## INTRODUCTION

The Internal Revenue Service Individual and State Tax Models consist of a sample of 155,212 and 136,324 Federal tax return records selected as part of its Statistics of Income program to represent the 86.6 million Form 1040 and 1040A returns filed for Tax Year 1977. This file is used in conjunction with (1) a generalized manipulation program designed to select, compute, compare, arrange and recode the data in the input file, and (2) a table generator program that will select, weight and tabulate specific items in the manipulated input file and provide for stub and column identification in a flexible print format.

The tax model files, which are designed to simulate the administrative and revenue impact of tax law changes, as well as to provide general statistical

~~1. The model files are designed to be used by Government and private researchers in either of two~~

(1) The user may specify in writing the types of manipulations to be made and outline the format of the tabulation measuring these changes. If the Service determines that the specifications can be handled, using the model's generalized programs, without interfering with its regular statistical programs, the IRS will prepare the tabulations on a reimbursable basis.

(2) The user may purchase the model files and develop the programs to manipulate the data and/or produce the desired tabulations. These model files contain no taxpayer identifying information and are readily available from the Machine Readable Archives Branch (NNR) of the National Archives and Records Service in Washington, D.C. (20408).

This general description provides a file layout, an explanation of each of the codes and fields contained in the files, technical specifications concerning

## EXPLANATION OF FIELDS IN THE TAPE FILES

The following explanations define data elements contained in the 1977 Individual and State Tax Model Files that have not been abstracted directly from one specific line on Form 1040, Form 1040A, or the accompanying schedules and forms. Field numbers for the data elements not appearing in this section have been entered on the lines from which the data elements were abstracted in the "FORMS" section of this booklet.

58 TAX PAID WITH RETURN: There is no specific line reference for this data element. This amount is written in the margin during revenue processing, and corresponds to the amount of the payment accompanying the tax return when filed.

84 COMBINED 1040/SCHEDE D NET LONG-TERM CAPITAL GAIN OR LOSS: This is a computed amount equal to Field 18 + line 13 of Schedule D of Form 1040.

85 COMBINED 1040/SCHEDE D NET CAPITAL GAIN OR LOSS: This is a computed amount equal to Field 18 + [line 15b(+) or 16b(-) of Schedule D of Form 1040].

117 TOTAL TAX PREFERENCES: This is a computed amount equal to the sum of the tax preference detail items (Field 116) minus the computed no benefit deduction claimed.

140 ONE-HALF EXCESS NET LONG-TERM CAPITAL GAINS: This is a computed amount equal to the excluded portion of long-term capital gains.

141 TAXABLE INCOME, NEW CONCEPT: This is a computed amount equal to adjusted gross income minus excess itemized deductions (or plus unused zero bracket amount) minus exemption amount. This concept includes the zero bracket amount (equivalent of the former standard deduction) and is thus not comparable to taxable income as shown for earlier years.

142 TAXABLE INCOME, OLD CONCEPT: This is a computed amount equal to adjusted gross income minus zero bracket amount or total itemized deductions minus exemption amount, but never less than zero. This concept does not include the zero bracket amount, and as such is comparable to taxable income as shown for earlier years.

143 GENERAL TAX CREDIT: This is a computed amount equal to 2% of taxable income or \$35 per personal exemption, limited to a maximum of \$180.

144 INCOME TAX BEFORE CREDITS, REGULAR COMPUTATION: This is a computed amount arrived at by applying the tax rate schedules to taxable income, without regard to the type of computation used by the taxpayer.

145 TAX SAVINGS: This is a computed amount arrived at by subtracting the tax computed by the taxpayer from Field 144.

## SOURCES OF THE DATA, DESCRIPTION OF THE SAMPLE AND LIMITATIONS OF THE DATA

#### SOURCES OF THE DATA

The data in the 1977 Individual and State Tax Model files were compiled from a stratified systematic sample of unaudited individual income tax returns, Forms 1040 and 1040A, filed by U.S. citizens and residents during Calendar Year 1978 and processed in the service centers of the Internal Revenue Service. The total sample of

15-5812-1 was statistically selected from a population of 86,634,640 returns.

The records in these files are intended to represent all returns filed for Income Year 1977. While the overwhelming majority of returns processed during 1978 were for Calendar Year 1977, a few of them were for non-calendar years ending during 1977 and 1978 and some were delinquent returns for prior years. Returns for recent prior years were used for the 1977 statistics in place of 1977 returns processed for revenue purposes after December 31, 1978. In general, the characteristics of returns due but not yet filed could best be represented by the returns for previous income years that were processed in 1978.

All returns processed during 1978 were subjected to sampling except tentative and amended returns. Tentative returns were not subjected to sampling because the revised returns may have been sampled later on, while amended returns were excluded because the original returns had already been subjected to sampling.

## DESCRIPTION OF THE SAMPLE AND LIMITATIONS OF THE DATA

### Sample Criteria and Selection

Forms 1040 and 1040A returns filed and entered into the Internal Revenue

at least a minimum number of sample returns from each State. The sample for the State groups was then allocated to financial strata to minimize the variance of the estimates. Refer to table A for strata descriptions and the number of returns in the population and sample, by strata and State groups.

#### Method of Estimation

A separate set of rates (by sample strata) for each of the five groups of States was prescribed for the selection of the sample, the rates varying from 0.02 percent to 100 percent. The adequacy of the sample stratum, by applying the prescribed rates to the number of returns reported filed by each of the ten Internal Revenue service centers. When the actual number of sample returns differed considerably from the expected number, a followup was conducted.

