total business receipts, and the largest source of income or loss. Sampling of nonbusiness returns was based on size of adjusted gross income or deficit or the largest source of income or loss; whereas sampling of business returns

was based on (1) adjusted gross income or deficit, or largest source of income or loss, and (2) total business receipts. In order for returns to fall within a sample stratum, all sampling criteria for that stratum had to be satisfied.

Returns filed with the Office of International Operations fell into two groups: (1) Returns for income year 1969 were computer-designated at the Mid-Atlantic Service Center based on the criteria previously stated, and (2) Returns for income years prior to 1969 were selected manually in the National Office based entirely on size of adjusted gross income.

In all seven Internal Revenue service centers, the actual selection of returns was accomplished using specified ending digits of an individual's social security number randomly chosen according to the sampling rate prescribed for that stratum. In the Office of International Operations, returns for income year 1969 were selected using the individual's social security number, whereas the returns for income years prior to 1969 were selected using account numbers assigned to the returns shortly after they were filed.

All sampling criteria and strata are described in table 7A along with the number of returns processed per stratum, the number of returns in the sample, and the prescribed and achieved sampling rates.

Differences between the prescribed and achieved sampling rates occurred for the following reasons:

- (1) Not all returns designated for the sample could be obtained even after followup,
- (2) Social security number ending digits used for sample selection were not distributed equally throughout each Internal Revenue Region,
- (3) If the characteristics of the return varied considerably from the criteria of the assigned sampling stratum, then the return might be reassigned to another

sample stratum. However, none of the returns was re-assigned to a sample stratum which called for a larger weight than that required by the sample stratum in which it was originally included.

Method of estimation

The total number of returns per stratum was obtained from counts of returns filed at district offices and service centers throughout each of the seven Internal Revenue Regions and at the Office of International Operations. The adequacy of response was reviewed, by sample stratum, by applying the prescribed rates to the number of returns actually received from each location. When receipts differed considerably from the number expected, a followup was conducted.

Sampling weights were obtained by dividing the number of returns filed per sample stratum by the number of sample returns actually received for the stratum. Achieved sampling rates varied sufficiently among Internal Revenue Districts to necessitate using different sampling weights for each District for the production of tables with geographic distributions. Therefore, totals in national tables differ somewhat from corresponding totals derived from State data.

All sampling weights were converted to integer weighting factors which were then applied to each sample return by a procedure exemplified as follows: if the achieved sampling weight was 10.28 in a given sample stratum, 28 percent of the sample returns in the stratum were given a weighting factor of 11, and 72 percent, a weight of 10.

Integer weighting allows detailed weighted frequencies to add consistently to their appropriate totals in all tables since no rounding is involved. This facilitates later review of the data and assists users in following the same frequency from table to table. However, integer weights

Table 7B.—RELATIVE SAMPLING VARIABILITY AT THE ONE STANDARD DEVIATION LEVEL OF ESTIMATED NUMBER OF RETURNS, 1969

No sampling variability

¹Sample too small to yield reliable estimate of sampling variability.
²Not applicable since the estimated number of returns is greater than population estimates.

do not have the same effect on dollar amounts. This is because dollars per return were later rounded to thousands during statistical processing. Nevertheless, efforts were made to establish "control totals" of those dollar amounts that appear in more than one national table and these totals were substituted in other tables for the convenience of the user.

A comparison of the estimated number of returns shown in the national tables of this report with the number of returns reported filed, as shown in table 7A, will disclose slight differences. These differences occur for the following reasons: (1) an estimated 555,500 returns were excluded from the tables because they showed no income information and (2) returns were classified into the proper size classes during tabulation regardless of the strata to which they were assigned for sampling purposes.

Limitations of the Data

Sampling variability

Unless based on all of the returns in the population each entry in the tables of this report is based on a sample and can be expected to differ more or less from the corresponding value that would be obtained by aggregating data from the total number of returns. A statistical measure that pertains to the difference that might be expected to result is called the "standard deviation of the estimate."

The "relative sampling variability" is the standard deviation of the estimate expressed as a percent of the estimate. The standard deviation when added to and subtracted from the estimate provides the computed upper and lower limits within which approximately two out of three estimates derived from similarly selected samples would be expected to fall. Table 7C at the end of this section, shows the relative sampling variability of selected frequency and amount estimates based on the standard formula. "Upper limit" relative sampling variability estimates based on a special formula are shown in table 7B for frequency estimates in general. These percents are somewhat higher than ones which would have been yielded by the standard formula. Column 1 of table 7B

may also be used for returns not classified by size of adjusted gross income.

The conservative nature of the relative sampling variability estimates shown in table 7B may be illustrated by comparing an estimate from column 1 of this table with the calculated, more precise, relative sampling variability for a similar number of returns shown in table 7C. If 5,000,000 were the number of returns with adjusted gross income under \$10,000, then the relative sampling variability obtained from column 1 of table 7B would be expected to be less than 1.8 percent. But the conservative nature of this relative sampling variability estimate may be illustrated by comparing it with the calculated, more precise, relative sampling variability estimates in table 7C for a similar number of returns in a specific adjusted gross income class. Thus, table 7C shows that for the 5,139,934 returns in the "\$1,000 under \$2,000" adjusted gross income class, the relative sampling variability is only 1.68 percent.

Frequencies and amounts considered subject to excessive sampling variability are not shown in the tables although they are reflected in the appropriate totals. Where sampling variability was judged to be excessive, data in particular cells have been deleted or have been combined for a group of cells. The data were combined in such a manner that the combined sampling variability was not considered excessive. Where deletions were made in tables, the applicable cells are noted with an asterisk. Where combinations of data were made, the combined totals are presented beside the bracketed cells to which they relate.

Other limitations due to sampling

A dash, rather than a frequency or amount, in any given table cell indicates either that there were no returns with the particular characteristic, or because of its rarity, instances of the characteristic were not present among the returns selected for the sample. However, for statistics based on returns selected for the sample at a rate of 100 percent, a dash indicates a presumption of no returns with the particular characteristic.

Sample management and non-sampling controls

An extensive system of sample management and control was used by the National Office Statistics Division to insure the selection of the prescribed sample and to provide counts of the number of returns filed in each sample class. Sample controls for the most detailed sampling groups were maintained for each Internal Revenue district office.

In editing, transcribing, and tabulating the information from the sampled returns, checks were imposed to improve the quality of the resulting estimates. Returns that showed data in accompanying schedules but not on the appropriate lines of the return forms and returns with obvious mathematical errors were edited and properly adjusted.

The quality of the statistical editing performed at the Internal Revenue Service Centers, was subject to verification (and correction) consistent with a prescribed plan. Under the plan, which was flexible according to the

proficiency of the editors, screening and fractional sampling were used to determine the returns to be verified.

In order to provide measures of accuracy of the statistical processing and secure greater consistency among the processing centers, a sub-sample of the returns and abstract sheets were independently reprocessed in the Statistics Division. Data generated under this program were utilized to clarify the editing instructions and to inform the processing centers of the findings.

Key punching of all data was also key verified in the service center. Prior to tabulation at the Internal Revenue Service Data Center, numerous tests for internal consistency were designated by the Statistics Division and were applied to the data by computer. This assured that

proper balance and relationships among the returns and statistical classifications were maintained.

Finally, prior to publication, all statistics were viewed for accuracy and reasonableness, in light of variations of tax law, taxpayer reporting variations, limitations, economic conditions, comparability with other statistical series, and statistical techniques in data processing.

However, the controls maintained over the selection of the sample returns, the processing of the source data, and the review of the statistics did not completely eliminate the possibility of error. In addition, practical operating considerations necessitated allowance of reasonable tolerances in the statistical processing of the

This section of the report presents individual income tax data for each of the 50 States and for the 125 largest standard metropolitan statistical areas. Summary tabulations are shown for the seven Internal Revenue Service Regions and two standard consolidated areas. The methods used in coding returns for these geographic classifications, and the limitations of these methods, are explained in the text below.

State classifications in the *Statistics of Income* series are based on the district code given each return in the Internal Revenue district office or regional service center in which it was filed. Taxpayers were instructed to file their returns in the district or region in which they resided, and to the extent that they did so, the State data reflect an accurate picture of taxpayers within each State. Most taxpayers did file in the correct place. However, there were some returns filed in an incorrect place due to the reasons cited below.

(1) Some taxpayers who had moved filed with the district office or regional service center serving the area in which they used to live, either out of habit or because IRS had sent them a preprinted envelope addressed to the service center of the region in which the taxpayer formerly resided.

(2) Some taxpayers filed from their place of business rather than their place of residence, for example, a Connecticut commuter filing with the district office serving New York City, his place of business, rather than the one serving Connecticut, his place of residence.

(3) Some taxpayers filed from their tax lawyer's or accountant's place of business, which again may have been in another State from the taxpayer's residence.

(4) Some taxpayers may simply have misunderstood the instructions on where to file.

The effect of a taxpayer filing in the wrong place depended on whether he was filing with the wrong district office, the wrong service center, or with the National Office of IRS in Washington, D.C.:

(1) If a taxpayer sent his return to a district office in a State other than the one in which he resided, his return would have been classified for the State to which he sent it. Based on the results of an earlier special study, the number of such returns tended to be counterbalanced by a similar number filed by taxpayers who resided in that State but sent their returns elsewhere.

(2) If the taxpayer filed his return with the wrong

study cited previously, may be overstated by as much as 10 percent. Part of the overstatement in Maryland is due also to the fact that service personnel stationed abroad erroneously sent their returns to the National Office or the Baltimore District Office.

Many service personnel stationed abroad also file their returns in New York, California, or Washington State, where the Army Post Offices (APO's) and Fleet Post Offices (FPO's) are located. However, each State total contains at least a few returns of such personnel stationed abroad.

Table 5A compares State data from 1969 tax returns (filed around April 15, 1970) to population data from the April 1, 1970 Census. Differences between the two series are related both to the limitations of the State classifications mentioned above, and to conceptual differences between IRS and Census data.

The data used in this comparison are:

1. Population used as a basis for Congressional apportionment as reported in the 1970 Census.

This includes, for each State, not only the resident population, but also Government employees (civilian and

Minnesota	1,419,659	2,207,142	3,735,815	3,853,173	97.0
Mississippi	595,572	967,201	1,713,023	2,233,646	76.7
Missouri	1,710,229	2,717,622	4,487,427	4,718,134	97.2
Montana	269,627	399,974	670,334	707,671	94.7

military) stationed abroad, as well as their families, whose permanent addresses were in that State.

2. Number of exemptions other than age and blindness as shown on tax returns for 1969.

This includes one exemption for each taxpayer, for the taxpayer's spouse (if that spouse did not file a separate return), and for each qualified dependent. For each State, this should include those Government employees (civilian and military) stationed abroad who maintained a permanent residence in that State. However, as mentioned above, some Government employees also filed with APO and FPO addresses in New York, California, and Washington State, or with the Baltimore District Office.

The two concepts of population differ in several other respects. Taxation data would exceed Census counts for two reasons. Exemptions could be claimed on 1969 tax returns for anyone living at any time during calendar year 1969, even though he may have died before the end of the year. Furthermore, in the tax return data, some dependents who earned small amounts of income were counted twice--once as taxpayers on their own returns and once as dependents on their parents' returns. On the other hand, the IRS statistics exclude those individuals whose income was so low that they did not meet the tax return filing requirements and who did not file for a refund of tax withheld.

The Census count applies to the population at one moment in time--April 1, 1970. In contrast to the tax return data, it does not include anyone who died during the period January 1 to December 31, 1969. On the other hand, it does include children born during the period January 1 to April 1, 1970, and not eligible for exemptions on 1969 income tax returns.

Table 5A shows that, for the Nation as a whole, exemptions other than age and blindness reported on tax returns for 1969 equalled 96.1 percent of the April 1, 1970 population. As might be expected, the percentage was somewhat higher in most of the States chosen for classifying returns filed "out-of-region." The percentage was generally lower in States with low average incomes, where many residents may not have met the filing requirements. The relatively low percentage for Florida may be due in part to the fact that many older people live there--persons aged 65 and over enjoyed more liberal filing require-

earned by persons who were not residents of Puerto Rico for the full taxable year.

STANDARD METROPOLITAN STATISTICAL AREA.

Standard metropolitan statistical areas (SMSA's) defined by the Office of Management and Budget in order to make it possible for all Federal Statistical agencies to utilize the same boundaries in publishing statistical data useful for analyzing metropolitan problems. Each standard metropolitan statistical area contains a city (or contiguous "twin" cities) with at least 50,000 inhabitants and includes the county of such central city as well as adjacent counties found to be metropolitan in character and economically and socially integrated with the county of the central city. (In New England, the basic units comprising the SMSA are cities and towns rather than counties.)

In this report, data are shown for the 125 largest SMSA's. These include most of the metropolitan areas with a 1960 population of 200,000 or more. The counties or cities and towns comprising each of these areas are shown in table 5B. It should be noted that, as counties adjoining a metropolitan area meet the criteria of metropolitan character and socioeconomic integration, SMSA is redefined to include these counties. Therefore the definitions in this report, which conform to those established by the Office of Management and Budget of March 1967, differ in some cases from those used in *Statistics of Income* reports for tax years before 1967.

The criteria for including a return in a standard metropolitan statistical area were the return address indicated by the taxpayer and the district code entered by the district office or service center. Since the district code was the primary classifier, any return with an incorrect district code was automatically classified as not belonging to any metropolitan area. Most of the other limitations of the State classifications mentioned above apply to the metropolitan area classification as well.

The SMSA data shown in this report are subject to special limitations. Since metropolitan areas tend to be smaller than States, metropolitan area data are subject to higher sampling variability. Moreover,

The criterion for including a metropolitan area among the 125 largest was the population in 1960 of the area as defined in 1969.

OTHER GEOGRAPHIC CLASSIFICATIONS

Most of the tables in this section also present data for internal Revenue Service administrative regions. Each region has a service center which processes the returns filed in the districts which make up the region. The States comprising each region are indicated in the map on page 177, which represents the field organization of the Service in 1969.

In recognition of the special importance of even more inclusive metropolitan statistics for the large conurbations around New York and Chicago, the Office of Management and Budget has established definitions for two "standard consolidated areas." The Chicago, Illinois--Northwestern Indiana standard consolidated area consists of the Chicago and the Gary-Hammond-East Chicago standard metropolitan statistical areas; the New York--Northeastern New Jersey standard consolidated area is made up of four SMSA's in the New York area, plus two contiguous counties in New Jersey (see table 5B).

Totals in the SMSA tables are for all areas falling into the 125 largest metropolitan areas, plus the two counties in New Jersey which are part of the New York--Northeastern New Jersey standard consolidated area. National totals shown in the State and regional tables differ slightly from those presented elsewhere in this report because of differences in sample weights used. These are explained in the Description of the Sample section 7).

COMPENSATION REPORTED ON FORMS W-2

Form W-2, the wage and tax statement supplied to employees by their employers, was used for the first time in the 1969 *Statistics of Income* program to separate the wages earned by men and women. The map at the top of page 183 shows the average W-2 wage per wage earner (whether male or female) by State. Generally, average wages over \$5,500 were found on the East Coast between Virginia and Massachusetts, in a band of States stretching along the Great Lakes, and in the Far West. The highest average wage--\$7,120--was found in Alaska, the lowest in Arkansas (\$4,198).