Sampling weights were obtained by dividing the number of returns filed per sample stratum by the number of sample returns actually received for the stratum. All sampling weights were then converted to "integer weighting factors," which were applied to each sample return. For example, if a weight of 44.24 was computed for a stratum, 24 percent of the sample returns in the stratum were systematically given a weighting factor of 45, and 76 percent a weight of 44.

#### Sampling Variability

The coefficient of variation is the standard deviation of an estimate expressed as a percent of the estimate. The standard deviation when added to and subtracted from the estimate provides the computed upper and lower limits within which approximately two out of three estimates from similarly selected samples would be expected to fall.

Coefficients of variation for this booklet were computed using a sum-of-squares formula for selected frequency and amount estimates and appear in tables 1 and 2. The upper limit coefficients of variation shown in table B were computed using a formula based on the sum-of-squares method. These coefficients, applicable to frequencies only, are meant as a general guide for use when computed coefficients of variation are not shown.

### Response and Other Nonsampling Errors

In transcribing and tabulating the information from the returns in the sample, additional checks were imposed to improve the quality of the resulting estimates. Incorrect or missing entries were corrected during statistical editing to make them consistent with other entries on the return or accompanying schedules. Data were also adjusted during editing in an attempt to achieve consistent statistical definitions.

Quality of the basic data abstracted at the processing centers was controlled there by means of a continuous subsampling verification system. In addition, the Statistics Division in the National Office conducted an independent reprocessing of a small subsample of the returns statistically processed in the field as a further check on processing. Prior to creation of the Individual and State Tax Model Files, numerous computer tests were applied to each return record to assure that proper balance and relationships among return items were maintained.

However, the controls maintained over the selection of the sample returns, the processing of the source data, and the review of the statistics did not completely eliminate the possibility of error. Also, practical operating considerations necessitated the allowance of reasonable tolerances in the statistical processing of the data.

## STATE TAX MODEL SAMPLE DESCRIPTION

The 1977 State Tax Model File is based on the same Statistics of Income sample as the 1977 Individual Tax Model File. The individual records in the file have been sorted into 54 segments, one for each of the 50 States and the District of Columbia, as well as 3 segments for returns of U.S. citizens living abroad filed through the Office of International Operations. In addition to entering a STATE identifying code on each record, all records with adjusted gross income (AGI) of \$200,000 or more have been deleted from the file. This was done to prevent unauthorized disclosure of tax return information with respect to a given geographic area. The sample of 136,324 records in this file are used to represent 86,581,237 of the 86,634,640 individual income tax return records filed with adjusted gross income less than \$200,000 for Tax Year 1977. Table 2 of this booklet presents coefficients of variation by size of adjusted gross income for each State. Sample counts and population for all returns and for returns with adjusted gross income less than \$200,000, classified by States, are presented in Table 3.

In this model file, each individual return is classified by State according

to the address shown on the return by the taxpayer. Therefore, each State tabulation should include all residents of that State. A coding system based on the reported tax return address is, however, subject to certain limitations. There are instances in which the taxpayers residing in a given State are not included in the tabulations for that State. The reasons for this are that not all taxpayers give their home addresses on their tax return, some report:

- (a) the address of the tax lawyer or accountant who prepared the return
- (b) the address of their place of business, or
- (c) a post office box number.

To the extent that such an address was located in a State that was different from the taxpayer's State of residence, the accuracy of the data was affected.

\* No sampling variability since all returns in this category are in the sample.

† Reliable upper limit coefficients of variation cannot be computed for these estimated frequencies.

\* Not applicable, since the estimated number of returns exceeded the population total.

## TECHNICAL DESCRIPTION OF THE FILES

Each "data record" in the file, representing one tax return, is composed of 846 bytes. Logical tape records are made up of 5 data records and are separated by a 3/4 inch "inter record gap" (IRG). There is no special indication at the end of a logical tape record other than the IRG, and no indication of the end of a data record.

Tape characters are recorded in Extended Binary Coded Decimal Interchange (EBCDIC) on standard 2,400 foot, 1/2 inch, nine-track tape, at a density of 1600 bytes per inch (BPI) in the phase encoding (PE) mode. In this mode, a 1-bit and a 0-bit are recorded as signals of opposite polarity in ODD parity (a parity bit is set to 1 or 0 so that there is always an ODD number of 1-bits in a nine-bit character).

Each code and data field is numeric and defined as packed decimal. In the packed decimal format, each byte contains two decimal digits, except the byte containing the units digit. This byte contains the unit digit and the sign of the field. Each code and field is defined as being signed and contains a bit configuration for the positive sign (C) or the negative sign (D).

Codes are defined as 1 or 2 bytes in length. The one-byte codes contain a decimal digit from 0 through 9. The two-byte codes contain three decimal digits in the range of 000 through 999. The largest decimal value is 99. The fields in the file are five bytes in length and contain nine decimal digits with leading zeroes. The first ten fields are number fields and contain decimal values in the range of 0 through 99. Fields 11 through 150 have a maximum of eight significant digits. Weight factors are provided to accommodate either a decimal or an integer weighting system.

The file is a single data set on multiple volumes and uses IBM Standard Labels. A standard set of 360/370 labels consists of a volume label, two header labels and two trailer labels. All labels are 80 characters in length, recorded in EBCDIC, in odd parity.

## TECHNICAL DESCRIPTION OF THE FILES (con't)

The IBM Standard volume label (VOL1) is used to identify the tape volume and the owner. It is always the first record on an IBM Standard labeled tape.

The volume label is followed by a data set label 1 (HDR1). The HDR1 label contains such information such as "HDR1", the data set name, expiration date and block count.

Data set label 2 (HDR2) follows data set label 1. The HDR2 label contains such information as "HDR2", the record format, i.e. fixed, variable or undefined length, record length, block length and other attributes. ~~length, record length, block length and other attributes~~

[REDACTED]

[REDACTED]

[REDACTED]

The HDR2 label is followed by a tape mark, the data set or part of the data set for multiple volumes, a tape mark, a data set label 1 (EOV1 or EOF1) containing the same information as the "HDR1" label and a data set label 2 (EOV2 or EOF2) containing the same information as the "HDR2" label. An EOV2 label is followed by a tape mark. An EOF2 label is followed by two tape marks which indicate the end of the data set.

A detailed layout and description of each type of label may be found in the IBM publication - "IBM/360 Operating System, Tape Labels" (order number GC-28-6680-3). Pages 22 through 48 of the IBM publication describe in detail all possible IBM Standard Label formats. The following 3 pages of this booklet contain a narrative description of each type of label as defined in the IBM publication.

A regular IBM user needs the following information:

- a) Volume serial number -- on the outside of the reel
- b) Data set name (DSN or DSNAME) -- as requested
- c) Record length -- 846 bytes per record (packed decimal format)
- d) Record format -- FB for fixed block

A non-360 users would also need the tape density, block size and the recording

(i) Check the (i) box if taxpayer retired before January 1, 1977.

Check the (i) box if taxpayer retired before January 1, 1976. Check the (ii) box if taxpayer retired after December 31, 1976. The date entered by the taxpayer should be the date on which the taxpayer ceased active employment because of this disability.

**B. Definition of Permanent and Total Disability.**—Permanent and total disability means that a taxpayer is unable to engage in any substantial gainful activity by reason of any medically determined physical or mental impairment which can be expected to result in death or which has lasted or can be expected to last for a continuous period of a year or more. The substantial gainful activity referred to is not limited to the activity, or comparable activity, in which the taxpayer engaged prior to retirement on disability.

## Instructions

**A. Who May Exclude Disability Income.**—For taxable years beginning after December 31, 1976, you will be eligible to claim the "disability income exclusion" on disability payments you receive instead of wages only if all the following requirements are satisfied:

- (1) You have not reached age 65 before the close of the taxable year.
- (2) You retired on disability, and, when you retired, were permanently and totally disabled.
- (3) At the beginning of the taxable year you have not reached mandatory retirement age (generally the age at which you would have been required to retire under your employer's retirement program had you not become disabled), and
- (4) You have not made an irrevocable election not to claim the disability income exclusion (see Instruction F).

If you retired before January 1, 1977, and either retired on disability or were entitled to retire on disability, and on January 1, 1976, or January 1, 1977, were permanently and totally disabled, you will be considered to have met the requirement of A(2).

**B. Limitations.**—The amount of disability payments that you may exclude cannot exceed the lesser of a weekly rate of \$100 or your actual weekly payment.

To determine your actual weekly payment, you must convert disability income

reaches mandatory retirement age in a taxable year prior to the taxable year in which such taxpayer attains age 65; or (c) the taxpayer dies.

If you reach mandatory retirement age during the taxable year, do not claim the exclusion for any days after you reach mandatory retirement age.

On a return where one taxpayer is entitled to the disability income exclusion, the maximum exclusion is \$5,200. On a joint return where both spouses are entitled to the disability income exclusion, the maximum exclusion is \$10,400.

**C. Maximum Adjusted Gross Income Before Phaseout.**—If your adjusted gross income determined before the disability income exclusion (Form 1040, line 29) exceeds \$15,000, you must reduce the disability income exclusion by the excess of your adjusted gross income over \$15,000. On a return where only one taxpayer is entitled to the maximum disability income exclusion, the exclusion would be phased out entirely if the amount on Form 1040, line 29, is \$20,200 or more. On a joint return where both spouses are entitled to the maximum disability income exclusion, the exclusion would be phased out entirely if the amount on Form 1040, line 29, is \$25,400 or more.

**D. Filing Requirements for Married Couples.**—If you are married at the close of the taxable year, you are allowed the disability income exclusion only if you and your spouse file a joint return, unless you and your spouse have not lived together

retirement disability payments from gross income as sick pay, or (2) you are eligible for the disability income exclusion; you may make an irrevocable election not to claim the disability income exclusion. If you make a valid irrevocable election, you should report your disability payments under an applicable pension or annuity rule, which allows you to apply your cost against your disability payments. The election is applicable for the year of election (but may not be made for a year prior to 1976) and all subsequent years.

To make the election, attach a statement to your tax return that (1) states you elect not to claim the disability income exclusion and will report your disability payments under an applicable pension or annuity rule, and (2) sets forth your qualifications for making the election. If you retired in 1977, you must also attach a certificate from a qualified physician attesting to your total and permanent disability at the time of your retirement. This election is not available to disability retirees who retired after December 31, 1976, and whose disability payments are not eligible for the disability income exclusion.

The irrevocable election not to exclude your disability payments will allow you to begin recovering your annuity cost immediately. This may be beneficial in the following situations:

- (1) The exclusion phaseout substantially decreases or eliminates your disability income exclusion;
- (2) You believe that you will not live

the taxable year, the credit for employment-related expenses is allowable only if you and your spouse file a joint return for the taxable year.

(2) **Marital Status.**—If you are legally separated from your spouse under a decree of divorce or of separate maintenance, you are not considered as married.

(3) **Certain Married Individuals Living Apart and Filing Separate Returns.**—If during the last 6 months of the taxable year your spouse was not a member of your household and you (i) maintained a household that was for more than one-half of the taxable year the principal place of abode of a qualifying individual, and (ii) furnished over half of the cost of maintaining such household during the taxable year, then you are not considered married for purposes of the credit.