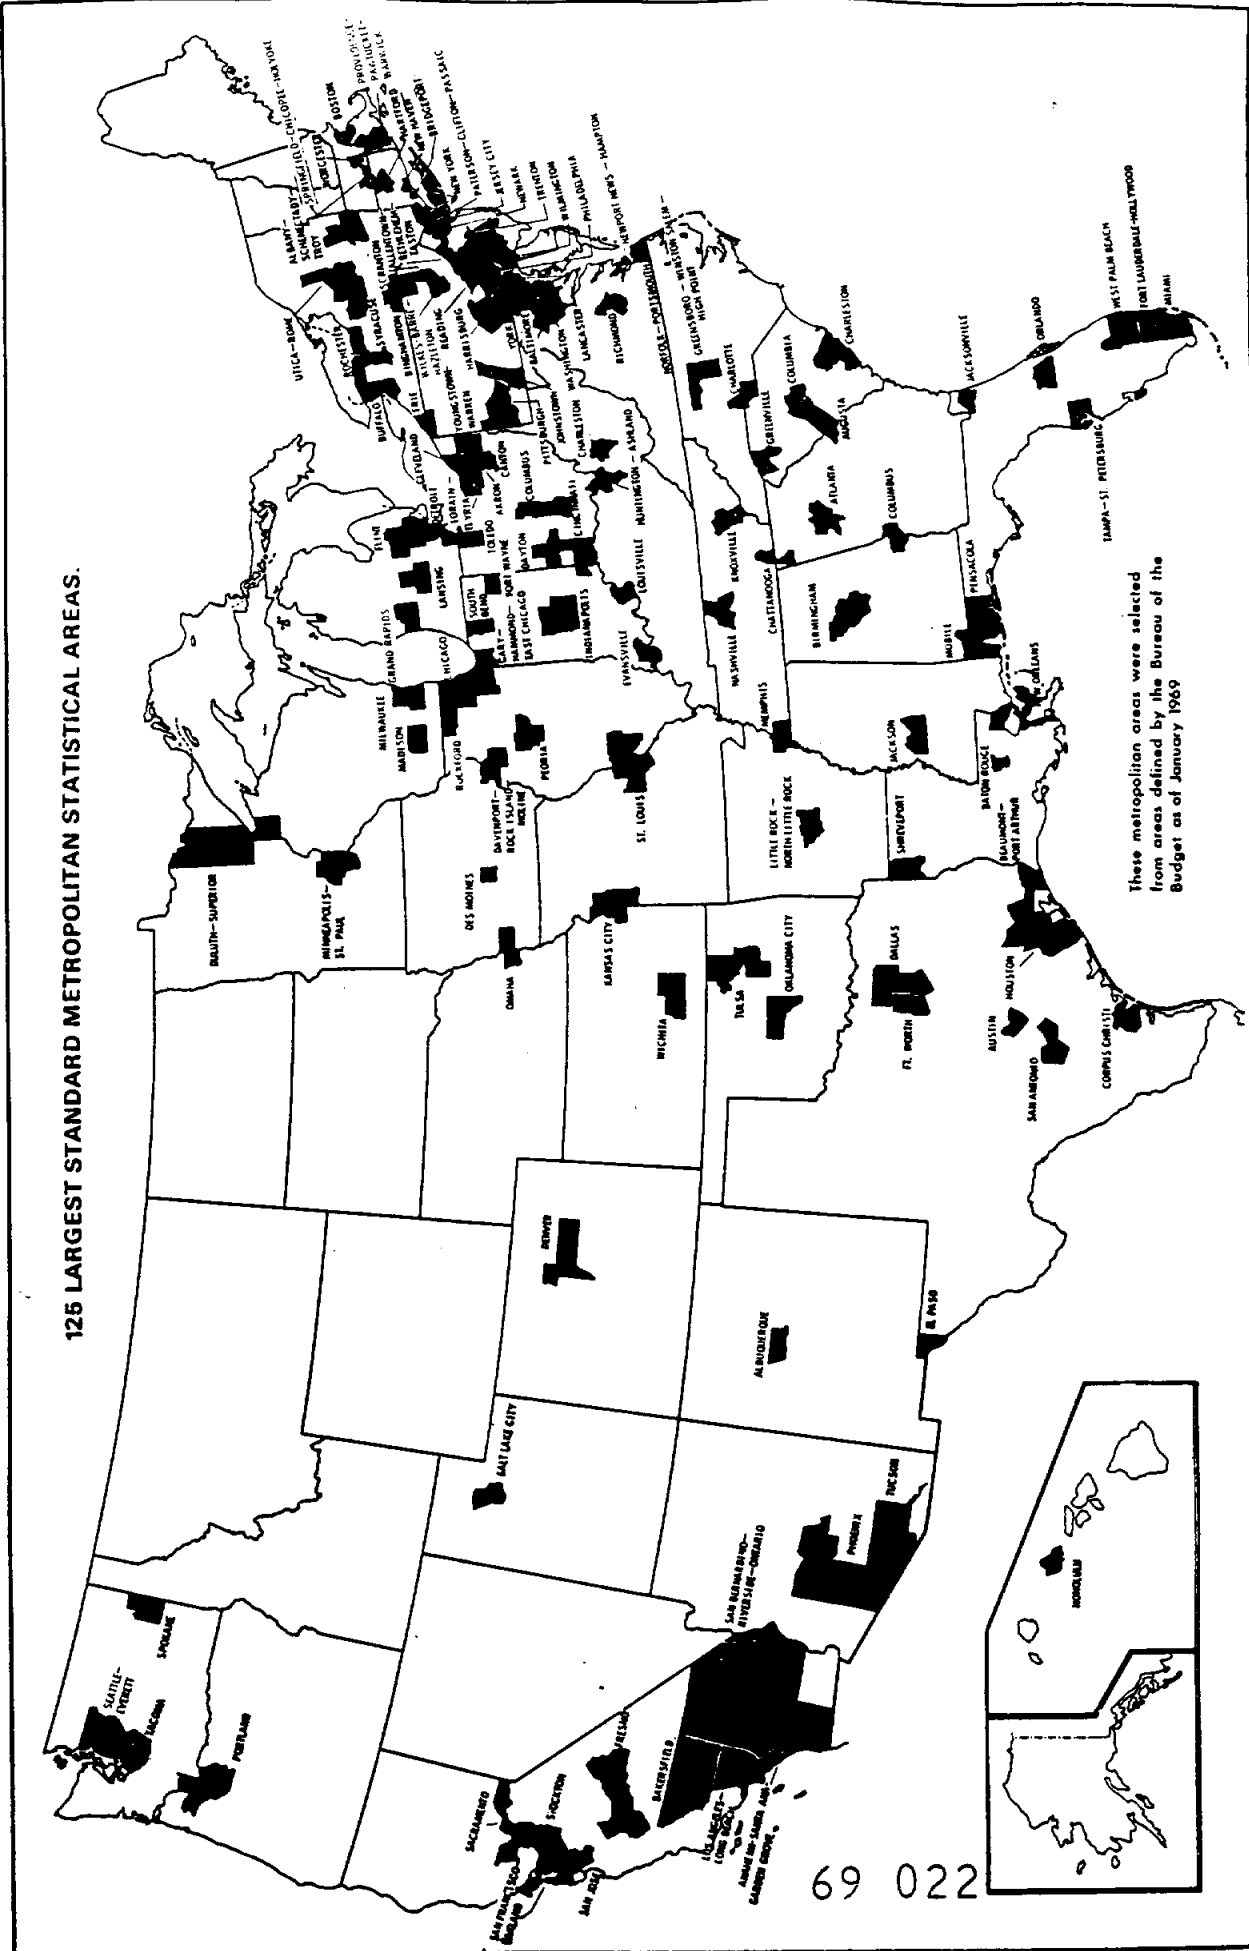

The lower map on page 183 compares the average wages of women to the average wages of men by State (in the case of joint returns of husbands and wives, both of whom worked, each spouse's wage was considered separately). As a rule, women's wages tended to be closest to men's wages in those States where the overall wage level was lowest, most notably in the Southeastern part of the country. There were, however, some notable exceptions to this rule. Washington, D.C., for instance, with an average wage of \$6,087 had the highest rate of average women's to average men's wages--65 percent. Aside from the District of Columbia, there were two States with average wages of \$5,500 or more where the wage level for women was more than 50 percent of that for men: Alaska and Hawaii. In the Rocky Mountain States, on the other hand, relatively low wage levels tended to be associated with relatively low ratios of women's to men's average wages.

Average compensation shown on Forms W-2 by State, 1969

Average W-2 compensation per wage earner

Brief Sample Description

The 1969 Individual Tax Model file is a random subsample of 93,070 returns selected from the Statistics of Income sample of over 254,000 Forms 1040 filed for 1969.

The coefficients of variation computed for estimates from the Tax Model sample can be expected to be about 40 percent higher than similar estimates derived from the Statistics of Income sample. The table on page 46 gives some indication of the reliability of Tax Model estimates.

A description of the Statistics of Income sample, as well as measures of sampling variability for selected estimates, are shown in the complete report, Statistics of Income—1969, Individual Income Tax Returns.

STATISTICAL PROCESSING HANDBOOK FOR INDIVIDUAL INCOME TAX RETURNS

232 Codes--Cont. (6)

	<u>35-41 Exemptions</u>	<u>Boxes Checked</u>	<u>Code</u>	<u>Form 1040</u>
Field 2	35 Taxpayer	one two	1 2	Lines 7a and 7b (Regular)
Field 1	36 Age	Neither one two	0 1 2	Lines 7a and 7b (65 or over)
Field 3	37 Blind	Neither one two	0 1 2	Lines 7a and 7b (Blind)
	<u>Columns</u>	<u>Description</u>	<u>Code</u>	<u>Source</u>
Field 4	38-39 Dependents	Total of lines 8 and 9.	00-99	Form 1040, lines 8 and 9
Field 6	40-41 Total exemptions	<u>Sum</u> of all exemptions claimed. If the taxpayer shows only a total, check the filing status and taxpayer signatures. For joint returns enter "2" in column 35 for taxpayer exemp- tions and for all other returns enter "1" for taxpayer exemp- tions. Make no other entries for exemptions except the total in columns 40-41.	01-99	Form 1040, line 10
	42 Job Frequency (Male)	Code for the number of W-2 Forms attached to return or taxpayer's statement indi- cating gross salaries and withholding. If more than 9 W-2 Forms are attached, enter code 9.	0-9	Form W-2
	43 Job Frequency (Female)	Code for the number of W-2 Forms attached to return or taxpayer's statement indicat- ing gross salaries and with- holding. If more than 9 W-2 Forms are attached, enter code 9.	0-9	Form W-2
	44-45 Schedule C	Code for the actual number of schedules edited.	00-99	Schedule C
	46-47 Schedule F	Code for the actual number of schedules edited.	00-99	Schedule F

Note: The sum of Cols. 44-47 should equal
total "businesses" (Cards 12 or 17 cols. 42-43)

Explanation of Fields in the 1969 Individual Tax Model contd.

STATISTICAL PROCESSING HANDBOOK FOR INDIVIDUAL INCOME TAX RETURNS

233 Heading of Edit Sheet

The heading of the edit sheet will be completed for returns with sample codes 17 and 28 and for Washington, D.C. returns at the Mid-Atlantic Service Center as follows:

Taxpayer(s) full name: Last name, followed by first name and middle initial and home address as shown on return: Number, street, city, state, and Zip code.

234 Money Fields (Amounts)

(1) The following instructions relate to money amounts entered for non-business data for Cards 01 through 11 on Form 2752, Edit Sheet.

(a) To ascertain if an amount shown on a schedule is not shown on a return line, examine the return and attached schedules (official and taxpayers' own) before making entries on the edit sheet.

(b) Enter money amounts in unrounded dollars.

(c) Use taxpayers' entries at all times except when corrections have been made by the Examination Branch or Error Correction Branch and these corrections are consistent with the other affected amounts on the return or when exceptions are specifically indicated in the instructions for certain items.

(d) If no entry is shown on the return or attached schedules, leave the field blank unless the taxpayer merely failed to fill in a line. In this case compute the proper amounts, if possible, and make the entry. Example: The taxpayer made an entry of \$200 on line 6, (Schedule T) and also entered the same amount on line 10. He had no credits, (retirement, investment, or foreign), but he failed to enter the \$200 on line 15. The entry for Income tax after credits (Card 10, Field 6) which is normally entered on line 15 would be \$200 even though there is not an entry on the line.

Card 01
Field

Form 1040
Reference

Explanation or Special Instructions

4 Selection amount

Based on the amount shown on the computer sample selection sheet under the column "SEL AMT", enter the actual amount shown. For OIO returns (district codes 66 and 98) enter zeros in this field.

Field 11

5. Wages, salaries, tips, etc.

Includes: Fees, commissions, bonuses, merchandise, meals and living quarters in lieu of wages. These items should be taken out of miscellaneous income on Schedule E, Part III col.(d). Also include in this field amounts of W-2 income shown on Schedules C or F. If W-2 income is the only income on a Schedule C or F, edit the expenses as Employee Business Expense and enter in "Adjustments". If there is business income as well as W-2 income on the Schedule C or F, edit the expenses as business expenses in Cards 12-23.

STATISTICAL PROCESSING HANDBOOK FOR INDIVIDUAL INCOME TAX RETURNS

234 Money Fields (Amounts)--Cont. (1)

Card 01 Field	Form 1040 Reference	Explanation or Special Instruction
5. Wages, salaries, tips, etc. (Cont.) Line 11		Other items which should be included are: director's fees, jury income, pension trust income, profit sharing income, and reserve training pay.
Field 16	6. Total dividends before exclusion (domestic and foreign) Line 12a, or schedule B, Part 1, line 6	
Field 14	7. Dividends in AGI Line 12c	Do not enter a negative amount. If the taxpayer arrives at a negative amount and carries it into Adjusted Gross income, adjust Dividend exclusion and/or Total dividends and distributions to arrive at "zero" for dividends in AGI. Make an offsetting entry in Other sources loss.
Card 02 Field		
Field 17	1. Interest received Line 13 2. Other income Line 14 (+)	Check: There should be schedules attached to correspond to the boxes checked. If schedules are not attached, accept the taxpayer's entry. (1) If an amount here represents net business income not covered by a business schedule, assign the appropriate industry code beside line 14, construct the appropriate business information in Cards 12-23; and include the net amount in business or professional profit/loss or farm profit/loss. (2) If an amount on line 14 is identified as capital gains dividends or is not identified and equals 1/2 of schedule B, Part I line 3 and a Schedule D is not attached to the return, enter the amount as Net capital gain (Card 06, Field 1) and double the amount and enter the computed amount for Net long-term gain after carryover (Card 05, Field 4).

 STATISTICAL PROCESSING HANDBOOK FOR INDIVIDUAL INCOME TAX RETURNS

234 Money Fields (Amounts)--Cont. (2)

Card 02 Field	Form 1040 Reference	Explanation of Special Instruction
2. Other income (cont.)	Line 14 (+)	(3) Do not move patronage dividends unless there is an indication that they pertain to a business or farm. Agricultural program payments should always be moved to a Schedule F.
3. Other loss	Line 14 (-)	Same as Field 2. Enter negative amount. Check: Cannot have entries in both Fields 2 and 3.
Field 18 4. Adjustments	Line 15b	(1) This field includes sick pay, moving expenses, employee "business" expense, and payments to retirement plans from separate taxpayer forms or schedules. If employee "business" expenses are included under itemized deductions, leave where reported by taxpayer. (2) When line 15b amount equals exemptions and/or itemized deductions, edit this amount in "Other loss" Card 02, Field 3.
Field 12 5. Adjusted gross income	Line 15c	(1) Use Examination Branch and Error Correction Branch changes, if shown, as explained in 234:(1)(c); otherwise do not change taxpayer's entry. (2) "Breakeven" returns (zero, dash, or blank): Leave the card field blank. (3) Income which is excluded under provisions of Code Sec. 911 (income of a U.S. citizen residing in a foreign country) and income excluded by treaty provisions should not be included in total income or any of the income source fields. If all income is excluded for these reasons, reject the return with a reject code 1. (4) If total income changes because business income was removed from salaries and wages, business expenses from itemized deductions, or adjustments from itemized deductions, etc., do not change taxable income and do not recompute medical deduction.
Field 13 6. Deficit	Line 15c (-)	Field 5 instruction applies: Cannot have entries in both Fields 5 and 6. Code check: The code for column 20 should be 5 (Non-taxable).

STATISTICAL PROCESSING HANDBOOK FOR INDIVIDUAL INCOME TAX RETURNS

234 Money Fields (Amounts)--Cont. (3)

Card 02 Field	Form 1040 Reference	Explanation or Special Instruction
7. Tax from tax table	Line 16	<p>This field is for tax table returns only.</p> <p>Check: Box A,B, or C on line 18 should be checked.</p> <p>Note: For non-compute returns, the editor should enter adjusted gross income, total number of exemptions, and withholding amount. Computation of tax, surcharge, and balance due or overpayment will be done by the computer. This instruction also applies to OIO returns using tax table.</p>
Card 03 Field		
1. Tax surcharge	Line 17	<p>Card 02, Field 7 instruction applies. (This field may be blank even though Card 02, Field 7 has an entry).</p>
Field 27 2. Total income tax	Line 18	<p>(Enter from line 18.) Verification check: sum of lines 16 and 17 or amount from schedule T, line 18.</p> <p>NOTE: For non-compute returns, the editor should enter adjusted gross income, total number of exemptions, and withholding amount. Computation of Tax, surcharge, and balance due or overpayment will be done by the computer. This instruction also applies to OIO returns.</p>
Field 28 3. Income tax withheld	Line 19	<p>Income tax withheld (W-2). Enter the line 19 amount in this field even if salaries and wages are not reported. If the taxpayer's entry was not accepted during revenue processing because there was not an entry on line 11, do not accept the revenue processing change unless there is a definite indication that the amount was not income tax withheld.</p>
Field 29 4. Excess FICA withheld	Line 20	<p>FICA payments by the taxpayer(s) in excess of legal requirements. Example: More than \$374 social security (FICA) tax withheld by one or more employers for <u>one</u> filer during the year. If a joint return, <u>both</u> filers could possibly have excess FICA. If this item is reported in</p>

STATISTICAL PROCESSING HANDBOOK FOR INDIVIDUAL INCOME TAX RETURNS

234 Money Fields (Amounts)--Cont. (4)

	<u>Card 03 Field</u>	<u>Form 1040 Reference</u>	<u>Explanation or Special Instruction</u>
	4. Excess FICA withheld (Cont.)	Line 20	Itemized deductions, leave it there unless complete error resolution adjustments have been made. If the taxpayer's entry is completely disallowed during revenue processing, use the corrected figures. In all other cases use taxpayer's reported figure (even if it equals W-2 amount).
Field 30	5. Refundable credits	Line 21	Enter line 21 amount. Verification check: Form 4136 and /or Form 2439
Field 31	6. 1969 Estimated tax payments and credits	Line 22	Includes 1968 overpayment credit and 1969 advance payments. SOI does not differentiate between advance payments and estimated tax payments.
Field 32	7. Balance due	Line 24	The excess of line 18 over line 23.
	<u>Card 04 Field</u>		
Field 36	1. Tax paid with return	Line 24	Remittance returns only: (1) <u>Full paid</u> - line 24 is blue circled. Enter this amount. (2) <u>Part paid</u> - line 24 is not blue circled. Enter blue pencil amount shown at top right of return. This amount should be less than the amount shown on line 24. (3) <u>Over paid</u> - Enter the amount that has been blue circled on line 24 or the blue pencil amount at top right of return even if it is larger than balance due. There should be an entry in this field only if there is an entry for balance due.
Field 37	2. Overpayment credited on 1970 estimated tax	Line 26a	Entry shown only if taxpayer elects. If disallowed during revenue processing, use corrected figures. No entry: Leave blank
Field 38	3. Overpayment refunded	Line 26b	Check: Line 23 minus line 18
	4. Total itemized deductions	Schedule A, Line 17	Enter the amount shown on schedule A, line 17. This amount should equal the sum of lines, 9,10,14,15, and 16, if it doesn't, do not make any changes, accept taxpayer's total. Note: This item will not be available if schedules A or T are not attached.

STATISTICAL PROCESSING HANDBOOK FOR INDIVIDUAL INCOME TAX RETURNS

234 Money Fields (Amounts)--Cont. (5)

	<u>Card 04 Field</u>	<u>Form 1040 Reference</u>	<u>Explanation or Special Instruction</u>
Field 58	5. Business or professional net profit	Schedule C, Line 27 (+)	Check for attached business schedules (C or taxpayer's own). Enter net positive amount from all schedules coded 0710-9101 and 9102, when appropriate, per instructions in Sec. 241.5. If a Schedule C is attached and there is not an entry on line 27 but the income is included on Form 1040, line 14 enter the appropriate amount in this field. If the income is not included on Form 1040, line 14, edit the business schedule but do not enter an amount in this field.
Field 59	6. Business or professional net loss	Schedule C, Line 27 (-)	Same as Field 5. Enter negative amount. Check: Cannot have entries in both Fields 5 and 6.
Field 41	7. Short-term capital loss carryover	Schedule D, Part I, Line 7	NOTE: If a Schedule D has income which has not been included in total income or loss, make no entries in Card 04, Field 7 through Card 06, Field 5. If the Schedule D has a net loss and was not included in total income or loss, make all applicable entries in Card 04, Field 7 through Card 05, Field 6, and leave Card 06, Field 2 <u>blank</u> .
	<u>Card 05 Field</u>		
Field 43	1. Net short-term gain after carryover	Schedule D, Part I, Line 4	The positive sum of lines 1-3 (+).
Field 44	2. Net short-term loss after carryover	Part I, Line 4	The negative sum of lines 1-3 (-). Check: Cannot have entries in <u>both</u> Fields 1 and 2.
Field 42	3. Long-term capital loss carryover	Part I, Line 7	Note: Include capital gains and losses from Schedules C and F. When income or loss from sale of cattle is moved from Schedule F to Schedule D, do not limit the loss to \$1,000.

STATISTICAL PROCESSING HANDBOOK FOR INDIVIDUAL INCOME TAX RETURNS

234 Money Fields (Amounts)--Cont. (6)

	Card 05 Field	Form 1040 Reference	Explanation or Special Instructions
Field 45	4. Net long-term gain after carry-over	Schedule D, Part I, Line 9	The positive sum of lines 5-8 (+). If a <u>net</u> amount of capital gain can be identified as a long-term or if there is no indication that the amount represents long-term or short-term gain, double the amount and enter it in this field.
Field 46	5. Net long-term loss after carryover	Part I, Line 9	The negative sum of lines 5-8 (-). Check: Cannot have entries in <u>both</u> Fields 4 and 5. If a loss on personal property is shown but was not included in total income, do not include in the entry for this field.
Field 49	6. Net loss before limitation	Part I, Line 10	Enter only the negative sum of lines 4 and 9 (-).
Field 50	7. $\frac{1}{2}$ Excess long-term gain	Part I, Line 11	If line 10 shows a gain, enter 50% of line 9 or 50% of line 10, whichever is smaller.
	Card 06 Field		
Field 47	1. Net gain	Part I, Line 12	Net positive amount (+). If there is an entry on line 12 but the amount was not included in total income, do not pick up the amount.
Field 48	2. Net loss	Part I, Line 13	Net negative amount (-). Check: Cannot have entries in <u>both</u> Fields 1 and 2. If an entry on line 13 was not included in total income, do not pick up the amount.
Field 52	3. Total ordinary gain	Part II, Line 2	Card 06, Field 1 instruction applies. If entry in Part II, line 2 is negative, net that amount with Part III, line 3 and make the resulting entry in Card 06, Field 4 or Field 5.
Field 53	4. Other property net gain	Part III, Line 3	Net positive (+) amount. Card 06, Field 1 instruction applies.

STATISTICAL PROCESSING HANDBOOK FOR INDIVIDUAL INCOME TAX RETURNS

234 Money Fields (Amounts)--Cont. (7)

	<u>Card 06 Field</u>	<u>Form 1040 Reference</u>	<u>Explanation or Special Instruction</u>
Field 54	5. Other property net loss	Schedule D, Part III, Line 3	Net negative (-) amount. Check: Cannot have entries in both Fields 4 and 5. If an entry on line 3 was not included in total income do not pick up the amount.
Field 51	6. Alternative tax	Part IV, Line 6	A taxpayer could have an entry on Schedule D, Part IV, line 6 and not use the alternative tax if it is greater than the amount for tax computation on Schedule T, line 5. Pick up the amount reported by taxpayer if used by the taxpayer. NOTE: If an amount for alternative tax is shown on Schedule D there should be a check in the Schedule D box on Form 1040 line 18.

Schedule E,

Note: (1) If amount of income or loss on a Schedule E is not included in total income on Form 1040 line 14, do not make entries for the Schedule E information. (2) If an amount of Sch. E income is shown with no breakdown between rents and royalties, partnership and small business corporation, or estates or trusts, include the amount in Other income (Card 02, Field 2) or Other loss (Card 02, Field 3).

Pension and Annuity Income

Field 56	7. Amount received this year	Schedule E, Part I Line 3	Enter only that portion of pensions and annuities received in tax year 1969.
	<u>Card 07 Field</u>		
Field 57	1. Taxable portion	Line 5	All amounts which the taxpayer shows as being taxed in the current year are taxable.
Field 60	2. Rents, net income	Schedule E, Part II Line 2 (+)	Positive (+) portion of line 2 attributable to rent. Should equal column 2 minus that portion of columns 4 and 5 attributable to rent. Include delay rentals shown on Schedule E or taxpayer's own schedule

STATISTICAL PROCESSING HANDBOOK FOR INDIVIDUAL INCOME TAX RETURNS

234 Money Fields (Amounts)--Cont.(8)

	Card 07 Field	Form 1040 Reference Schedule E, Part II, Line 2 (-)	Explanation or Special Instruction
Field 61	3. Rents, net loss	Line 2 (-)	Negative (-) portion of line 2 attributable to rent. Should equal negative result of computation for Card 07, Field 2. Check: Cannot have entries in <u>both</u> Fields 2 and 3.
Field 62	4. Royalties, net income	Line 2 (+)	Enter the Net Positive amount from col. (3). Include royalties from copyrights, patents, oil, gas, and mineral properties. Should equal column 3 minus that portion of columns 4 and 5 attributable to royalties.
Field 63	5. Royalties, net loss	Line 2 (-)	Same as Field 4. Enter negative amount. Check: Cannot have entries in <u>both</u> Fields 4 and 5.
Field 64	6. Partnership net profit	Part III column d (+)	(1) Include positive amounts in column (d) which can be associated with Partnerships in column (b). (2) If the entry in column (d) or taxpayer's own schedule indicates that the partnership income is in the form of capital gains from the partnership, leave the amount in this field instead of attempting to move it to the capital gains schedule. (3) If income from the partnership is entirely from dividends or interest and the taxpayer makes a clear indication of this on the return, move the amount to Interest or Dividends. (4) Allocate partnership fees and salaries to wages, and salaries (Card 01, Field 5).
Field 65	7. Partnership net loss	column d (-)	Same as Field 6. Enter negative amount. Check: Cannot have entries in <u>both</u> Fields 6 and 7.
	Card 08 Field		
Field 66	1. Estates or trusts net income	Schedule E, Part III, column d (+)	Include amounts in column (d) which can be associated with estates and trusts. Combine income and loss amounts if shown separately and enter positive amount. Card 07, Field 6 instructions (2) and (3) apply.

STATISTICAL PROCESSING HANDBOOK FOR INDIVIDUAL INCOME TAX RETURNS

234 Money Fields (Amounts)--Cont. (9)

	<u>Card 08 Field</u>	<u>Form 1040 Reference</u>	<u>Explanation or Special Instruction</u>
Field 67	2. Estates or trusts net loss	Schedule E, Part III, column d (-)	Same as Field 1. Enter negative amount. Check: Cannot have entries in <u>both</u> Fields 1 and 2.
Field 68	3. Small business corporations net profit	column d (+)	Include positive amounts in column (d) which can be associated with small business corporations.
Field 69	4. Small business corporations net loss	column d (-)	Same as Field 3. Enter negative amount. Check: Cannot have entries in <u>both</u> Fields 3 and 4.
Field 72	5. Miscellaneous income	column d (+)	(1) Include positive amounts which cannot be associated with partnership, estate or trust, or small business corporation income. (2) Amounts for rents, royalties, or partnerships should be allocated to the appropriate fields. Leave in "delay rentals" if shown here. Include all "depletion restored" even if shown on schedule E or taxpayer's schedule. (3) If an amount on line 1 Part III is identified as capital gains or is not identified and equals $\frac{1}{2}$ of line 14 Form 1040 and Schedule D is not attached to the return, enter the amount as net capital gain (Card 06, Field 1) and double the amount and enter the computed amount for net long-term gain after carryover (Card 05, Field 4). (4) Do not move patronage dividends unless there is an indication that they pertain to a business or farm. Agricultural Program Payments should always be moved to a Schedule F.
Field 73	6. Miscellaneous loss	Schedule E, Part III column d (-)	Same as field 5. Enter negative amount. Check: Cannot have entries in <u>both</u> Fields 5 and 6.
Field 70	7. Net farm profit	Schedule F, Part I Line 52 (+) or Part V, line 69 (+)	Check for attached business schedule (F or taxpayer's own.) Enter net positive amount from all schedules coded 0110-0198. Card 04, Field 5 instruction dealing with Schedule C applies to Schedule F for this field.

Explanation of Fields in the 1969 Individual Tax Model contd.

STATISTICAL PROCESSING HANDBOOK FOR INDIVIDUAL INCOME TAX RETURNS

234 Money Fields (Amounts)--Cont. (10)

	<u>Card 09 Field</u>	<u>Form 1040 Reference</u>	<u>Explanation or Special Instruction</u>
Field 71	1. Net farm loss	Line 52 (-) or Line 69 (-)	Same as Card 08, Field 7. Enter negative amount. Check: Cannot have entries in both Card 08, Field 7 and Card 09, Field 1.
	2. Schedule G tax	Schedule G, Part IV Line 10 or Part V, Line 14	Enter amount from line 10, regular tax or line 14; alternative tax. This amount should be shown on Form 1040, line 18 and a check in Schedule G box.
Field 74	3. General rule base for retirement credit	Schedule R, Line 7 (a)	Check: Sum of line 6, columns A+B for joint returns, for other than joint returns should equal amount on line 6 of column B (or column A if used).
Field 75	4. Alternative base for credit	Line 7 (b)	If line 7 (b) is blank, use entry on line 7 of Part B if shown.
Field 76	5. Tentative credit	Line 8	If there are no entries on lines 8-11 and there is an entry on line 12, enter that amount in this field.

Schedule T

Note: (1) For Card 09, Field 6-Card 11, Field 1, make entries only if Schedule T or taxpayer's own computation schedule is attached. If Schedule T is not complete, do not make any computations, pick up only what taxpayer has entered or entries made during revenue processing.

(2) If, however, a prior year form was used and a Schedule T has not been inserted, edit from the prior year form all possible entries for Card 09, Field 6 through Card 11, Field 1.

(3) When a correction has been made on Form 1040 during revenue processing and the correction was not carried through on the Schedule T, edit only credits shown on Schedule T. If no credits, leave entire Sch. T portion of edit sheet blank.

6. Total deductions Line 2

7. Taxable income Line 5

Card 10
Field

Field 21	1. Income tax before credits	Line 6	This field is blank if Card 09, Field 7 is blank. Note: This field does not apply to taxable returns.

Explanation of Fields in Tape File
Undefined in the 1969 Editing Instructions

<u>Field</u>	
5	EXEMPTIONS OTHER THAN AGE OR BLINDNESS - a computed amount equal to field 6 - (field 1 + field 3).
15	DIVIDENDS EXCLUSION - an amount equal to line 12b, page 1 of Form 1040.
19	TOTAL DEDUCTIONS - line 2, Schedule T of Form 1040. (NOTE: In the case of taxpayers using the tax tables, a computed amount was entered in Field 19).
20	TAXABLE INCOME - line 5, Schedule T of Form 1040. (See not to Field 19).
23	TAX SURCHARGE - an amount equal to line 17 of Form 1040 <u>or</u> line 9, Schedule T of Form 1040.
24	TAX SAVINGS FROM INCOME AVERAGING - for those returns using income averaging (tax status codes 2, 4, 7 and 9), the difference between tax computed by the regular method and tax computed using the income averaging method.
25	LONG-TERM CAPITAL GAIN IN EXCESS OF SHORT-TERM CAPITAL LOSS- a computed amount equal to field 45 - field 44.
26	BALANCE FOR PARTIAL TAX - line 3 from the computation of Alternative Tax section, Part IV, Schedule D of Form 1040.
33	POSITIVE ADJUSTED GROSS INCOME ADJUSTMENT - information field for Statistics Division use only.
34	NEGATIVE ADJUSTED GROSS INCOME ADJUSTMENT - information field for Statistics Division use only.
35	TOTAL OVERPAYMENT - line 25 of Form 1040.
40	TAX BEFORE INCOME AVERAGING - for returns with tax computed using income averaging (tax status codes 2, 4, 7, and 9), the amount of tax which would have resulted if income averaging was not used.
55	RECOVERY OF COST THIS YEAR - line 4, Part I, Schedule E of Form 1040.
78	<u>OTHER TAX CREDITS - line 14, Schedule T of Form 1040 minus</u>

Note: The Coefficients of Variation were derived by an "Upper Limit" formula and are expressed as a percent for the frequency estimates. Amount estimates generally have Coefficients of Variation somewhat greater than those of their associated frequencies. For Frequencies not classified by Adjusted Gross Income, Column (2) of the table should be used.

- (1) Sample too small to yield reliable estimate of sampling variability.
- (2) Not applicable since number of returns in Column (1) exceeds range of possible frequency estimates.

Explanation of Classifications and Terms

CLASSIFICATIONS

Adjusted gross income classes

The amount of adjusted gross income reported by the taxpayer on his return was generally the basis for classifying data by size of income. Returns with deficit and those on which income and loss were equal were classified as having "No adjusted gross income" and appear as a separate class.

Marital status

The five marital classifications were:

- (1) Joint returns of husbands and wives,
- (2) Separate returns of husbands and wives,
- (3) Returns of heads of household

shown on each return. The Office of International Operations had charge of returns with addresses outside the 50 States and the District of Columbia. These include returns from the Virgin Islands, Panama Canal Zone, and returns with foreign addresses, all of which are shown in the State statistics under "Other areas." Qualifying returns filed by bona fide residents of Puerto Rico, also processed by the Office of International Operations, are shown separately in the State data.

Each of the seven Internal Revenue Regions was composed of a group of districts, as shown by the map in section 5, and each had a service center in which returns filed with the service center or through the district offices were processed.

National totals in the State and regional tables differ slightly from those presented elsewhere because of dif

5. These 125 areas conformed to the 1969 definitions developed by the Office of Management and Budget and had

- (2) Employee business and moving expenses,
- (3) Expense deductions attributable to rents and

Tax rate classes

Tax rates were used to classify data for some of the tables included in section 3 of this report. A tax rate class was the percentage at which all or a portion of an individual's income was taxed. "Returns with the tax rate as the marginal rate" referred to the highest rate used by a taxpayer in computing his tax.

See also the example and text in section 3--Tax Computation and Tax Rates.

Tax rate schedules

The three tax rate schedules designed for individual income taxpayers were for:

- (1) Joint returns and returns of surviving spouse,
- (2) Separate returns of husbands and wives and returns of single persons not head of household or surviving spouse, and
- (3) Returns of heads of household.

earning a salary, commission, or other compensation,

(5) Depreciation and depletion allowed life tenants and income beneficiaries of property held in trust,

(6) Exclusion of allowable sick pay if the sick pay was included in gross salary,

(7) Deductible losses from sales of capital assets and other property,

(8) Deductible half of the excess of net long-term capital gain over net short-term capital loss,

(9) Business net operating loss carryover, and

(10) Contributions to a retirement fund by the self-employed.

A deficit adjusted gross income occurred when the allowable deductions or losses exceeded gross income.

Alternative computation of tax

Under the alternative computation, half the excess of net long-term capital gain over net short-term capital loss was included in taxable income, and tax before credits was 50 percent of the excess plus an amount calculated by applying the

various types of investment income for which separate provision was made on the individual income tax return.

Business costs and expenses were deductible from gross receipts or gross sales in arriving at net profit or loss. Compensation of the proprietor was taxable income and therefore not allowed as a business deduction in computing net profit. The carryover of a prior year net operating loss was not considered a business expense but was offset instead against "other income" on the proprietor's income tax return.

Information on business receipts and expenditures can be found in *Statistics of Income--Business Income Tax Returns*.

Capital gains and losses

See "Sales of capital assets."

Capital loss carryover

See "Sales of capital assets."

Credit on 1970 tax

This credit was the part of the overpayment on 1969 tax which the taxpayer specifically requested be credited to his estimated tax for 1970.

Dividend exclusion

A taxpayer could exclude up to \$100 of eligible dividends from adjusted gross income. On joint returns, the maximum exclusion was \$200 if both husband and wife received eligible dividends, each excluding up to \$100 against his respective dividend income. For a further explanation of eligible dividends see "Domestic and foreign dividends received."

Dividends in adjusted gross income

Total domestic and foreign dividends less the dividend exclusion equalled dividends in adjusted gross income.