(4) **Special Dependency Test in Case of Divorced Parents.**—A child (son, stepson, daughter, stepdaughter) whose parents are divorced, legally separated under a decree of divorce or separate maintenance, or separated under a written separation agreement, shall be treated as a qualifying individual for the parent having custody of the child for the longer period during the taxable year, provided that all of the following three conditions are met:

(a) The child must be under the age of 15 or physically or mentally incapable of self-care.

(b) The child must receive over half of his or her support during the taxable year from the parents.

(c) The child must be in the custody of one or both of the parents for more than one-half of the taxable year.

(5) **Payments to a Related Individual.**—In computing your credit, you may **not** include payments made to a relative of yours or of your spouse or to a dependent household member. For this exclusion, a relative of yours or of your spouse includes: son or daughter and their descendants; stepson or stepdaughter; brother, sister, stepbrother, stepsister; father or mother and their ancestors; stepfather, stepmother; nephew, niece, uncle, aunt; son-in-law, daughter-in-law, father-in-law, mother-in-law, brother-in-law, sister-in-law.

**Exception:** Payments made to a relative listed above may also be included in computing your credit if that relative is not your dependent and the relative's services are considered employment for social security purposes.

For social security purposes, the following services are considered employment:

(a) Services performed by your son or daughter age 21 or over, but not your spouse.

(b) Domestic service by your mother or father if (i) you have in your home a son or daughter who is under age 18 or who has a physical or mental condition requiring the personal care of an adult for at least four continuous weeks in the quarter, and (ii) you are a widow (widower) or are divorced, or you have a spouse in your home who, because of a physical or mental condition, is incapable of caring for your son or daughter for at least four continuous weeks in the quarter.

(c) Services of all other relatives who are not self-employed.

**Employment-related Expense vs. Medical Expense Deduction.**—If an expense qualifies as both employment-related and medical, you may treat it either way, as long as you do not use it twice. If you treat the expense as employment-related, any part of it that you cannot use because of the maximum \$2,000 (\$4,000) yearly limitation can be treated as part of your medical expenses.

If you treat the expense as medical, the part of it that is not deductible because of the 3 percent medical deduction limita-

tion cannot be used as part of your employment-related expenses.

**Use of Credit in Determining Your Withholding Allowances.**—The credit for child and dependent care expenses may be used in determining your withholding allowances. By claiming your proper number of withholding allowances, you can fit the amount of tax withheld from your wages to your tax liability. For further information, obtain a Form W-4, Employee's Withholding Allowance Certificate from your employer or an Internal Revenue Service office.

### Figuring the Credit

**Line 1.**—Enter in the appropriate column the name(s), and relationship of each qualifying individual for whom expenses were paid and period (months and days) each lived in your household as a qualifying individual during your taxable year. Determine on a daily basis whether an individual is a qualifying individual. A qualifying individual is:

(a) A dependent under age 15 whom you can claim as an exemption or a child meeting the special dependency test of divorced parents (see Special Rule (4)).

(b) A person who is physically or mentally incapable of self-care who you either:

(1) are entitled to claim as an exemption; or

(2) would be entitled to claim as an exemption except that the person had gross income of \$750 or more.

(c) Your spouse, if physically or mentally incapable of self-care.

**Line 2.**—Enter in: column (a) the name and address of the individual(s) or organization(s) to whom employment-related expenses were incurred, column (b) the employee's social security number, column (c) the relationship of the individual to you (if none, write none), column (d) the period for which the expense was incurred in 1977, and column (e) the amount of expense incurred (include your share of social security taxes on employee's wages).

Enter in column (b) only the social security number of an individual who is your employee. No entry should be made for a self-employed individual, partnership, or corporation.

**"Incurred"** means owed for payment, whether or not paid. However, to be allowed in computing the credit, expenses must be paid during the taxable year the credit is claimed and must be within the limitations.

If the employment-related household expenses benefited a qualifying individual, do not allocate any part of the expenses to nonqualifying individuals.

**Line 4.**—Enter lesser of line 3 or \$2,000 if you listed the name of one qualifying individual or \$4,000 if you listed the names of two or more qualifying individuals. These amounts are the dollar limits for employment-related expenses incurred during any taxable year that may be taken into account in computing the credit.

**Line 5.**—Enter the amount of your earned income if you are unmarried. If you are married, enter the earnings of the spouse having the lesser amount of earned income. If your spouse is a full-time student at an educational organization or incapable of self-care, use the greater of your spouse's monthly earned income or \$166 (\$333 if two or more qualifying individuals) to determine his or her total yearly income. Use this amount to decide which spouse has the lesser amount of earned income to be entered on line 5. The \$166 (\$333) rule applies to only one spouse for any one month. Therefore, if both you and your spouse are students or incapable of self-

care the same month, no amounts paid that month are considered employment-related expenses for purposes of the credit because neither of you was employed on a full-time or part-time basis.

**"Earned income"** means wages, salaries, professional fees, etc., received for personal services rendered and net earnings from self-employment. It does not include compensation for your services that was a distribution of earnings and profits other than a reasonable allowance for your work for a corporation, nor does it include pensions, annuities, or amounts that are received under accident and health plans that are excludable from gross income.

**"Student"** is one who was enrolled as a full-time student at an educational organization during any of 5 months during the taxable year.

**"Educational organization"** means a school that has a regular teaching staff, course of study, and body of students in attendance. It includes elementary schools, junior and senior high schools, colleges, universities, technical and mechanical schools. It also includes a night school in which the student is enrolled for the number of hours or classes that is considered full-time attendance at a similar day school. It does not include on-the-job training courses, correspondence schools, etc.

**Lines 6 and 7.**—Complete these lines as instructed on the form.

**Line 8.**—Child and dependent care expenses incurred in 1976 may be eligible for the credit in 1977. If you paid for expenses in 1977 that you incurred in 1976, a credit may be computed on the expenses in 1977 if you did not exceed the limitations in 1976. The credit is in addition to the child and dependent care credit you may claim on expenses incurred and paid in 1977.

**Example:** In 1976, you incurred child care expenses of \$2,100 for your 14-year old daughter. Of the \$2,100 in child care expenses, \$1,800 were paid in 1976 and \$300 were paid in 1977. Your spouse's earned income of \$5,000 was less than your earned income. You would be allowed to compute a credit on \$200 in 1977, computed as follows:

1 Child care expenses incurred in 1976 . . .	\$2,100
2 Qualifying individual limitation . . .	\$2,000
3 Income limitation . . . . .	\$5,000
4 Lesser of line 1, 2, or 3 . . . . .	\$2,000
5 Less expenses on which credit was computed in 1976 . . . . .	1,800
6 Expenses allowable for credit in 1977 . . .	\$ 200

**Line 11.**—On line 11(a), check yes or no box if you paid cash wages for a household employee who performed services of a household nature in your home. In general, if you paid cash wages of \$50 or more in a calendar quarter for household services to a person such as a cook, housekeeper, governess, maid, cleaning person, babysitter, etc., you are required to file an employment tax return. If you are not sure whether you should file an employment tax return, ask the Internal Revenue Service or obtain Form 942, Employer's Quarterly Tax Return for Household Employees.

On line 11(b), check yes or no box depending on whether or not you have filed Form 942, Employer's Quarterly Tax Return for Household Employees, for services performed in your home.

On line 11(c), enter your employer identification number. If you do not have a number, and are liable, file Form 942, and enter "none" in the space for "Employer identification no."

## Caution

At the time this form was printed Congress was considering legislation that would affect the Foreign Earned Income Exclusion. If this legislation is passed, the Internal Revenue Service will revise Form 2555. We will do our best to tell you about it in radio, television and newspaper announcements.

## Instructions

**1. General.**—To determine whether you must file Form 1040, see Who Must File on page 4 of that form's instructions. In determining whether you must file a return, be sure to include your income earned abroad even though it may qualify for tax exemption, as explained below.

U.S. citizens in foreign countries are subject to the same U.S. income tax laws as those living in the U.S. However, there is an exception as to their earned income as defined in Instruction 7, received for personal services rendered abroad. A limited amount of earned income may be exempt from tax if a citizen meets either the "bona fide residence" test or the "physical presence" test. (See Instructions 8 and 9.) Detailed information about these provisions may be found in Publication 54, Tax Guide for U.S. Citizens Abroad.

Resident aliens of the U.S. from certain foreign countries with whom tax treaties are in effect qualify for the benefits of section 911(a)(2) of the Code (physical presence) to the same extent as U.S. citizens under "nondiscrimination" clauses of such treaties. To determine whether the country of which you are a citizen contains such a "nondiscrimination" clause in its treaty with the U.S., obtain Publication 54.

**2. How to file.**—If you qualify for exemption on any part of your earned income from sources outside the U.S., show your exempt income and information supporting it on this form, also compute your tax in Part IV of this form. Then attach this form to your completed Form 1040.

If you earned your only income abroad and all of it qualifies for exemption, you need only complete this form and attach it to a Form 1040 showing your name, address, social security number, and signature.

Report on your Form 1040 compensation earned in the U.S. for personal services performed before foreign residence began. Also report on Form 1040 all other items of gross income, including earned income that does not qualify for exemption (such as a pro rata part of your earned income if part of the personal services was rendered during temporary business trips to the U.S.).

**Note:** If you file this form, you cannot claim the earned income credit.

An individual entitled to the benefits of section 911 for a taxable year may elect not to have the provisions of this section apply. To make the election, attach a statement to your timely filed Form 1040 including extensions thereof indicating that you elect not to have section 911 apply.

An election not to have section 911 apply shall apply to the taxable year for

which made and to all subsequent taxable years. Such election may not be revoked except with the consent of the Commissioner.

**3. Where to file.**—File Form 2555 with Form 1040 with the Internal Revenue Service Center, Philadelphia, PA 19255.

**4. When to file.**—April 15 is generally the due date for filing calendar year income tax returns. However, if you are residing or traveling outside the U.S. on April 15, you are automatically allowed an extension of 2 months to June 15. The 2-month automatic extension also applies to fiscal year taxpayers.

If you take advantage of the automatic extension, you are required to attach a statement to your return showing that you were residing or traveling outside the U.S. on the due date of your return. Interest is charged at the applicable rate on any unpaid tax from the due date of the return until the date of payment.

**5. Special extensions of time for filing.**—If you expect to qualify for the exemption explained in Instruction 8 or 9 on a date more than 2 months after the regular due date of your return, you may apply on Form 2350 for an extension to a date after that on which you expect to qualify for the exemption. Send the application for extension to the office where the return will be filed, before the due date of the return (for calendar year taxpayers, this would be June 15). Interest is charged in the same manner as explained in Instruction 4.

**6. Joint returns—Alien spouse.**—You may file a joint return if both you and your spouse are U.S. citizens and you both use the same taxable year. If you file a joint return complete separate Forms 2555 if each of you has exempt earned income.

Married persons eligible to file a joint return under these rules may do so even if one of them has exempt earned income and the other does not.