For further explanation see "Domestic and foreign dividends received" and "Dividend exclusion."

Domestic and foreign dividends received

or nontaxable distributions of stock or stock rights, turns of capital, or liquidation distributions. Also included were so-called dividends on deposits or drawable accounts in mutual saving banks, cooperative banks, savings and loan associations, and credit unions.

Estates and trusts net income or loss

This was the beneficiaries' share of fiduciary income (with the exception of the items described below which were reported separately) from any estate or trust. Income from estates and trusts included amounts required to be distributed and amounts credited to a beneficiary's account from current year fiduciary income, whether or not actually received by him. It also included his share of any accumulation distribution made by the fiduciary of a complex trust which distributed income accumulated in prior tax years. The beneficiary's share of these distributions was reduced by his share of depletion and depreciation before reporting the net amount as part of adjusted gross income.

The taxpayers also excluded from estate or trust income his share of dividends, interest, and gains or losses from sales of capital assets and other property. Such income (which comprised the largest portion of income from an estate or trust) was reported on the tax return on separate lines provided for this purpose. A loss from an estate or trust was allocated to the beneficiary only at the termination of an estate or trust which had a net operating loss carryover or a capital loss carryover, or for the last tax year had deductions (other than for exempt and charitable contributions) in excess of gross income.

Additional information on estate and trust income can be found in *Statistics of Income--1965, Fiduciary, and Estate Tax Returns*.

Excess social security taxes withheld

See "Income tax withheld."

Exemptions

In the computation of taxable income, a \$600 deduction was allowed for each exemption claimed. An exemption was allowed for each taxpayer shown on a return (on joint returns husband and wife were each regarded as a taxpayer). If either husband or wife filed a separate return,

In each of these instances individuals were counted twice, as taxpayers filing their own returns and as dependents on another taxpayer's return.

Farm net profit or net loss

This source was reported by individuals who were proprietors of a farm. When there were two or more proprietorship farms operated by the taxpayer, the single amount of profit or loss included in adjusted gross income represented the combined profit and loss from farm business activities.

Farm business costs and expenses were deductible from gross farm business receipts in arriving at farm net profit or loss. Gain from sales of livestock held for breeding purposes and of land with unharvested crops was reported on the separate schedule for sales of property (Schedule D) and was not reflected in farm net profit or loss.

Additional information on farm receipts and expenditures can be found in *Statistics of Income--Business Income Tax Returns*.

Foreign tax credit

A credit against income tax was permitted for foreign taxes paid only if nonbusiness deductions were itemized and the foreign tax was excluded from those deductions. The credit related to the income and profits taxes paid to foreign countries or possessions of the United States and included the taxpayer's share of such taxes paid through partnerships and fiduciaries. In general, the tax credit was limited to the same proportion of the income tax before credits as the taxable income from foreign sources bore to the entire taxable income, but could not exceed the amount of foreign tax paid. Amounts in excess of the limitation could be carried over for use in computing the credit for other years.

Form W-2, Wage and Tax Statement

Employers were required to furnish a Form W-2, Wage and Tax Statement, to each employee from whom income tax was withheld or would have been withheld if the employee had claimed no more than one exemption during calendar year 1969. Forms W-2 showed the amounts of Federal income tax withheld, wages paid subject to withholding, other compensation (amounts includible in gross income but not subject to income tax withholding such as traveling or other expense allowances of employees), and FICA (social security) tax withheld.

See section 1, Returns Filed and Sources of Income, for an explanation of the difference between statistics for items reported on Form W-2 and comparable items reported on the return itself.

General rule method for computation of retirement income credit

See "Retirement income credit."

Heads of households, returns of

These returns were filed by persons who furnished over half the cost of maintaining a household for the entire year

for at least one qualifying relative. This classification was available only to unmarried persons, married persons legally separated, or persons married to nonresident aliens.

A special tax rate schedule was provided for head of household which gave approximately half the benefit of the joint return schedule.

Income averaging

The income averaging computation permitted a part of an unusually large amount of taxable income for any one year to be taxed at lower rates, thus resulting in a reduction of the over-all amount of tax due. An eligible individual could choose this computation if his averageable income for the year was more than \$3,000.

"Averageable income" was the amount by which "adjusted taxable income" exceeded 133-1/3 percent of "average base period income" (the average of taxable income with certain other adjustments, for the 4 preceding tax years). Briefly, the income averaging computation operated to tax all averageable income at the same rate which applied to the first one-fifth of such income.

"Adjusted taxable income," from which the averageable income was derived, covered all types of taxable income except net long-term capital gains, income from gifts or inheritances, or wagering income. See Schedule G, Income Averaging, reproduced in the section on "Forms and Instructions," for an explanation of the computation involved.

Income subject to tax

For returns with normal tax and surtax, the income subject to tax was "taxable income." For returns with alternative tax computation, the income subject to tax was either:

- (1) Taxable income, when that amount exceeded one-half the excess net long-term capital gain over net short-term capital loss, or
- (2) One-half excess net long-term capital gain over net short-term capital loss when that amount equaled or exceeded taxable income.

Income tax after credits

Income tax after credits was determined by subtracting statutory credits from the total of income tax before credits and the tax surcharge. It did not include self-employment tax or tax from recomputing prior year investment credit, nor did it take into account refundable credits.

Income tax before credits

Generally, this was the tax liability computed on taxable income based on:

- (1) The regular combined normal tax and surtax including tax from the optional "tax tables,"
- (2) Alternative tax, or
- (3) Tax computed using the income averaging provisions.

Income tax before credits did not include the 10 percent surcharge on tax.

69 065

For many returns, income tax before credits had to be derived for the statistics because for 1969 Schedule T, on which income tax before credits was computed, did not always have to be filed with the return.

Income tax withheld

Tax withheld represented amounts deducted by employers from salaries, wages, tips, and other forms of remuneration. An employer could use either the "percentage" or "wage bracket" method in determining the amount to be withheld. Both methods were based on graduated withholding rates ranging from 14 percent to 33 percent.

For 1969, statistics on income tax withheld also include excess social security taxes withheld. If more than \$374.40 of social security (FICA) tax was withheld in 1969 from an employee because he worked for more than one employer, the excess could be taken as a credit toward payment of the employee's income tax. In the case of a joint return, the credit was computed separately for each taxpayer.

Increase in tax due to surcharge

See "Surcharge."

Increase in tax credits due to surcharge

See "Surcharge."

Interest received

Interest received was the taxable portion of interest received from bonds, debentures, notes, mortgages, personal loans, bank deposits, and savings accounts. Excluded, for example, was the interest on State and local Government obligations which was tax-exempt and therefore did not have to be reported on the tax return.

Investment credit

In general, the investment credit applied against income tax was 7 percent of a taxpayer's qualified investment in certain new and used depreciable assets, chiefly machinery and equipment, with a useful life of 4 years or more. Qualified investment was defined as cost or basis reduced by:

- (1) one-third if the useful life was at least 6 years but less than 8 years, or
- (2) two-thirds if the useful life was at least 4 years but less than 6 years.

Total qualified investment was limited to \$50,000 for used property and was reduced by 4/7 if the investment was in public utility property. Income tax against which the credit was applied was first reduced by the foreign tax and retirement income credits. If the amount of tax remaining was more than \$25,000, the credit could not exceed \$25,000 plus 50 percent of the tax liability over that amount. Amounts in excess of this limitation could be carried over (or carried back) for a prescribed number of years to be claimed as a credit.

The Tax Reform Act of 1969 provided that the investment credit would no longer be available for property acquired after April 18, 1969 or for property on which construction, reconstruction, or erection began after that date. However, certain exceptions were provided for property constructed or acquired under a binding contract entered into before April 19, 1969. The new law also provided a limitation of 20 percent on unused credits which could be claimed as a carryover to any year after 1969. However, the Act extended the carryover period from 5 to 10 years in certain cases.

Itemized deductions

Itemized deductions from adjusted gross income could be claimed for contributions, interest paid, taxes, medical expenses, and other deductions for which no special line or schedule was provided on the return. Such other deductions included unreimbursed casualty and theft losses, alimony payments, child care expense, educational expense, and certain expenses connected with taxpayer's employment.

Itemized deductions were tabulated on returns with positive adjusted gross income even though they were in excess of taxable income. On breakeven or deficit adjusted gross income returns, the taxpayer had already reached a nontaxable state without the necessity of itemizing; consequently, itemized deductions were not tabulated on these returns even though the taxpayer may have entered itemized deductions on his return form.

Joint returns of husbands and wives

These were either returns on which married taxpayers reported their combined income or returns of married taxpayers where only one spouse had income but exemptions of both were claimed. Generally, the filing of a joint return resulted in a tax saving because of "income splitting" which was automatically provided for in the joint return tax rate schedule.

Marginal tax rates

The marginal tax rate was the highest rate used by a taxpayer in computing tax. Since it applied to income in excess of a specified amount, the marginal rate varied from taxpayer to taxpayer. For example, if a joint return showed income subject to tax of \$11,000, the tax rate schedule (reproduced in the income tax return facsimile at the end of this report) indicates tax as \$1,380 plus 22 percent of the excess of \$8,000. The marginal rate in this case was 22 percent, and the income taxed at that marginal rate was \$3,000 (\$11,000 minus \$8,000). See also the example in the text in section 3--Tax Computation and Tax Rates.

Minimum standard deduction

See "Standard deduction."

Miscellaneous income or loss

See "Other sources of income (or loss)."

Normal tax and surtax

The income tax imposed upon taxable income subject to normal tax and surtax rates was divided into a:

- (1) Normal tax of 3 percent of taxable income, and
- (2) Surtax levied on a scale graduated in relation to size of taxable income.

To facilitate computation, the normal tax and surtax rates were combined in the tax tables furnished to the public.

One-half excess long-term gain

See "Alternative computation of tax."

Ordinary gain from sales of depreciable property

Included here was that portion of gain not eligible for treatment as a long-term capital gain (under section 1231) from sales of depreciable property specified in sections 1245 and 1250 of the Internal Revenue Code and thereby not qualified to be taxed at the special capital gains rate.

The depreciable property to which section 1245 applied was (1) personal property other than livestock, whether tangible (such as machinery and equipment), or intangible (such as patents or copyrights), and (2) other tangible property including certain realty other than buildings and their structural components, if it was an integral part of certain specified business activities, or which constituted research or storage facilities used in connection with such activities. The business activities qualifying were manufacturing, production, or extraction, or the providing of transportation, communication, electrical energy, gas, water, or sewage disposal services.

The depreciable property to which section 1250 applied was real property not already covered by section 1245. In general, this property consisted of buildings or their structural components in the case of tangible property, or represented leaseholds of land, in the case of intangible property.

The amount of gain on dispositions of property under sections 1245 and 1250, treated as ordinary gain generally depended upon the amount of depreciation claimed on the asset although other factors were also considered in the case of section 1250 dispositions.

Under section 1245, the amount of gain treated as ordinary income was based, generally, on depreciation allowed or allowable after 1961.

Under section 1250, the amount of gain treated as ordinary gain was based, in general, on the depreciation allowed or allowable after 1963. But this "depreciation recapture" was further qualified so that if the property was held for more than 1 year before it was disposed of.

Other sources (net)

Included here were such items as alimony received, prizes, awards, sweepstakes winnings, gambling profits, recovery of bad debts and taxes deducted in a prior year, insurance received as reimbursement for medical expenses taken in a previous year, and any other income subject to tax for which no entry was provided on the return form.

Taxpayers were required to apply any deduction for business net operating losses against "other income." In general, these amounts represented prior year losses of proprietors, partners, and shareholders of Small Business Corporations electing to be taxed through owners that exceeded the adjusted gross income of the loss year.

For 1969, statistics on other sources of income or loss also include amounts shown separately in prior years as statutory adjustments. These were special deductions from gross income used in arriving at adjusted gross income. Included here were the following:

- (1) Sick pay exclusion,
- (2) Self-employed retirement deduction,
- (3) Employee business expense deduction, and
- (4) Employee moving expense deduction.

For 1969, "statutory adjustments" in arriving at adjusted gross income could not always be separately identified. Many low-income taxpayers using Form 1040 for the first time following discontinuance of Form 1040A, the short punchcard form, apparently reported a variety of unrelated items as statutory adjustments including, in some instances, their total personal deductions.

Other tax credits

"Other tax credits" included (1) the credit for withholding on tax-free covenant bond interest allowed only if nonbusiness deductions were itemized, and (2) the "throwback tax credit," whether claimed on a standard or itemized deduction return. Also included were unidentified amounts of retirement income, investment, or foreign tax credits.

The credit for tax-free covenant bonds was for the tax paid on the bond interest by the issuing corporation for the owners. Bonds with a tax-free covenant were issued prior to 1934 and provided that the corporation pay part of the income tax on the interest usually at the rate of 2 percent.

The throwback tax credit was the recipient's pro rata share of taxes paid by a complex trust in preceding tax years which would not have been payable by the trust had the trust in fact distributed income currently to the beneficiaries instead of accumulating it before distribution. Thus, income tax paid on accumulation distributions deemed distributed in prior years was not refunded to

Other taxpayments

Included here for purposes of table 3D in section 3 was the sum of the following taxpayments:

(1) Income tax withheld (including excess social security taxes withheld), and

(2) Refundable credits.

Each of the above is described under separate heading.

Overpayment

An overpayment of tax occurred when the sum of the tax

Pensions and annuities, taxable portion

See "Pensions and annuities."

Recovery of cost

See "Pensions and annuities."

Refund

A refund of tax included all overpayments not applied by the taxpayer as a credit to the next year's estimated

withheld, payments on declaration of estimated tax, and refundable taxpayment credits, exceeded the combined income tax after credits, self-employment tax, and tax from recomputing prior year investment credit. Overpayments could be refunded or, at the taxpayer's election, taken as a credit on the subsequent year's estimated tax, or taken partly as a refund and partly as a credit against estimated tax.

Partnership net profit or net loss

Partnership net profit or loss was reported by persons who were members of a partnership, syndicate, joint venture, or association. The taxpayer's profit or loss shown was his share only of the ordinary income or loss of the enterprise together with payments made to him as a salary or for the use of capital. If the individual was a member of more than one partnership, the single amount of partnership profit or loss reported in adjusted gross income, whether actually received or not, was the combination of all his shares.

The ordinary income of the partnership did not include dividends qualifying for the exclusion, net short- and long-term capital gain or loss, and interest on tax-free covenant bonds. The partner's share of each of these items was reported by him in its respective source of income on the return form.

Additional information for partnerships can be found in *Statistics of Income--Business Income Tax Returns*.

Payments on 1969 declaration of estimated income tax

These payments, summarized on the individual income tax return, were paid with the 1969 Declaration of Estimated Income Tax, Form 1040ES. The amount reported included any credit which was applied against the estimated tax by reason of an overpayment of the 1968 tax liability.

Pensions and annuities

Pensions and annuities represented the taxable portion of the amounts received during the year. The full amount of a pension or annuity received by a retired employee who contributed nothing toward the cost was taxable. If the recipient contributed to the cost, methods were provided for computing the nontaxable amount to be excluded. The method used depended upon the type of pension or annuity but, in general, was designed to estimate the portion of receipts that represented recovery of recipient's cost.

tax. See "Overpayment."

Refundable credits

"Refundable credits" represented certain nonhighway Federal gasoline taxes or tax withheld by regulated investment companies. Such credits were combined with other prepayments on the tax return, and any amounts in excess of the income tax liability were refundable.

The credit for nonhighway Federal gasoline taxes could be claimed by any individual for Federal taxes paid on:

(1) gasoline used--

(a) on a farm for farming purposes,

(b) other than as fuel in a highway vehicle,

(c) in furnishing scheduled common carrier public passenger land transportation along regular routes.

(2) lubricating oil used other than in a highway motor vehicle.

Tax withheld by regulated investment companies was the shareholder's share of taxes withheld on the net long-term capital gain realized by a regulated investment company but not actually distributed. The shareholder was entitled to a credit for the 25 percent tax paid by the company as an offset against the income tax he paid for the year.

Rent net income or loss

Rent net income or loss constituted a part of adjusted gross income and was determined by deducting from gross rents amounts for depreciation, repairs, maintenance, interest, taxes, commissions, advertising, fuel, insurance, janitor service, and other allowable expenses related to the rented property.

Retirement income credit

A credit for "retirement income" was allowed an individual if he received "earned income" of more than \$600 in each of any 10 calendar years prior to the tax year for which the credit was computed.

Retirement income for taxpayers under 65 years of age was defined as pension and annuity income received under public retirement systems. Retirement income for taxpayers age 65 or over was defined as all pension and annuity income plus dividends in adjusted gross income, interest, and gross rents.

Two methods were provided for computation of the credit:

(1) Under the general rule, the tentative credit was 15 percent applied to the lesser of retirement income received during the year or \$1,524 for each qualified re-

tiree (on joint returns, if each spouse met the past earnings and current retirement income requirements, the total retirement income limitation for both was \$3,048) reduced by earned income and by social security, railroad retirement, or other tax-free pensions and annuities excluded from gross income, and

(2) An alternative method was available if a husband and wife filed a joint return, were both age 65 or over, and at least one met the earned income requirement. This method provided a \$2,286 limitation on the base of the tentative credit. As under the general rule, the base was reduced by earned income and tax-free pension and annuity payments excluded from gross income.