Generally, you may not file a joint return if either you or your spouse was a nonresident alien at any time during the taxable year (for exceptions see "Special Election for Aliens" on page 6 of Form 1040 Instructions). However you may claim an exemption for a nonresident alien spouse who had no gross income from U.S. sources and was not the dependent of another taxpayer.

For taxable years beginning after 1976, certain community property laws do not apply for income tax purposes in the case of a citizen or resident of the U.S. who is married to a nonresident alien individual, and who has community income for the taxable year, if they do not elect to file a joint return. Detailed information may be found in Publication 54, Tax Guide for U.S. Citizens Abroad.

**7. Earned Income.**—Earned income from sources outside the U.S. means wages, salaries, professional fees, and other compensation for personal services actually rendered. It does not include compensation for personal services to a corporation that consists of a distribution of earnings or profits rather than a reasonable allowance as compensation for the personal services. It does not include dividends, capital gains, interest, etc.

Income earned abroad which is received outside of the country in which earned is ineligible for the exclusion if one of the purposes of receiving such income outside of the country is to avoid tax in that country.

The tax avoidance purpose does not have to be the only purpose for receiving the money outside of the country in which earned, nor does it have to be the principal reason for receiving the money outside of that country. It is sufficient that it be one of the purposes. The fact that the country in which the income is earned does not tax amounts received outside of the country will be viewed as a strong indication of a tax avoidance purpose.

If you engaged in a non-corporate trade or business in which both personal services and capital were material income-producing factors, a reasonable allowance as compensation for your personal services will be considered earned income. This earned income amount, however, cannot be more than 30 percent of your share of the net profits from the trade or business.

**8. Bona fide residence (sec. 911(a)(1) Internal Revenue Code).**—

**(a) General.**—If you are a bona fide resident of a foreign country or countries for an uninterrupted period which includes an entire taxable year, you can, subject to the rules in Instruction 10, exclude up to \$15,000 of your earned income from personal services rendered abroad for each taxable year. See Instruction 10(g) for special rules for employees of qualified U.S. charitable organizations.

**(b) Determination of residence.**—No specific rule can be stated for determining whether you are a bona fide resident of a foreign country, because the determination involves your intention as to the length and nature of your stay. Your intention to establish a bona fide residence in a foreign country may be evidenced by words and acts. If these conflict, more emphasis will be placed on acts than words. Generally, if you go to a foreign country for a definite purpose of a temporary nature and return to the U.S. after that purpose has been accomplished, you are not a bona fide resident of the foreign country. However, if accomplishing the purpose requires an extended and indefinite stay, and you therefore make your home in the foreign country, you may be a bona fide resident of the foreign country for Federal income tax purposes.

**(c) Statement of nonresidence.**—If you made a statement to the authorities of a foreign country in which you have earned income that you are not a resident of that country, and you have been held not subject to its income tax, you will not be considered a bona fide resident of that foreign country. If you made such a statement and a determination is being made as to whether you qualify as a bona fide foreign resident, provided no adverse determination has been made by the authorities of the foreign country on your nonresidence status, you will be considered not subject to the income tax of that foreign country.

**(d) Treatment of noncash remuneration.**—If you qualify as a bona fide resident and received noncash remuneration in the form of a right to use property or facilities (such as a home or car), it will be taxable in the same manner as any other compensation, subject to the \$15,000 or \$20,000 exclusion.

**(e) Definitions.**—

**(i) Entire taxable year.**—If you use the calendar year as your taxable year, your entire taxable year is the period beginning January 1 and ending December 31.

(Continued on page 4)

(ii) **Uninterrupted period.**—The term uninterrupted period in (a), above, refers to a U.S. citizen's bona fide residence and not to his or her physical presence in the foreign country.

**9. Physical presence (sec. 911(a)(2) Internal Revenue Code).**—

(a) **General.**—If you are physically present in a foreign country or countries for a total of at least 510 days during any period of 18 consecutive months, you can, subject to the rules in Instruction 10, exclude up to \$15,000 of your earned income for each taxable year. You can do this provided the earned income is for personal services performed outside the U.S. and is attributable to the 18-month period. See Instruction 10(g) for special rules for employees of qualified U.S. charitable organizations.

(b) **Determination of 18-month period and application of 510-day rule.**—In figuring the minimum of 510 full days' presence in any foreign country or countries, add all separate periods of presence during the 18-month period. The 510 full days need not be consecutive, but may be interrupted by periods during which you are traveling over international waters or are otherwise not present in a foreign country. (For additional information and examples, see Publication 54.)

(c) **Definition of a full day.**—Full day means a period of 24 consecutive hours beginning at midnight.

**10. Special rules that apply to bona fide residence and physical presence.**—

(a) **Rule of attribution.**—In general, a taxpayer receives earned income in the same taxable year he or she performs personal services. This taxable year is used to

mentality is not exempt from tax under the bona fide residence or physical presence tests. This includes pay received from our Armed Forces' post exchanges, officers' and enlisted men's clubs and messes, motion picture services, and other similarly organized activities under the jurisdiction of the Armed Forces, even though they may be supported by nonappropriated funds.

(c) **Accrual of exemption.**—A U.S. citizen becomes entitled to the exemption on a daily basis throughout the taxable year. The number of days to be used in figuring the exemption is the number of days in the taxable year for which the exemption is claimed.

(d) **Treatment of pensions or annuities.**—In general earned income received as pensions or annuities is not exempt if attributable to employer contributions made after December 31, 1962, for services rendered outside the U.S. after that date. (For rules on the allocation of employer contributions under prefunded pension or annuity plans, see section 1.72-8 of the Income Tax Regulations. For rules on the treatment of pensions or annuities received under unfunded plans, see sections 1.911-1(c) and 1.911-2(d)(5) of the Regulations.)