Earned income was defined, in general, as salaries, wages, and other compensation for personal services rendered with certain adjustments based on the taxpayer's age as follows:

(1) Taxpayers under 62 years of age were required to reduce the maximum amount of retirement income for credit computation by earned income in excess of \$900,

(2) Taxpayers age 62 but under 72 were required to reduce the maximum amount of retirement income by 50 cents for every dollar earned in excess of \$1,200 but less than \$1,700; earned income in excess of \$1,700 reduced the maximum dollar for dollar,

(3) Taxpayers 72 years of age or older had no reduction for earned income.

The actual credit, however computed, could not exceed the income tax reduced by credits for foreign taxes and for tax withheld on tax-free covenant bond interest. For purposes of the income tax surcharge, taxpayers eligible for the retirement income credit could reduce income tax before credits by the credit and then compute their surcharge on the remaining tax.

Royalty net income or loss

Net royalties consisted of gross royalties less deductions for depletion, depreciation, office rent, legal fees, clerical help, interest, taxes, and similar items. Gross royalties included revenues from oil, gas, and other mineral rights; revenue from patents, copyrights on literary works, trademarks, formulae, and so on.

Salaries and wages (gross)

Gross salaries and wages as reported on the tax return were amounts of compensation for personal services prior to statutory adjustments which reduced salaries and wages by the sick pay exclusion and certain expenses connected with employment. Also included were commissions, bonuses, tips, fees, excess reimbursement over employee business expenses, and the value of nonmonetary payments for services, e.g., merchandise, accommodations, or property. Identifiable amounts for any of these categories which may have been reported by taxpayers in "other sources of income" were treated as salaries and wages for the statistics. Excluded were portions of salaries and wages earned abroad which were tax-exempt under special provisions of the law.

Also shown in this report are data for "Wages and other compensation" as shown on Form W-2. This concept differs slightly from "Salaries and wages" (gross) as reported on Form 1040, as is explained in section 1.

Sales of capital assets

In general, capital assets for tax purposes meant property regarded or treated as an investment, such as stocks, bonds, and nonbusiness real estate including a personal residence. Thus, property held for sale during the ordinary course of business operations and real and depreciable property held in connection with a business were among the property types not covered by the tax definition of capital assets.

If capital assets were held for more than 6 months, only half of the gain on their sale was taxable and in many instances at a rate lower than otherwise (see "Alternative computation of tax"). If sales resulted in a loss, regardless of how long the asset was held, the loss could be completely offset against capital gains and to a limited extent against ordinary income. However, capital losses from sales of property held for personal use were not deductible.

Certain assets used in a business and thus not covered by the definition of capital assets could nevertheless be treated as capital assets under special conditions. Livestock held for breeding purposes, unharvested crops sold with the land they grew on, certain natural resources including timber, and, to a diminishing extent, real and depreciable business property, were among the asset types specifically accorded this treatment.

If held more than 6 months the gain upon sale of these assets received the special capital gains treatment. However, unlike capital assets, sales of these assets were also given preferential treatment when they resulted in a loss. In contrast to a capital loss, such losses were deductible in full during the current year.

For a description of the tax treatment of gains from sales of real and depreciable business assets, see "Ordinary gain from sales of depreciable property."

Net short-term gain or loss.--Gains and losses from sales or exchanges of capital assets held 6 months or less were considered to be short-term. To obtain the net short-term gain or loss, gains and losses from current year transactions were combined with--

(1) any capital loss carryover from 1959-1963,

(2) any short-term capital loss carryover from 1964-68, and

(3) any net short-term gain or loss received from partnerships or fiduciaries.

Net long-term gain or loss.--Gains and losses from sales or exchanges of capital assets (or property treated as capital assets) held more than 6 months were considered to be long-term and therefore eligible for special beneficial tax treatment (see "Net gain" below and "Alternative computation of tax"). To obtain the net long-term gain or loss, gains and losses from current year transactions were combined with--

(1) any net long-term gain or loss received from partnerships or fiduciaries,

(2) any capital gain distributions of regulated investment companies, mutual funds and real estate investment trusts,

(3) net long-term gains included in the profits of Small Business Corporations electing to be taxed through shareholders (reduced by the special tax computed at the company level), and

(4) any long-term capital loss carryover from 1964-68.

Short-term capital loss carryover.--This carryover was the unused portion of any net capital loss sustained from 1959-1963 and any net short-term loss sustained since 1963 which exceeded the loss year's net capital gain or the \$1,000 maximum net capital loss deduction.

Long-term capital loss carryover.--This carryover was the unused portion of net long-term loss sustained since 1963 which exceeded the loss year's net short-term capital gain or the \$1,000 maximum deduction for net capital loss. If both a net short-term loss and net long-term loss were incurred, the net short-term loss was offset first.

Net gain.--In computing the gain in adjusted gross income, the net short-term gain or loss was combined with the net long-term gain or loss and the resultant gain if long-term was reduced 50 percent. The amount of net gain in adjusted gross income conformed to one of several conditions, namely, (a) on returns with a net long-term gain, the amount included in adjusted gross income was 50 percent of the excess net long-term gain over net short-term loss, (b) on returns with only a net long-term gain, 50 percent of the gain, (c) on returns with both net short- and long-term gain, the entire amount of net short-term gain combined with 50 percent of the net long-term gain, (d) on returns with only a net short-term gain, the entire net gain, and (e) on other returns, the entire excess of net short-term gain over net long-term loss.

Net loss.--In computing net loss in adjusted gross income the net short-term gain or loss was merged with the net long-term gain or loss, and the excess loss was allowed to the extent of the smallest of (1) the capital loss, (2) taxable income (adjusted gross income if the "tax table" was used) computed without regard to capital gains and losses and the deduction for personal exemptions, or (3) \$1,000.

For additional information on capital gains and losses, by asset type, see *Statistics of Income--1962, Supplemental Report, Sales of Capital Assets Reported on Individual Income Tax Returns.*

Sales of property other than capital assets, net gain or loss

In general, property other than capital assets related to property of a business nature in contrast to personal investments which were capital assets. Included were sales of property such as inventories and stock in trade; literary, musical, or artistic compositions created by the taxpayer; and losses on sales of depreciable and real property used in a trade or business. Each taxpayer included his share of such gain or loss received through partnerships and fiduciaries. In contrast to capital gain or loss, gain or loss from these transactions were included in their entirety in computing adjusted gross income. Losses on sales or exchanges of small business investment company stock were ordinary losses rather than capital losses. Also, losses on small business stock

Ordinary gain on sales of depreciable property is shown as a separate item.

Self-employment tax

This tax--levied under the Social Security system--was reported by each individual who had self-employment earnings of at least \$400 derived from a proprietorship or from his share of partnership profits. Citizens employed by foreign governments or international organizations were subject to self-employment tax on salaries for 1960 and subsequent years. Certain types of income and deductions such as investment income, capital gain or loss, net operating loss deduction, and casualty losses were not allowed in computing self-employment earnings.

The maximum amount subject to self-employment tax for 1969 was \$7,800 reduced by any wages on which social security tax had been withheld by an employer. The maximum self-employment tax payable was \$538.20 based on the 6.9 percent rate in effect for that year. Nonrefundable income tax credits could not be applied against this tax.

Separate returns of husbands and wives

Generally, these were returns of married persons, each of whom filed a return independent of his spouse and reported only his own income, exemptions, and tax. Also included were returns of married persons where only one spouse had income but elected to use this classification and returns with community income divided between husband and wife.

If either husband or wife filed a separate return, the other spouse's exemption could be claimed on that return, only if the spouse did not file a return, had no gross income, and was not the dependent of another taxpayer.

Single persons, returns of

There were returns of unmarried persons who did not qualify as head of household or surviving spouse.

Small Business Corporation profit or loss

Net income or loss of a qualified Small Business Corporation (defined in section 1371 of the Code), whether or not distributed, was taxed directly through each shareholder.

To qualify as a Small Business Corporation, a company had to be a domestic corporation with no more than ten shareholders, each of which was an individual (or as estate) and no one of which was a nonresident alien. The corporation could have only one class of stock and could not be a member of an affiliated group eligible to file a consolidated return. Also, it could not receive more than 20 percent of its gross receipts from Personal Holding Company income (rent, royalties, interest, annuities, and gains from sales or exchanges of stock and securities), and could not receive more than 80 per-

retained its character in the hands of the shareholders and is included in the statistics for net gain or loss from sales of capital assets. Shareholders were allowed to deduct their share of the corporate losses from other forms of individual income. Undistributed income earned in previous years was taxable to shareholders in the year it was earned, and could be distributed during the current year without any further tax.

More detailed information on Small Business Corporations can be found in *Statistics of Income--Business Income Tax Returns and Statistics of Income--Corporation Income Tax Returns*.

Standard deduction

A taxpayer was allowed a standard deduction in lieu of itemizing his deductible personal expenses. The taxpayer elected the larger of the regular 10 percent standard deduction or the minimum standard deduction. The "regular" deduction was 10 percent of adjusted gross income, and the minimum standard deduction was \$200 (\$100 for married taxpayers filing separately) plus \$100 for each exemption. In neither case could the deduction exceed \$1,000, (\$500 for married taxpayers filing separately). If married and filing separately, both taxpayers had to elect the same type of standard deduction.

For the following returns, the standard deduction had to be derived for the statistics:

(1) Returns of taxpayers who selected the optional "tax tables" to compute their tax. These taxpayers did not report an amount for standard deduction since the deduction was already built into the tables, and

(2) Returns with which Schedule T, on which the standard deduction was shown, was not filed.

Statutory adjustments

See "Other sources of income (or loss)."

Surcharge

In addition to the regular tax liability, a tax surcharge was imposed for the period January 1, 1969 through December 31, 1969. Figured on an annual basis, the surcharge was 10 percent of income tax reduced by any retirement income credit. Surcharge tables were provided for taxpayers whose regular tax was less than \$735

before credits could often determine how much of his allowable credits (e.g. retirement income and investment credits) could actually be used. Since the surcharge like the rest of the income tax could be reduced by credits, the larger total of tax before credits plus the surcharge permitted larger portions of allowable credits to be used. This increase in tax credits was applied against the surcharge.

For many returns, the tax surcharge had to be computed for the statistics because Schedule T, on which the tax surcharge was shown, did not always have to be filed with the return.

The surcharge statistics for 1968 are not directly comparable with the surcharge statistics for 1969. In 1969, the surcharge was not shown as a separate item on many returns (i.e. those of taxpayers who were not required to file a Schedule T); therefore, it was derived for each return on which it was due, even though some taxpayers may have failed to include the amount in their tax computations. For 1968, on the other hand, the surcharge was not derived if not shown by the taxpayer.

Surviving spouses, returns of

These returns were filed by widows or widowers whose spouse had died during either of the two preceding tax years, who had not remarried, and who had maintained a home which was the principal abode of a child or stepchild for whom the taxpayer was entitled to an exemption.

Surviving spouse taxpayers could use the joint return tax rates for the two taxable years following the year of death of the spouse; however, the deceased spouse could not be claimed as an exemption, except for the year of death. Thereafter, the special rates for surviving spouse halfway between the joint and single return tax rates applied.

Tax credits

Included here were the following credits applied against income tax:

- (1) Retirement income credit,
- (2) Investment credit,
- (3) Foreign tax credit, and
- (4) "Other" tax credits.

Each of the above is described under separate heading.

come under \$5,000 were required to remit any balance due with their Form 1040.

Tax from recomputing prior year investment credit

The investment credit provisions of the law included a "recapture rule" which required taxpayers to pay back all or a portion of any investment credit taken on property disposed of before the end of the useful life claimed in computing the credit. The law specified that if property qualifying for credit was disposed of before the end of its estimated useful life, the tax for the year of disposal was increased by the difference between the credit originally allowed and the credit that would have been allowed if the computation had been on a shorter useful life.

Unless a credit was refundable, it could not be applied against this tax.

Taxable income

Taxable income was the amount to which tax rates were usually applied in arriving at income tax before credits. It was determined by subtracting from adjusted gross income itemized deductions or the standard deduction and the number of personal exemptions claimed multiplied by \$600.

For many returns, taxable income had to be derived for the statistics because Schedule T, on which taxable income was shown, did not always have to be filed with the return.

Taxpayments

These payments were, in effect, made before the return was filed and were applied against tax liability to determine the amount payable. They included the following:

(1) Income tax withheld (including excess social security taxes withheld),

- (2) Refundable credits, and
 - (3) Payments on 1969 declarations of estimated tax.
- Taxpayments in excess of total tax were refundable. Each of the above is described under separate heading.

Tax savings due to income averaging

In this report the amount of tax savings is the difference between the tax resulting from the income averaging computation, usually shown on Schedule G, and the amount of tax that would result if the income averaging provisions were not used.

Tax withheld

See "Income tax withheld."

Ten Percent Standard Deduction

See "Standard deduction."

Tentative credit

See "Retirement income credit."

Total deductions

This classification included personal deductions, both standard and itemized.

Total tax liability

Total tax liability was the sum of:

- (1) Income tax after credits (including surcharge).
- plus
- (2) Self-employment tax, plus
 - (3) Tax from recomputing prior year investment credit.

We've combined Forms 1040 and 1040A:

There are nearly 75 million people who file income tax returns. They have different kinds of income, different kinds of deductions, credits, and exclusions. No one form can possibly suit all of them. That's why we have developed a new return system that takes the place of both the old Form 1040 and the old Form 1040A. It is a building-block system. You start with a basic one-page form (still called Form 1040). Nearly half of the taxpayers will need no other forms. The other half will add special schedules or forms only as they need them.

Attach Copy B of Form W-2 here.

How to Prepare Your Return

- Fill out the new Form 1040—whether or not you need to attach any schedules. Usually you can file a complete return on the one-page form, if:
 - All your income was from wages, dividends (not more than \$100), and interest (not more than \$100), AND you have no adjustments for:
 - Sick pay
 - Moving expenses
 - Employee business expenses
 - Payments as a self-employed person to a retirement plan, AND
 - You do not itemize deductions.
- Add the following schedule(s) as required—
 1. Schedule A if you:
 - Itemize deductions.
 2. Schedule B if you:
 - Have gross dividends and other distributions on stock in excess of \$100.
 - Have interest income in excess of \$100.
 3. Schedule C if you:
 - Have income (or loss) from a business (other than a farm) to include in line 14.
 4. Schedule D if you:
 - Have gains (or loss) from sales or exchanges of property to include in line 14.
 5. Schedule E if you have income from: (To include in line 14.)
 - Pensions or annuities
 - Rents or royalties,
 - Partnerships, estates or trusts, small business corporations, or miscellaneous sources.
 6. Schedule F if you:
 - Have farm income (or loss) to include in line 14.
 7. Schedule G if you:
 - Claim the benefits of income averaging.
 8. Schedule R if you:
 - Claim a retirement income credit.
 9. Schedule SE if you:
 - Report net earnings from self-employment.
 10. Schedule T if you:
 - Are subject to self-employment tax,
 - Are subject to tax from recomputing prior year investment credit,
 - Claim a retirement income credit
 - Claim investment credit
 - Claim foreign tax credit.

Income adjustments—

Line 15b.—Your income can be reduced by the following adjustments:

- Sick pay (attach Form 2440)
- Moving Expenses (attach Form 3903)
- Employee business expenses (attach Form 2106)
- Payments to self-employment retirement plans (attach Form 2950SE).

Rules for IRS computation of tax—

If line 15a is under \$5,000 and consisted only of wages subject to withholding and not more than \$200 of dividends, interest, and nonwithheld wages, and you are not claiming any adjustments on line 15b, you can have IRS figure your tax by omitting lines 16, 17, 18, 20, 21, 22, 23, 24, 25, and 26 (but complete line 19). If you are filing a joint return, show husband's income and wife's income separately in the space to the right of line 15c. Identify husband's income by marking (H) and wife's income by marking (W).

Note: If the IRS figures your tax and surcharge, the law does not permit the IRS to allow you the benefits of: (1) the retirement income credit, (2) head of household or surviving spouse status, and (3) minimum standard deduction, if you are married and filing a separate return. If you are entitled to any of these benefits, it is to your advantage to figure your own tax and surcharge.

Department of the Treasury
Internal Revenue Service

Itemized Deductions

- ▶ See instructions on A-1 and A-2.
- ▶ If you use this schedule, attach it to Form 1040.

1969

Name as shown on Form 1040

Social Security Number

Medical and dental expenses (not compensated by insurance or otherwise) for medicine and drugs, doctors, dentists, nurses, hospital care, insurance premiums for medical care, etc.

- 1 One half of insurance premiums for medical care (but not more than \$150)
- 2 Medicine and drugs
- 3 Enter 1% of line 15c, Form 1040
- 4 Subtract line 3 from line 2. Enter difference (if less than zero, enter zero)
- 5 Itemize other medical and dental expenses (include balance of insurance premiums for medical care not deducted on line 1)

Contributions.—Cash—including checks, money orders, etc. (itemize)

- 11 Total cash contributions
- 12 Other than cash (see instructions on A-1 for required statement). Enter total for such items here
- 13 Carryover from prior years (see instructions on A-2)
- 14 Total contributions (add lines 11, 12, and 13—see instructions on A-2 for limitation) ▶

Interest expense—Home mortgage
Installment purchases
Other (itemize)

15 Total interest expense ▶

Miscellaneous deductions for child care, alimony, union dues, casualty losses, etc. (see instructions on A-2)

16 Total miscellaneous deductions ▶

17 TOTAL ITEMIZED DEDUCTIONS (add lines 9, 10, 14, 15, and 16—enter

- 6 Total (add lines 4 and 5)
- 7 Enter 3% of line 15c, Form 1040
- 8 Subtract line 7 from line 6. Enter difference (if less than zero, enter zero)
- 9 Total deductible medical and dental expenses (add lines 1 and 8) ▶

Taxes.—Real estate
State and local gasoline
General sales (see sales tax tables)
State and local income
Personal property

Instructions for Schedule A (Form 1040)—1969

Itemized vs. Standard Deduction.—Deductions may be itemized for medical and dental expenses, certain taxes, charitable and other contributions, interest expense, casualty losses, child care, and other items described here. If you take the standard deduction, you will get an amount equal to 10 percent of the income you report on line 15c of Form 1040, but not less than \$200 plus \$100 for each exemption claimed on line 10 of Form 1040 (subtract \$100 if married and filing separately). The maximum standard deduction is \$1,000 (\$500 if married and filing separately).