(e) **Treatment of deductions.**—Exclude any expenses, losses, or items otherwise deductible (except deductions allowed for personal exemptions) that are properly allocable to or chargeable against earned income exempt from tax under the bona fide residence or physical presence tests, in figuring your taxable income. If expenses incurred for services performed abroad are attributable to both exempt and nonexempt

**Example:** You worked in London for a U.S. charitable organization and also for an American business employer. You received \$10,000 for your charitable services and \$15,000 from your services for the American business company. Your \$10,000 compensation from the charitable employer is sheltered by the \$20,000 exclusion, and this \$10,000 exclusion reduces the \$15,000 exclusion for noncharitable foreign earned income to \$5,000.

**2. Definition.**—For purposes of this exclusion, the term "qualified charitable services" means services performed by an employee for an employer created or organized in the United States, or under the law of the United States, any State, or the District of Columbia, which meets the requirements of section 501(c)(3) of the Internal Revenue Code.

**11. Amounts attributable to services performed on or before December 31, 1962.**—If you received an amount after December 31, 1962, for services performed on or before that date, you may be able to exclude it from your gross income on the ground that a right to receive it existed on March 12, 1962. Such a right (whether forfeitable or nonforfeitable) is considered to exist on March 12, 1962, if it is in a contract, agreement, plan, or provision of foreign law in force on March 12, 1962. (For more information, see section 1.911-1(c) of the Income Tax Regulations or contact any Internal Revenue Service office or representative.)

**12. Computation of tax.**—

## Instructions

(Section references are to the *Internal Revenue Code* unless otherwise specified.)

**Who Must File.**—You must file this form if: (1) you have tax preference items in excess of \$10,000 (\$5,000 if married filing separately) even if you owe no minimum tax, or (2) if you have any minimum tax liability deferred from a prior taxable year until this year. If this is a short period return see the note in instructions for line 8.

**Line 1—Tax Preference Items.**—

**(a) Adjusted itemized deductions.**—  
(Applicable only if you itemized deductions on Schedule A (Form 1040)).

The amount to be entered should be determined as follows:

Step 1—Subtract from your total itemized deductions (line 39, Schedule A, Form 1040):

- (1) Medical and dental expenses (line 10, Schedule A, Form 1040)
- (2) Casualty and theft losses (line 29, Schedule A, Form 1040).
- (3) Any deduction allowable under Section 691(c).

Step 2—Multiply your adjusted gross income (line 31, Form 1040) by 60%.

Step 3—Subtract the amount determined in Step 2 from the lesser of your adjusted gross income or the amount determined in Step 1.

**(b) Accelerated depreciation on real property.**—

- (1) Low income rental housing under section 167(k)
- (2) Other real property

Enter on the appropriate line(s) the excess of depreciation allowable over the depreciation that would have been allowable

ization allowable exceeds the depreciation deduction otherwise allowable.

**(h) Reserves for losses on bad debts of financial institutions.**—Enter your share of the excess of the addition to reserve for bad debts over the reasonable addition to the reserve for bad debts that would have been allowable if the bad debt reserve had been maintained for all taxable years on the basis of actual experience. See section 57(a)(7).

**(i) Stock options.**—If you received stock pursuant to the exercise of a qualified stock option (as defined in section 422(b)) or a restricted stock option (as defined in section 424(b)), enter the amount by which the fair market value of the shares at the time of exercise exceeds the option price.

**(j) Depletion.**—Enter any excess of deduction for depletion allowable under section 611 over the adjusted basis of the property at the end of the year (determined without regard to depletion deduction for the taxable year). You must compute this excess on a property by property basis.

**(k) Capital gains.**—Enter the amount from:

- (1) Schedule D (Form 1040), line 15a;
- (2) Form 1040, line 15 if you report only capital gain distributions; or
- (3) Form 4798, Part I, line 8a if you report a pre-1970 capital loss carryover.

**(l) Intangible drilling costs.**—Excess intangible drilling costs are a tax preference item only to the extent that they exceed your net income from oil and gas properties.

Excess intangible drilling costs are the amount by which the allowable intangible drilling and development costs (other than costs incurred in drilling a nonproductive well) exceed the amount that would have

shareholder of an electing small business corporation, see sec. 58(d);

participant in a common trust fund, see sec. 58(e);

shareholder or holder of beneficial interest in a regulated investment company or a real estate investment trust, see sec. 58(f).

If you have tax preferences attributable to foreign sources, see sec. 58(g).

**Line 8—Adjustment in Exclusion for Computing Minimum Tax for Tax Preferences for Short Period Returns.**—If this return is for a short period, a special formula is used for determining the adjustment in exclusion for computing the minimum tax for tax preferences. See section 443(d).

However, if you are married filing separately, substitute \$5,000 for \$10,000.

**Note:** If line 2 is more than either the adjusted exclusion or \$10,000 (\$5,000 if married filing separately), file this form even though you owe no minimum tax.

**Line 11—1977 Net Operating Loss Carryover to 1978.**—Under certain conditions, part or all of the amount shown on line 10 may be deferred to a subsequent year. See section 56(b).

**Line 15—Minimum Tax Deferred from Prior Year(s).**—If a net operating loss carryover from a prior year(s) reduces taxable income for 1977, and the net operating loss giving rise to the carryover resulted in the deferral of minimum tax in that prior year(s), all or part of the deferred minimum tax may be includible on line 15 as tax liability for 1977. The deferred minimum tax should be computed at the rate in effect for the year of the loss (15% for 1976; 10% for 1975 and prior years).