Medical and Dental Expenses

You can deduct, within the limits of lines 1, 3 and 7, the amounts you paid during the year (not compensated by hospital, health or accident insurance, or otherwise) for medical or dental expenses for yourself, your wife, or any dependent who received over half of his support from you whether or not the dependent had \$600 or more income.

If you pay someone for both nursing and domestic duties, you can deduct only the nursing cost.

You Can Deduct Payments To or For.—Physicians, dentists, nurses, and other professional practitioners; drugs or medicines; hospitals; transportation necessary to get medical care; eyeglasses, artificial teeth, medical or surgical appliances, braces, etc.; X-ray examinations or treatment; premiums on hospital or

medical insurance; and meals and lodging if part of cost of care in a hospital or similar institution.

You Cannot Deduct Payments For.—Funeral expenses and cemetery plot; illegal operations or drugs; travel ordered or suggested by your doctor for rest or change; premiums on life insurance; cosmetics.

Medical Care Insurance.—You can deduct an amount equal to one-half of the insurance premiums paid (but not more than \$150) without regard to the limitation on line 7. The other one-half, plus any excess over the \$150 limit, is deductible subject to the 3 percent limitation shown on line 7. The \$4 monthly payments for supplementary medical insurance under "Medicare" are deductible, but the hospital insurance benefits tax that is included as part of the social security tax and withheld from wages or paid on self-employment income is not deductible.

The 1 percent and 3 percent limitations (see lines 3 and 7) apply in all cases, regardless of your age, or the age of your wife or other dependents.

Taxes

You can deduct general State or local retail sales taxes if they are imposed directly upon the consumer, or if they are imposed on the retailer (or wholesaler in case of gasoline taxes) and the amount of the tax is separately stated by the retailer. In certain cases, you may also deduct State or local selective sales

or excise taxes, even though not part of a general sales tax (or tax similar to a general sales tax), if imposed at the general rate of that tax. Average general sales tax tables are provided.

If the amount you paid for your automobile tags is based on the value of the automobile, you can deduct the part based on the value of the automobile as personal property tax.

If you had any other deductible tax which does not fall in one of the five categories shown, describe the tax and enter below "Personal property."

Deduct business Federal taxes, or any taxes paid in connection with a business or profession in Schedules C, E, or F.

You Can Deduct.—Real estate taxes; State and local gasoline taxes; general sales taxes; State and local income taxes; and personal property taxes.

You Cannot Deduct.—Any Federal excise taxes on your personal expenditures, such as taxes on transportation, telephone, gasoline, etc.; Federal social security taxes; hunting licenses, dog licenses; auto inspection fees, tags, drivers licenses; water taxes; taxes you paid for another person; alcoholic beverage, cigarette, and tobacco taxes; or selective sales or excise taxes (such as those on admissions, room occupancy, etc.) even if they are separately stated or imposed on the purchaser, unless imposed at the same rate as the general sales tax.

In general, you cannot deduct taxes assessed for pavements or other improvements, including front-foot benefits, which tend to increase the value of your property.

State Gasoline Tax Table

You may figure the deduction for State tax on gasoline used in your car by using the following table that is based on information available as of August 15, 1969. If all or part of your mileage was driven in a four-cylinder (or less) car, the deduction for that mileage should be one-half of the table amount.

If you can establish that you paid a larger amount, you are entitled to deduct that amount. Find the rate of gasoline tax for your State in the list below. If the rate of gasoline tax changed in 1969, find the deduction for mileage driven at each rate, and add the two amounts.

8,000 to 8,499.....	29	35	38	41	44	47	53								
8,500 to 8,999.....	31	38	41	44	47	50	56								
9,000 to 9,499.....	33	40	43	46	50	53	59								
9,500 to 9,999.....	35	42	45	49	52	56	63								

* For over 20,000 miles, use table amounts corresponding to total mileage driven. For example, for 25,000 miles, add the deduction for 5,000 to the deduction for 20,000 miles.

Contributions

You Can Deduct Gifts to.—(a) Religious, charitable, educational, scientific or literary organizations, and organizations for the prevention of cruelty to children or animals, unless the organization is operated for personal profit, or a substantial part of its activities consists of propaganda or attempting to influence legislation.

(b) Fraternal organizations if the gifts are

to be used for charitable, religious, etc., purposes.

(c) Certain veterans' organizations.

(d) Governmental agencies that will use the gifts exclusively for public purposes, including civil defense.

Civil defense volunteers may deduct unreimbursed expenses paid for gasoline and other expenses of participation in official civil defense activities.

A contribution may be made in cash (checks, money orders, etc.) or property (not

services). If in property, give description of the property, date of gift, and method of valuation except for securities. In addition, for each gift valued at more than \$200, state any conditions attached to the gift; manner of acquisition and cost or other basis if owned by you less than 5 years; and attach a signed copy of appraisal, if any. Publication 561, Valuation of Donated Property, furnishes information and guidelines relative to appraisals (Continued on A-2)

A-1

Instructions for Schedule B (Form 1040)—1969

Part I

Dividend Income

Line 1—Gross Dividends and Other Distributions on Stock.—If you own stock, you must report any payments (dividends) you receive out of the company's earnings and profits. Usually dividends are paid in cash, but if paid in merchandise or other property they are taxable at their fair market value.

If you received gross dividends and other distributions as a stockholder (including capital gain dividends and nontaxable distributions) in excess of \$100, list in line 1, Part I, Schedule B the gross amounts received. If \$100 or less, Schedule B is not required. Include gross amounts received either directly or through a nominee or other intermediary, as a member of a partnership or as a beneficiary of an estate or trust. If you received dividends through a nominee or other intermediary, list his name.

Dividends from mutual insurance companies which are a reduction of premiums are not to be included. So-called "dividends" paid by savings and loan associations, mutual savings banks, cooperative banks, and credit unions on deposits or withdrawable accounts are earnings (interest) and should be reported as interest.

Special rules apply to stock dividends, liquidations, stock rights, conversions and redemptions. They are discussed in Publication 550, Tax Information on Investment Income and Expenses.

Line 3—Capital Gain Distributions.—Enter on this line all capital gain dividends. Also include any amounts received as return of capital which exceed the cost (or other basis) of your stock,

even though such amounts are designated as nontaxable distributions by the paying corporations. The amounts included on this line must also be included in line 1, Part I, Schedule B, and reported on the appropriate lines of separate Schedule D.

Line 4—Nontaxable Distributions.—Enter on this line the total of nontaxable distributions (return of capital) not included in line 3. Amounts reported here cannot exceed the cost (or other basis) of your stock in paying corporations since amounts received in excess of cost (or other basis) are taxable as gains and must be reported on separate Schedule D as indicated in line 3, above. Any amount entered on line 4 must also be included in line 1, Part I, Schedule B.

Dividends Exclusion

You may exclude on Form 1040, line 12b, up to \$100 of dividends received from qualifying domestic corporations.

If a joint return is filed and both husband and wife have dividend income, each may exclude up to \$100 of dividends received from qualifying corporations. However, neither of them may use any portion of the \$100 exclusion not used by the other. For example, if the husband had \$300 in dividends, and the wife had \$20, only \$120 may be excluded.

Taxable dividends from the following corporations do not qualify for the dividends received exclusion:

- (a) Foreign corporations, including your share from a controlled foreign corporation.
- (b) So-called exempt organizations (charitable, fraternal, etc.) and exempt farmers' cooperative organizations.
- (c) Regulated investment companies except to the extent designated by the company to be taken into account as a dividend for these purposes.

- (d) Real estate investment trusts.
- (e) China Trade Act corporations.

(f) Corporations deriving 80 percent or more of their income from U.S. possessions and 50 percent or more of their income from the active conduct of a business therein.

Part II

Interest Income

You must report any interest you received or which was credited to your account (whether entered in your pass-book or not) and which you can withdraw. If you received interest in excess of \$100, list payers and amounts in Part II, Schedule B. Interest on bonds, debentures, notes, savings accounts, or loans is taxable, except on State and municipal bonds and securities. Interest received on tax refunds is taxable and must be included in your return.

If you own United States Savings bonds, the gradual increase in value of each bond is interest, but you need not report this interest until you cash the bond or until the year of final maturity, whichever is earlier. You may at any time elect to report each year the annual increase in value. However, if you do so, you must report in the first year the entire increase to date on all such bonds, and must continue to report the annual increase each year.

Interest on certain industrial development bonds issued after April 30, 1968, is taxable unless the bonds are part of an issue of \$1,000,000 or less and substantially all the proceeds are used (1) to acquire, construct, reconstruct or improve land or depreciable property or (2) to redeem all or part of a prior bond issue that was issued to acquire, construct, reconstruct or improve land or depreciable property. For bonds issued after October 24, 1968, a \$5,000,000 tax-exempt limitation may be applied in certain situations. The bond issuer will be able to tell you if the increased limitation applies.

SCHEDULE D (Form 1040) Department of the Treasury Internal Revenue Service

Sales or Exchanges of Property

See instructions on D-1 and D-2. If you use this schedule, attach it to Form 1040.

1969

Name as shown on Form 1040

Social Security Number

Part I—CAPITAL ASSETS—Short-term capital gains and losses—assets held not more than 6 months

Table with 9 columns: a. Kind of property, b. Description, c. How acquired, d. Date acquired, e. Date sold, f. Gross sales price, g. Depreciation allowed, h. Cost or other basis, i. Gain or loss. Includes summary rows 2-4.

Long-term capital gains and losses—assets held more than 6 months (12 months or more for certain livestock)

Table with 9 columns: a. Kind of property, b. Description, c. How acquired, d. Date acquired, e. Date sold, f. Gross sales price, g. Depreciation allowed, h. Cost or other basis, i. Gain or loss. Includes summary rows 5-13.

Part II—GAIN FROM DISPOSITION OF DEPRECIABLE PROPERTY UNDER SECTIONS 1245 AND 1250—assets held more than 6 months

Table with 6 columns: a. Kind of property and how acquired, b. Date acquired, c. Date sold, d. Gross sales price, e. Cost or other basis, f. Depreciation allowed, g. Adjusted basis, h. Total gain, i. Ordinary gain, j. Other gain. Includes summary rows 2-3.

Part III—PROPERTY OTHER THAN CAPITAL ASSETS

Table with 7 columns: a. Kind of property and how acquired, b. Date acquired, c. Date sold, d. Gross sales price, e. Depreciation allowed, f. Cost or other basis, g. Gain or loss. Includes lines 1 and 2 for reporting gains and losses.

Part IV—TOTAL GAINS OR LOSSES FROM SALE OR EXCHANGE OF PROPERTY

Table with 2 columns for reporting total gains and losses. Includes lines 1, 2, 3, and 4 for net gain and total net gain.

COMPUTATION OF ALTERNATIVE TAX—It will usually be to your advantage to use the alternative tax if the net long-term capital gain exceeds the net short-term capital loss, or if there is a net long-term capital gain only, and you are filing (a) a separate return with taxable income exceeding \$25,000, or (b) a joint return, or as a surviving husband or wife, with taxable income exceeding \$52,000, or (c) as a head of household with taxable income exceeding \$38,000.

Table for alternative tax computation with 5 rows and 2 columns. Includes lines 1 through 6 for calculating the alternative tax amount.

INSTRUCTIONS (References are to the Internal Revenue Code)

GAINS AND LOSSES FROM SALES OR EXCHANGES OF PROPERTY.—Report details in appropriate part or parts.

In column (c) of Part I and column (a) of Parts II and III use the following symbols to indicate how the property was acquired: "A" for purchase on the open market; "B" for exercise of stock option or through employee stock purchase plan; "C" for inheritance or gift; "D" for exchange involving carryover of prior asset basis; and "E" for other.

"Capital assets" defined.—The term "capital assets" means property held by the taxpayer (whether or not connected with his trade or business) but does NOT include—

- (a) stock in trade or other property of a kind properly includible in his inventory if on hand at the close of the taxable year;
(b) property held by the taxpayer primarily for sale to customers in the ordinary course of his trade or business;
(c) property used in the trade or business of a character which is subject to the allowance for depreciation provided in section 167;
(d) real property used in the trade or business of the taxpayer;
(e) certain government obligations issued on or after March 1, 1941, at a discount, payable without interest and maturing at a fixed date not exceeding 1 year from date of issue;
(f) certain copyrights, literary, musical, or artistic compositions, etc.; or
(g) accounts and notes receivable acquired in the ordinary course of trade or business for services rendered or from the sale of property referred to in (a) or (b) above.

Special rules apply to dealers in securities for determining capital gain or ordinary loss on the sale or exchange of securities. Certain real property subdivided for sale may be treated as capital assets. Sections 1256 and 1237.

If the total distributions to which an employee is entitled under an employees' pension, bonus, or profit-sharing trust plan, which is exempt from tax under section 501(a), are paid to the employee in one taxable year, on account of the employee's separation from service, the aggregate amount of such distribution, to the extent it exceeds the amounts contributed by the employee, shall be treated as a long-term capital gain. (See section 402(a).)

Gain on sale of depreciable property between husband and wife or between a shareholder and a "controlled corporation" shall be treated as ordinary gain.

Gains and losses from transactions described in section 1231 shall be treated as gains and losses from the sale or exchange of capital assets held for more than 6 months if the total of these gains exceeds the total of these losses. If the total of these gains does not exceed the total of these losses, they shall be treated as ordinary gains and losses.

total of these losses, such gains and losses shall not be treated as gains and losses from the sale or exchange of capital assets. Thus, in the event of a net gain, all these transactions should be entered in Part I of Schedule D. In the event of a net loss, all these transactions should be entered in Part III of Schedule D, or in other applicable schedules on Form 1040.

Section 1231 deals with gains and losses arising from—

- (a) sale, exchange, or involuntary conversion, of land (including in certain cases unharvested crops sold with the land) and depreciable property if they are used in the trade or business and held for more than 6 months.
(b) sale, exchange, or involuntary conversion of livestock held for draft, breeding, or dairy purposes (but not including poultry) and held for 1 year or more.
(c) the cutting of timber or the disposal of timber, coal, or domestic iron ore, to which section 631 applies, and
(d) the involuntary conversion of capital assets held more than 6 months.

See sections 1231 and 631 for specific conditions applicable.

Gain from disposition of depreciable property under sections 1245 and 1250—assets held more than 6 months (Part II).—(Report any gain from such property held for 6 months or less in Part III.) Except as provided below section 1245 property means depreciable (a) personal property (other than livestock) including intangible personal property; (b) tangible real property (except for buildings and their structural components) if used as an integral part of manufacturing, production, or extraction, or of furnishing transportation, communications, electrical energy, gas, water, or sewage disposal services, or used as a research or storage facility in connection with these activities; and (c) elevators and escalators.

Except as provided below section 1250 property means depreciable real property (other than section 1245 property).

See sections 1245(b) and 1250(d) for exceptions and limitations involving: (a) disposition by gift; (b) transfers at death; (c) certain tax-free transactions; (d) like kind exchanges, involuntary conversions; (e) sales or exchanges to effectuate FCC policies and exchanges to comply with S.E.C. orders; (f) property distributed by a partnership to a partner; and (g) disposition of principal residence (section 1250 only).

Column f of Part II.—In computing depreciation allowed or allowable for elevators or escalators, enter in column f-1 depreciation prior to July 1, 1963, and in column f-2 depreciation after June 30, 1963.

(Instructions continued on D-2)

Instructions for Schedule E (Form 1040)

Publication 541, Tax information on Partnership Income and Losses.

Part I.—Pensions and Annuities

Amounts received from annuities, pensions, endowments, or life insurance contracts, whether paid for a fixed number of years or for life, may have a portion of the payment excluded from income. The following types come under this rule: (a) pensions where the employee has either contributed to its cost or has been taxed on his employer's contributions, and (b) amounts paid for a reason other than the death of the insured under an annuity, endowment, or life insurance contract.

General Rule for Annuities.—Generally, amounts received from annuities and pensions are included in income in an amount which is figured upon your life expectancy. This computation and your life expectancy multiple can be found in the regulations covering annuities and pensions. Once you have obtained the multiple it remains unchanged. It is not necessary to recompute your excludable portion each year. In making this computation you can get help from the Internal Revenue Service as well as from some employers and insurance companies.

Special Rule for Certain Types of Employees' Annuities.—A special rule applies for amounts received as employees' annuities if part of the cost is contributed by the employer and if the amount contributed by the employee will be returned within three years from the date of the first payment received under the contract,

such as taxes, interest, repairs, insurance, agent's commissions, maintenance, and similar items. However, you cannot deduct capital investments or improvements, but must add them to the basis of the property for the purpose of depreciation. For example, a landlord can deduct the cost of minor repairs, but not the cost of major improvements such as a new roof or remodeling. You cannot deduct the value of your own labor.

If You Rent Part of Your House.—If you rent out only part of your property, you can deduct only that portion of your expenses which relates to the rented part. If you cannot determine these expenses exactly, you may figure them on a proportionate basis. For example, if you rent out half of your home and live in the other half, you can deduct only half of the depreciation and other expenses.

Do not report in column 2, Part II, Schedule E, room and other space rentals for which you rendered service to the occupant. Report the rentals received in separate Schedule C. If you are engaged in the business of selling real estate, you should also report rentals received in separate Schedule C.

Royalties.—Report in column 3 royalties from oil, gas or mineral properties, and royalties from copyrights and patents. However, if you hold an operating oil, gas, or mineral interest, report gross income and expenses in separate Schedule C. Under certain circumstances,

Small Business Corporations.—If you are a shareholder in a small business corporation which elects to have its current taxable income taxed to its stockholders, you should report your share of both the distributed and undistributed current taxable income as ordinary income in Part III, Schedule E, except that portion which is reportable in separate Schedule D as a long-term capital gain. Neither type of income is eligible for the dividends exclusion. Shareholders claiming a deduction for a net operating loss must attach to their return a computation of the adjusted basis of their stock in the corporation and the adjusted basis of any indebtedness of the corporation to the shareholders. See sections 1374 and 1376 and the regulations thereunder for limitation on deduction and required adjustments.

Estates and Trusts.—If you are a beneficiary of an estate or trust, report your taxable portion of its income, whether you receive it or not. You should enter your share of income of the following classes on the appropriate lines and schedules of your return:

Dividends from qualifying domestic corporations.

Gains from the sale or exchange of capital assets and certain other property.

You should include all other taxable income from estates and trusts in this Part. Any depreciation which is allocable to you on estate or trust property may be subtracted from estate

Farm Income and Expenses
(Compute social security self-employment tax on Schedule SE)

1969

See separate instructions.
If you use this schedule, attach it to Form 1040.

SCHEDULE G (Form 1040) Department of the Treasury Internal Revenue Service

Income Averaging

See instructions on pages 3 and 4. If you use this schedule, attach it to Form 1040.

1969

Name as shown on Form 1040

Social security number

PART I.—TAXABLE INCOME AND ADJUSTMENTS

Table with 5 columns: (a) Computation year 1969, (b) 1st preceding base period year 1968, (c) 2d preceding base period year 1967, (d) 3d preceding base period year 1966, (e) 4th preceding base period year 1965. Rows include Taxable income, Income earned outside of the United States, Capital gain net income, Net income from gifts, Net income from wagering, and Adjusted taxable income.

PART II.—COMPUTATION OF AVERAGABLE INCOME

Table with 4 rows: 1 Adjusted taxable income (line 7, column (a), Part I), 2 33 1/3% of the sum of line 7, columns (b), (c), (d), and (e), Part I, 3 (a) 25% of the sum of line 3, columns (b), (c), (d), and (e), Part I, (b) Amount from line 3, column (a), Part I, (c) If line 3(a) is more than line 3(b), enter difference—if not, make no entry, 4 Averagable income (line 1 less lines 2 and 3(c)).

COMPLETE THE REMAINING PARTS OF THIS FORM ONLY IF LINE 4 IS MORE THAN \$3,000. IF \$3,000 OR LESS, YOU DO NOT QUALIFY FOR INCOME AVERAGING. DO NOT FILL IN REST OF FORM.

PART III.—SEGMENTS OF INCOME UNDER AVERAGING

Table with 6 rows: 1 Amount from line 2, Part II, 2 Amount from line 3(a), Part II, 3 20% of line 4, Part II, 4 Sum of lines 4 and 5, column (a), Part I, less any income subject to a penalty under section 72(m)(5) which was included in line 5, Part I, 5 If line 3(b) is more than line 3(a), Part II, enter difference—if not, make no entry, 6 Total (sum of lines 1 through 5).

PART IV.—COMPUTATION OF TAX

Table with 9 rows: 1 Tax on the amount on line 6, Part III, 2 Sum of lines 1, 2, and 3, Part III, 3 Tax on amount on line 2, 4 Sum of lines 1 and 2, Part III, 5 Tax on amount on line 4, 6 Difference (line 3 less line 5), 7 Multiply the amount on line 6 by 4, 8 Total (add lines 1 and 7), 9 Tax on income subject to the penalty under section 72(m)(5) which was included in line 5, Part I, 10 Tax (add lines 8 and 9). Enter here and on Schedule T, line 6 if you are not using the alternative tax computation in Part V. Also check Schedule G box on Form 1040, line 18.

PART V.—COMPUTATION OF ALTERNATIVE TAX

1	Amount from line 10, Part IV		
2	Amount from line 5, Part IV		
3	(a) Amount from line 2, Part II		
	(b) Amount from line 3(c), Part II		
	(c) Sum of lines 3(a) and 3(b)		
4	Tax on amount on line 3(c)		
5	Difference (line 2 less line 4)		
6	Amount from line 1, Part IV		
7	Sum of lines 1, 2, 3, and 4, Part III		
8	Tax on amount on line 7		
9	Difference (line 6 less line 8)		
10	Sum of lines 5 and 9		
11	Amount from line 3, column (a), Part I		
12	50% of line 11		
13	If line 10 is more than line 12, enter difference—otherwise alternative tax does not apply		
14	Alternative tax (line 1 less line 13). Enter here and on Schedule T, line 6. Also check Schedule G box on Form 1040, line 18.		

Use this space for additional information such as determining base period income in accordance with General Instruction C or itemizing of line 5, Part I, etc.

This schedule must be attached to your Form 1040 to choose the benefits of income averaging. Only individuals who are citizens or residents of the United States throughout 1969 are eligible for averaging. Corporations, estates and trusts do not qualify. The income averaging method of computing tax may be to your advantage if your income has increased substantially this year. Under this method your 1969 income which exceeds by one-third the income of your four prior years (1965-1968) is taxed, in effect, by averaging that excess over the five-year period (1965-1969). Basically, the taxable income for each year is the figure utilized. However, since capital gains, wagering income, certain income from gifts, etc., are not subject to averaging, adjustments to the taxable income, as it appears on Form 1040 for each year, are necessary.

A. WHO MAY FILE.—Generally, you may choose the provisions of income averaging for 1969, by filing Schedule G with your Form 1040 if you meet the requirements of (1) citizenship or residence, and (2) support. On a joint return both husband and wife must meet the requirements.

(1) **Citizenship or residence requirement.**—You must have been a citizen or resident of the United States throughout 1969. A nonresident alien at any time during the five taxable year period ending with 1969 is not eligible.

(2) **Support requirement.**—You must have furnished at least 50 percent of your own support for each of the years 1965 through 1968. In a year in which you were married it is only necessary that you together with your wife provided at least 50 percent of the support of both of you. For definition of support see Form 1040 Instructions on B-2.

Exceptions. The support requirement is waived if—

(1) You were age 25 or more before the end of 1969 and you were not a full-time student during at least any four of your taxable years beginning after you have attained the age of 21. Thus, generally, if you are age 25 or over and have been out of school for 4 years since age 21, you are eligible for averaging. You are a student for a taxable year if during 5 calendar months of that year you were a full-time student at an educational institution or were pursuing a full-time course of institutional on-farm training under the supervision of an accredited agent of an educational institution or of a State or political subdivision of a State.

(2) More than 50 percent of your adjusted taxable income for 1969 (line 7, column (a), Part I) is attributable to work performed by you in substantial part during two or more of the four taxable years preceding 1969, or

(3) You file a joint return for 1969 and not more than 25 percent of the aggregate adjusted gross income (Form 1040, line 15c) is attributable to you.

B. PROVISIONS INAPPLICABLE.—If you file Schedule G you may not—

(1) Exclude from income any part of your earned income from sources without the United States (see section 911 and Form 2555) or any income from sources within possessions of the United States (see sections 931-934 and Form 4563).

(2) Use the tax tables on T-2 and T-3, of the Form 1040 instructions. You may, however, use the standard deduction.

(3) Avail yourself of the limitation on tax under section 72(n) (2) for income resulting from certain distributions from an employees' trust.

C. BASE PERIOD INCOME RULES.—Your base period income for each of your base period years (1965-1968) must be determined in a manner consistent with your return for 1969. If you make a separate return for 1969, you must determine your separate base period income for each of your base period years. If a husband and wife make a joint return for 1969, they must determine the sum of their separate base period incomes for each base period year. Thus, if you and your wife make a joint return for 1969 and were married and made joint returns with each other for any base period year, your base period income for each such year is to be figured on the basis of your aggregate taxable income for that year. If you make a return for 1969 as a surviving widow(er) (under section 2(b)), your base period income for each of the base period years (1965-1968) is the sum of your base period income and that of your deceased husband (wife) for each such year. If a husband and wife married in 1969 and make a

joint return for 1969, and neither person was married from 1965 through 1968, their base period incomes for each of those years is the sum of the husband's separate base period income and that of his wife for each such year.

In some cases the computation of your separate base period income for a base period year may require as many as three computations. The facts in each case determine how many computations are necessary. For instance, if you were married for 1969 and made a joint return with your wife (husband), but had a different wife (husband) for 1969 than for a base period year, two computations are necessary. In such case, your separate base period income for the year in question is the larger of the following amounts:

(1) The amount of your adjusted separate income and deductions for the base period year.

(2) One-half the total amount of base period income resulting from adding your adjusted separate income and deductions to the adjusted separate income and deductions of your wife (husband) for that base period year.

However, if you and your wife file separate returns for 1969, a third computation is necessary: Your separate base period income will be the largest of the amounts determined under (1) and (2) above and:

(3) One-half the total amount of the base period income resulting from adding your adjusted separate income and deductions to the adjusted separate income and deductions of your wife (husband) for 1969 for that base period year.

The amount of your separate income and deductions for a base period year is the excess of your gross income for that year over your allowable deductions. Your separate deductions for any base period year for which you made a separate return are the deductions allowable on that return. If you made a joint return for a base period year, your separate deductions are (1) in the case of deductions allowable in computing your adjusted gross income, the sum of such deductions attributable to your gross income, and (2) in the case of deductions allowable in computing taxable income (exemptions and itemized deductions), the amount resulting from multiplying the amount of such deductions allowable on the joint return by a fraction whose numerator is your adjusted gross income and whose denominator is the aggregate adjusted gross income on the joint return. However, if 85 percent or more of the aggregate adjusted gross income of a husband and wife is attributable to either one, all of the deductions allowable in computing taxable income are allowable to the one to whom such income is attributable. See specific instruction 1, under Part I, on adjusted gross income.

In computing your separate base period income when community property laws are applicable, you must take into account all of the earned income you earned, without regard to the community property laws, or your share of the community earned income under the community property laws, whichever is greater.

If you must determine your separate base period income for any of the base period years, show the computation and give names under which the returns were filed in the space provided on page 2. If additional space is needed show your computation on an attachment. An example illustrating such computation follows:

H and W are calendar year taxpayers who were married and otherwise eligible to choose the benefits of income averaging for the taxable year 1969 for which they made a joint return. W, however, was married to and made a joint return with A for the taxable year 1965. H was unmarried for 1965. H and W compute their base period income for 1965 in the following manner:

	A & W (Joint Return)		A	W	H
Salary		\$16,000	\$11,500	\$4,500	\$3,000
Dividends		2,000	500	1,500	1,000
Adjusted Gross Income		\$18,000	\$12,000	\$6,000	\$4,000
Total of itemized deductions and personal exemptions		3,600	2,400	1,200 (1)	1,600
Taxable Income (Separate Income and Deductions)		\$14,400	\$9,600	\$4,800	\$2,400

(1) 6000 (W's separate adjusted gross income) × 3600 (Total of itemized deductions and personal exemptions on A & W's joint return) = 1200
 18000 (A and W's adjusted gross income from joint return)

Method No. 1 W's separate income and deductions

4,000

SPECIFIC INSTRUCTIONS

The following instructions are numbered to correspond with the line numbers in each part of the form.

Part I

1 Except as noted below, enter on this line the amount (never less than zero) from—

- (a) Schedule T (1969)—line 5
- (b) Form 1040 (1965-68)—line 11d, page 1
- (c) Form 1040A (1965-68)—line 5, page 4

Tax Computation
Schedule Form
1040A Instructions

For any year for which you use the tax tables to compute your tax, you may arrive at the amount to be entered in line 1, by subtracting from your adjusted gross income (see below) the standard deduction and \$600 multiplied by the number of exemptions. Adjusted gross income is—

- (a) Form 1040 (1969)—line 15c
- (b) Form 1040 (1965-68)—line 9, page 1
- (c) Form 1040A (1965-68)—item 7, page 1

NOTE: If you were not married to and did not file a joint return with the same wife (husband) for every year after 1964, or were not single for all those years, it will be necessary to determine the amount to be entered in columns (b), (c), (d), and (e) in accordance with General Instruction C.

2 Enter on this line for each base period year the net amount of income previously excluded from income because it was earned income derived from sources without the United States or from income within its possessions (sections 911 and 911-914). For 1969 you may not

(b) Income from oil and gas properties. The amount received from the sale of any oil or gas property to which section 632 applies.

(c) Claims against the United States. The amount received from the United States to which section 1347 applies.

(d) Excess Community Income. If you are married, a resident of a community property state, and file a separate return for 1969, you must include in this line the excess of the community earned income reportable by you over the amount of such income attributable to your services. No adjustment need be made where the community earned income attributable to your services exceeds 50 percent of the aggregate community earned income. The following example illustrates this.—

	Attributable to Service of		
	H	W	Total
Community Earned Income	\$40,000	\$20,000	\$60,000

(1) H filing a separate return has no adjustment since the amount of earned income attributable to his services (\$40,000) exceeds 50 percent of the aggregate community earned income (\$60,000).

(2) W filing a separate return must include in the total for this line \$10,000, the excess of the community earned income reportable by her (\$30,000) over the amount of community earned income attributable to her services (\$20,000).

(e) Certain amounts received by owner-employees. The amount of income resulting from a premature or excessive distribution from a qualified employees' pension plan or trust to an employee

**SCHEDULE R
(Form 1040)**

Department of the Treasury
Internal Revenue Service

Retirement Income Credit

➤ See instructions on R-1.

➤ If you use this schedule, attach it to Form 1040.

1969

Name as shown on Form 1040

Social Security Number

A. General Rule.—If separate return, use column B only.
If joint return, use column A for wife and column B for husband.

Did you receive earned income in excess of \$600 in each of any 10 calendar years before 1969?
(Widows or widowers see instructions on R-1)
If answer above is "Yes" in either column, furnish all information below in that column.

	A		B	
	Yes	No	Yes	No
1 Retirement income for taxable year:				
(a) For taxpayers under 65 years of age: Enter only income received from pensions and annuities under public retirement systems (e.g. Fed., State Govts., etc.) included on Form 1040, line 15c				
(b) For taxpayers 65 years of age or older: Enter total of pensions and annuities, interest and dividends included on Form 1040, line 15c, and gross rents from Part II, column 2 of Schedule E				
2 Maximum amount of retirement income for credit computation			\$1,524	00
3 Deduct:				
(a) Amounts received as pensions or annuities under the Social Security Act, the Railroad Retirement Acts (but not supplemental annuities), and certain other exclusions from gross income				
(b) Earned income received (Does not apply to persons 72 years of age or over):				
(1) Taxpayers under 62 years of age, enter amount in excess of \$900				
(2) Taxpayers 62 or over but under 72, enter amount determined as follows:				
if \$1,200 or less, enter zero				
if over \$1,200 but not over \$1,700, enter 1/2 of amount over \$1,200;				
or if, over \$1,700, enter excess over \$1,450				
4 Total of lines 3(a) and 3(b)				
5 Balance (subtract line 4 from line 2)				
6 Line 5 or line 1, whichever is smaller				
7 (a) Total (add amounts on line 6, columns A and B) If line 7(a) is less than \$2,286 and this is a joint return and both husband and wife are age 65 or over, complete the Alternative Computation in B below which may result in a larger credit.				
(b) Amount from line 7 of part B below, if applicable				
8 Tentative credit. Enter 15% of line 7(a) or 15% of line 7(b), whichever is greater				
9 Amount of tax shown on Schedule T, line 6				
10 Credit claimed for foreign taxes or tax-free covenant bonds				
11 Subtract line 10 from line 9 (if less than zero, enter zero)				
12 Enter here and on Schedule T, line 7, the amount on line 11 or line 8, whichever is smaller				
13 Enter here the Tax Surcharge From Schedule T, line 9				
14 Add lines 12 and 13				
15 If line 10 is greater than line 9, enter excess here				
16 Subtract line 15 from line 14 (if less than zero, enter zero)				
17 Credit. Enter here and on Schedule T, line 11, the amount shown on line 16 or line 8, whichever is smaller				

B. Alternative Computation (after completing lines 1 through 7(a) above)

This method available if:

- a. You are married and filing a joint return;
- b. Both husband and wife are 65 or over, AND
- c. Either one, or both received earned income in excess of \$600 in each of any 10 calendar years before 1969.

Furnish the information called for below for both husband and wife even if only one answered "Yes" in column A or B above.

1 Retirement income of both husband and wife from pensions and annuities, interest, and dividends included on Form 1040, line 15c, and gross rents from Part II, column 2 of Schedule E				
2 Maximum amount of retirement income for credit computation			\$2,286	00
3 Deduct:				
(a) Amounts received as pensions or annuities under the Social Security Act, the Railroad Retirement Acts (but not supplemental annuities), and certain other exclusions from gross income				
(b) Earned income received (Does not apply to persons 72 or over):				
if \$1,200 or less, enter zero				
if over \$1,200 but not over \$1,700 enter 1/2 of				
amount over \$1,200; or				
if over \$1,700, enter excess over \$1,450				
4 Total of lines 3(a) and 3(b)				
5 Total (add amounts on line 4, columns A and B)				
6 Balance (subtract line 5 from line 2)				
7 Enter here and on line 7(b) of part A above, the amount on line 6 or line 1, whichever is smaller				

69 091

Instructions for Schedule R (Form 1040)—1969

Retirement Income Credit

You may qualify for this credit, which is generally 15 percent of retirement income, if you received earned income in excess of \$600 in each of any 10 calendar years—not necessarily consecutive—before the beginning of your taxable year.

The maximum amount allowed any one individual as a credit against his income tax is \$228.60 (15% × \$1,524). The maximum allowable credit on a joint return where both husband and wife show \$1,524 on part A, line 6, columns A and B, is \$457.20.

The term "earned income" means wages, salaries, professional fees, etc., received as compensation for personal services actually rendered. It does not include any amount received as an annuity or pension. If you were engaged in a trade or business in which both personal services and capital were material income-producing factors, a reasonable allowance as compensation for the personal services you rendered, not in excess of 30 percent of your share of the net profits of such business, shall be considered as earned income.

Both husband and wife may take the retirement income credit if both qualify and both have retirement income. If you are a surviving widow

(widower) and have not remarried, you may use the earned income of your deceased husband (wife), or you may combine his (her) earned income with yours to determine if you qualify for the credit.

Retirement income for the purpose of the credit means—

(a) In the case of a person who is not 65 before the end of his taxable year, only income received from pensions and annuities under a public retirement system (one established by the Federal government, a State, county, city, etc.) which is included in income in his return.

Disability annuities received by Federal employees prior to normal retirement age that exceed the sick pay exclusion do not qualify as retirement income.

(b) In the case of a person who is 65 or over before the end of his taxable year, income from pensions, annuities, interest, rents and dividends that are included in gross income in his return. (Gross income from rents for this purpose means gross receipts from rents without reduction for depreciation or any other expenses. Royalties are not considered rents for this purpose.)

Except as provided in the "Alternative computation," the amount

of the retirement income used for the credit computation may not exceed \$1,524 reduced by (a) Any amount received and excluded from income as a pension or annuity under the Social Security Act and Railroad Retirement Acts (but not supplemental annuities) and other tax-exempt pensions or annuities. Line 3(a), General Rule and Alternative Computation, must reflect the gross amount of social security benefits before deduction of any amounts withheld to pay medicare insurance premiums. This reduction does not include (1) that part of a pension or annuity which is excluded from income because it represents, in effect, a return of capital or tax-free proceeds of a like nature, or (2) amounts excluded from income received as compensation for injury or sickness or under accident or health plans. (b) Certain adjustments for earned income.

Alternative Computation. — The maximum amount of retirement income to be used in figuring the credit for retirement income is \$2,286 for taxpayers who file joint returns (both 65 years of age or over) but who would otherwise be limited to \$1,524 because either the husband or wife did not have earned income in excess of \$600 in each of any 10 prior calendar years.

If you meet these requirements, also complete the Alternative Computation to determine which computation results in the larger credit.

**SCHEDULE SE
(Form 1040)**

Department of the Treasury
Internal Revenue Service

Computation of Social Security Self-Employment Tax

- ▶ See instructions.
- ▶ If you use this schedule, attach it to Form 1040.

1969

▶ If you had wages, including tips, of \$7,800 or more which were subject to social security taxes, do not fill in this page.
 ▶ If you had more than one business, combine profits (or losses) from all of your businesses and farms on this Schedule SE. Each self-employed person must file a separate Schedule SE on which he should include the total from all businesses and farms.
Important.—The self-employment income reported below will be credited to your social security record and used in figuring social security benefits.

Name of self-employed person (as shown on social security card)	Social Security Number	Check applicable block 1 <input type="checkbox"/> Male 2 <input type="checkbox"/> Female
-----------------------------------------------------------------	------------------------	---------------------------------------------------------------------------------------------

Business activities subject to self-employment tax (grocery store, restaurant, farm, etc.) ▶

Part I Computation of Net Earnings from BUSINESS Self-Employment (other than farming)

1 Net profit (or loss) shown in Schedule C (Form 1040), line 27 (Enter combined amount if more than one business)			
2 Add to net profit (or subtract from net loss) losses of business property shown in Schedule C, line 23			
3 Total (or difference)			
4 Net income (or loss) from excluded services or sources included on line 3 Specify excluded services or sources			
5 Net earnings (or loss) from business self-employment (subtract line 4 from line 3). Enter here and on line 1(a), Part III, below			

Part II Computation of Net Earnings from FARM Self-Employment

A farmer may elect to compute net farm earnings using the **OPTIONAL METHOD** (line 3, below) **INSTEAD OF REGULAR METHOD** (line 2, below), if his gross profits are: (1) \$2,400 or less, or (2) more than \$2,400 and net profits are less than \$1,600. If your gross profits from farming are not more than \$2,400 and you elect to use the optional method, you need not complete lines 1 and 2.

Computation under Regular Method			
1 Net farm profit (or loss) from:			
(a) Schedule F, line 52 (cash method), or line 69 (accrual method)			
(b) Farm partnerships			
2 Net earnings from self-employment from farming. Add lines 1(a) and (b)			
Computation under Optional Method			
3 If gross profits from farming are:			
(a) Not more than \$2,400, enter two-thirds of the gross profits			
(b) More than \$2,400 and the net farm profit is less than \$1,600, enter \$1,600			
<i>*Note.—Gross profits from farming are the total of the gross profits from Schedule F, line 28 (cash method), or line 67 (accrual method), plus the distributive share of gross profit from farm partnerships as explained in Instructions for Schedule SE.</i>			
4 Enter here and on line 1(b), Part III, below, the amount on line 2 (or line 3, if you use the optional method)			

Part III Computation of Social Security Self-Employment Tax

1 Net earnings (or loss) from self-employment—			
(a) From business (other than farming—from line 5, Part I, above)			
(b) From farming (from line 4, Part II, above)			
(c) From partnerships, joint ventures, etc. (other than farming)			
(d) From service as a minister, member of a religious order, or a Christian Science practitioner. If you filed Form 4361, check here <input type="checkbox"/> and enter zero on this line			
(e) From service with a foreign government or international organization			
(f) Other (director's fees, etc.). Specify			
2 Total net earnings (or loss) from self-employment reported on line 1 (If line 2 is under \$400, you are not subject to self-employment tax. Do not fill in rest of page.)			
3 The largest amount of combined wages and self-employment earnings subject to social security tax is		\$7,800	00
4 (a) Total "F.I.C.A." wages as indicated on Form W-2			
(b) Unreported tips, if any, subject to F.I.C.A. tax from Form 4137, line 9			
(c) Total of lines 4(a) and 4(b)			

Instructions for Schedule SE (Form 1040)—1969 (Note: Schedule SE replaces Schedules C-3 and F-1.)

Schedule SE provides the Social Security Administration with the information on self-employment income necessary for computing benefits under the social security program. Self-employment tax must be paid regardless of age and even though the individual is receiving social security benefits.

To assure proper credit to your account, enter your name and social security number on Schedule SE exactly as they are shown on your social security card.

Ministers, members of religious orders, and Christian Science practitioners.—Duly ordained, commissioned, or licensed ministers of churches, members of religious orders (who have not taken a vow of poverty), and Christian Science practitioners are now subject to self-employment tax, but may under certain conditions request to exempt their income from service as a minister, member or practitioner by filing Form 4361. Forms, schedules and publications may be obtained from the District Director. If you previously filed an effective waiver certificate Form 2031 to pay self-employment tax, you may not now file for an exemption. See Publication 484, Social Security for Clergymen.

Ministers and members of religious orders must include in their earnings from self-employment (but not for income tax) the rental value of a parsonage or allowance for the rental value of the parsonage and the value of meals and lodging furnished them for the convenience of their employers.

Members of Certain Religious Faiths.—If you have conscientious objections to social security insurance by virtue of your adherence to the established teachings of a recognized religious sect of which you are a member, you may file Form 4029 to obtain exemption from self-employment tax. If you have filed Form 4029, do not file Schedule SE; however, write, "Exempt-Form 4029" on the back of Form 1040.

U.S. citizens employed by foreign governments or international organizations.—A U.S. citizen employed in the United States, Puerto Rico, Guam, American Samoa, or the Virgin Islands by a foreign government, an instrumentality wholly owned by a foreign government, or an international organization which is organized under the International Organizations Immunities Act, is subject to the social security self-employment tax. Report income from such employment on line 1(e), Part III, of this Schedule.

Fee basis State or local government employees.—Fees received for functions and services performed by employees (including public officers who in such capacity are employees) are subject to self-employment tax if such functions and services are performed in positions which are: (1) compensated solely on a fee basis; and (2) not covered under a Federal-State social security coverage agreement. If you filed Form 4415, write, "Exempt-Form 4415" on the back of Form 1040.

Exclusions

Income (or loss) from the following sources and deductions attributable thereto are not taken into account in figuring net earnings from self-employment. Use Part I, line 4 to exclude any such amounts reported on separate Schedule C that should not be taken into account in figuring your self-employment income. Any item of income or expense which was included in line 2, Part II and which does not enter into the computation of net earnings from farm self-employment should be eliminated from line 2, Part II and an explanation attached.

Employees and public officials.—Income (fees, salaries, etc.) from the performance of service as: (a) a public official (except as noted above); (b) an employee or employee representative under the railroad retirement system; or (c) an employee (except as indicated above).

Note.—Income of an employee or over from the sale of newspapers or magazines to an ultimate consumer is subject to self-employment tax if the income consists of retained profits from such sales.

Certain payments to retired partners.—Income received by a retired partner under a written plan of the partnership which provides for lifelong periodic retirement payments if the retired partner no longer has any interest in the partnership (except for the right to the retirement payments) and did not perform services for the partnership during the year.

Real estate rentals.—Rentals from real estate, except rentals received in the course of a trade or business as a real estate dealer. This includes cash and crop shares received from a tenant or sharefarmer. Report these amounts in separate Schedule E, Part II. However, rental income from a farm is not excluded if the rental arrangement provides for material participation by the landlord and he does participate materially in the production or in the management of the production of one or more farm products on his land. Such income represents farm earnings and should be reported on Schedules F and SE.

Payments for the use or occupancy of rooms or other space where services are also rendered to the occupant, such as rooms in hotels, boarding houses, apartment houses furnishing hotel services, tourist camps or homes, or space in parking lots, warehouses, or storage garages do not constitute rentals from real estate and are included in determining net earnings from self-employment.

Dividends and interest.—Dividends on shares of stock, and interest on bonds, debentures, notes, certificates, or other evidences of indebtedness, issued with interest coupons or in registered form by a corporation, or by a government or political subdivision thereof, unless received in the course of a trade or business as a dealer in stocks or securities.

Property gains and losses.—Gain or loss: (a) from the sale or exchange of a capital asset; (b) to which sections 631 and 1231 are applicable; or (c) from the sale, exchange, involuntary conversion, or other disposition of property if such property is neither (1) stock in trade or other property of a kind which would properly be includible in inventory if on hand at the close of the taxable year, nor (2) property held primarily for sale to customers in the ordinary course of the trade or business. Report on separate Schedule D.

Net operating losses.—No deduction for net operating losses of other years shall be allowed in determining the net earnings from self-employment. Such deduction should be entered as a "minus" figure on Schedule E, Part III, under "Miscellaneous income."

More Than One Trade or Business

If an individual is engaged in farming and in one or more other trades or businesses, his net earnings from self-employment are the combined net earnings from self-employment of all his trades or businesses. Thus, the loss sustained in one trade or business will operate to reduce the income derived from another trade or business. In such cases, use both Schedule F and Schedule C to determine net profit from the farm and nonfarm activities, respectively. Make the combined computation of self-employment tax on Schedule SE.

Joint Returns

For a joint return, show the name of the one with self-employment income on Schedule SE. If both husband and wife have self-employment income, each must file a separate Schedule SE. However, include the total of profits (or loss) from all businesses on Form 1040, line 14, and enter the combined self-employment tax on Schedule T, line 16.

Community Income

For the purpose of computing net earnings from self-employment, if any of the income from a trade or business including farming is community income, all the income from such trade or business is considered the income of the husband. However, if the wife exercises substantially all the management and control of operation, all of such income is considered the income of the wife. (See "Partnerships" below.)

If separate returns are filed, Schedules C and SE or Schedules F and SE must be attached to the return of the one with self-employment income. Community income included on such schedules must, however, be allocated for income tax purposes on the basis of the community property laws.

Partnerships

In computing his combined net earnings from self-employment, a partner should include his entire share of such earnings from a partnership including any guaranteed payments. No part of that share may be allocated to the partner's wife (or husband) even though the income may, under State law, be community income. However, in the case of a husband and wife farm partnership, like other partnerships, the distributive share of each must be entered as partnership income in separate Schedule E, Part III for income tax purposes, and on Schedule SE, Part II, line 1(b) for self-employment tax purposes. (Report nonfarm partnership income on Part III, line 1(c) for social security purposes.)

Note.—If a member of a continuing partnership dies, a portion of the deceased partner's distributive share of the partnership's ordinary income (or loss) for the taxable year of the partnership in which he died must be included in the partner's net earnings from self-employment.

Optional Method for Computing Net Earnings From Farm Self-Employment

If a farmer's gross profits for the year from farming are not more than \$2,400 he may report two-thirds of his gross profits from farming instead of his actual net earnings from farming. If his gross profits from farm self-employment are more than \$2,400 and his actual net earnings from farming are less than \$1,600, he may report \$1,600. For the optional method, a partner should compute his share of gross profits from a farm partnership in accordance with the partnership agreement. In the case of guaranteed payments, his share of the partnership's gross profits is his guaranteed payments plus his share of the gross profits after such gross profits are reduced by all guaranteed payments of the partnership.

Share-Farming Arrangements

An individual who undertakes to produce a crop or livestock on land belonging to another for a proportionate share of the crop or livestock produced, or the proceeds thereof, is considered to be an independent contractor and a self-employed person rather than an employee. His net earnings should be reported on Schedule F for income tax and on Schedule SE for self-employment tax purposes.

Internal Revenue Service

Tax Computation

1969

- ▷ If no entry is made on line 14, line 16, or line 17, keep this for your records
- ▷ If entry is made on line 14, line 16, or line 17, attach to form 1040

Name as shown on Form 1040

Social Security Number

1 Your adjusted gross income (from line 15c, Form 1040)
 Note.—If your adjusted gross income is less than \$5,000 and you choose to take the standard deduction instead of itemizing your deductions, omit lines 2, 3, 4, and 5. Find your tax in the appropriate table (A or B on T-2 or C on T-3). Enter tax on line 6 below.

2 Enter on the line at the right the amount of your deduction figured under one of the following methods:

a If you itemize deductions, enter the total from Schedule A, line 17
OR

b Figure your standard deduction as follows:

(1) Enter 10 percent of line 1 but do not enter more than \$1,000 (\$500 if married and filing separately) . . .

\$

(2) Enter the sum of: \$200 (\$100 if married and filing separately) plus \$100 for each exemption claimed in line 10 of Form 1040, but do not enter more than \$1,000 (\$500 if married and filing separately) . . .

\$

Enter the larger of b(1) or b(2) on the line at the right. If your spouse files a separate return, determine your deduction in the same manner that she (he) has.

3 Subtract the amount on line 2 from the amount on line 1 and enter the balance here

4 Enter number of exemptions claimed on line 10, Form 1040, Multiply this number by \$600, and enter the amount here

5 Subtract the amount on line 4 from the amount on line 3 and enter the balance here. This is your taxable income. Figure tax on this amount by using the appropriate Tax Rate Schedule (I, II, or III) on T-1. Enter tax on line 6 below

6 Tax

7 If you claim the retirement income credit, enter amount from Schedule R, line 12, here

8 Subtract line 7 from line 6

9 Tax surcharge. If line 8 is less than \$735, find surcharge from tax surcharge tables on T-1. If line 8 is \$735 or more, multiply amount on line 8 by .10 and enter result here

10 Total (Add lines 6 and 9)

11 Retirement income credit from Schedule R, line 17 (attach Schedule R)

12 Investment credit (attach Form 3468)

13 Foreign tax credit (attach Form 1116)

14 Total credits (add lines 11, 12, and 13)

15 Income tax (subtract line 14 from line 10)

16 Self-employment tax (attach Schedule SE)

17 Tax from recomputing prior-year investment credit (attach Form 4255)

18 Total tax (add lines 15, 16, and 17). Enter here and on line 18, Form 1040 (make no entry on line 16 or 17, Form 1040). Attach Sch. T to Form 1040 only if you made an entry on line 14, 16, or 17 above

Income Averaging.—If your income has increased substantially this year, it may be to your advantage to figure your tax before surcharge under the "averaging method." Obtain Schedule G from an Internal Revenue Service office for full details.

Alternative Tax.—It will usually be to your advantage to use the alternative tax if your net long-term capital gain exceeds your net short-term capital loss, or if you have a net long-term capital gain only, and you are filing (a) a separate return with taxable income exceeding \$26,000, or

(b) a joint return, or as a surviving husband or wife, with taxable income exceeding \$52,000, or (c) as a head of household with taxable income exceeding \$38,000.

Line 9—Tax Surcharge.—The rate for the calendar year 1969 is 10 percent. The tax surcharge is an addition to the regular income tax. See the Tax Surcharge Tables on T-1.

Credit for Foreign Taxes and Tax-Free Covenant Bonds.—You may claim these credits only if you itemize deductions.

To claim tax-free covenant bonds credit, enter the amount of credit above line 14, and write "covenant bonds" to left of the entry.

Line 16—Self-Employment Tax.—Enter amount shown on line 9, Part III, Schedule SE.

Line 17—Tax From Recomputing Prior Year Investment Credit.—Enter the amount by which the credit taken in a prior year or years exceeds the credit as recomputed due to early disposition of property. Attach Form 4255.