The deferred minimum tax is to be included on line 15 to the extent the portion

## Instructions

(Section references are to the Internal Revenue Code unless otherwise specified)

**Column A—Personal Service Income.**—Enter in the spaces provided all your personal service income as shown on Form 1040 or Form 1041. Personal service income generally means wages, salaries, professional fees, bonuses, commissions on sales or on insurance premiums, tips, and other amounts received as compensation for personal services actually rendered. It includes prizes and awards (other than gambling winnings), taxable pensions or annuities (if there is a connection with earning income from past personal services), and group-term life insurance purchased for employees that are includable in gross income. It also includes property received for performance of services and transferred to another individual.

If you perform personal services for a corporation, personal service income generally means only that portion of income received from the corporation that represents a reasonable allowance for salaries and other compensation for personal services actually rendered. It also includes gains (other than capital gains) and net earnings derived from the sale or other disposition of the transfer of any interest in, or the licensing of the use of, property (other than goodwill) if your personal efforts created the property.

The entire amount you receive for performing professional services, such as those of a doctor, dentist, lawyer, architect, or accountant, will be treated as personal service income if you are individually and personally responsible for the services performed, even though you employ assistants to perform all or part of the services.

If you are engaged in a noncorporate trade or business in which both personal services and capital are material income producing factors, a reasonable allowance as compensation for the personal services actually rendered shall be considered personal service income from such trade or business. However, the total amount may not exceed 30 percent of your share of the net profits of such trade or business including any guaranteed

payment received from a partnership. An item of gross income in respect of a decedent shall be treated as personal service income in the hands of the beneficiary if such gross income would have constituted personal service income of the decedent had he or she lived and received such amount.

If you are a nonresident alien, personal service income includes only income from sources within the United States that is effectively connected with the conduct of a trade or business in the United States. It does not include income subject to 30 percent tax under Section 871(a)(1)(A).

Personal service income does not include dividends (including undistributed taxable income from an electing Small Business Corporation), other distributions of corporate earnings and profits, gambling gains, or gains treated as capital gains.

Personal service income does not include premature or excess distributions from a qualified employees pension plan under Section 72(m)(5), nor does it include lump-sum distributions from pension etc. plans taxed under Sections 402(a)(2), 402(e) and 403(a)(2).

Personal service income also does not include certain distributions from Individual Retirement Accounts described in Sections 408(e)(2), (3), (4), (5) and 408(f) nor redemption of Retirement Bonds includable in income under Section 409(b) or (c).

**Column B—Deductions Against Personal Service Income.**—Enter in the spaces provided any deductions from gross income that are required to be taken into account in determining adjusted gross income and are properly allocable to or chargeable against personal service income such as:

- (1) Deductions attributable to a trade or business from which personal service income is or may be derived,
- (2) Expenses paid or incurred in connection with the performance of services as an employee,

- (3) Deductions allowable to employers for their contributions to qualified pension, annuity, or bond purchase plans,
- (4) Allowable deductions for moving expenses,
- (5) Deductions allowable to an individual who is a shareholder-employee of an electing small business corporation for the excess of amounts included in gross income due to overpayment on his or her behalf by a corporation to a qualified pension plan over amounts not received as benefits, and
- (6) A net operating loss deduction to the extent that the net operating losses carried to the taxable year are properly allocable to or chargeable against personal service income.

**Line 6.**—The tax preference items to take into consideration for purposes of this form are the same as those required for computation of minimum tax whether or not you are actually liable for such tax.

**Line 7—Personal Service Taxable Income.**—Personal service taxable income means the excess of the portion of taxable income attributable to personal service net income over the total tax preference items.

**Lines 15 and 27.**—Enter your maximum tax on Schedule TC, Form 1040, Part 1, line 4 (or Form 1041, line 26). However, if you had net long-term capital gain in excess of net short-term capital loss, complete lines 16 to 27 and enter instead, the result from line 27 on the appropriate line.

**Short Period Returns.**—If you are required to make a return of less than twelve months, your tax is determined by placing your taxable income, personal service net income, adjusted gross income, and items of tax preference on an annual basis. However, if a short period return is required due to a termination of taxable year for purposes of a jeopardy assessment, maximum tax computation shall not apply unless the taxable year is reopened.

## General Instructions

**1. Who Must File.**—Individuals, estates and trusts are limited in the taxable year on the deduction of interest expense on indebtedness incurred to purchase or carry investment property and net lease property.

**a.** If you paid or accrued, depending upon the method of accounting you use, during the year 1977 interest on indebtedness incurred after September 10, 1975, exceeding \$10,000 (\$5,000 if married filing separately; zero if a trust), fill in Part II.

**b.** If you paid or accrued interest during the year on an obligation or obligations in existence prior to September 11, 1975, but after December 16, 1969, attributable to a specific item of property for a specified term exceeding \$25,000 (\$12,500 if married filing separately; zero if a trust), fill in Part III.

**c.** In addition, if you paid or accrued in 1977 interest on investment indebtedness created before December 17, 1969, attributable to a specific item of property for a specified term, fill in Part I. This also includes indebtedness in existence after December 16, 1969, if a binding contract was in effect on that date.

**d.** If, during 1976, you had interest from Parts II or III disallowed due to the respective limitations, fill in Part IV of the Form 4952 for 1977.

### 2. Description of Property Involved.—

**a.** Property held for investment includes all investments held for the production of taxable income or gain. Such property does not include property used in a trade or business.

**b.** Property subject to net lease is rental property that is treated for purpose of computing the limitation as property held for investment. The character of the income and expenses of such property does not change for computing the gain or loss with respect to rental property. Rental property is net lease property if either or both of these conditions exist:

(1) The lessor is either guaranteed a specific return of income or is guaranteed in whole or in part against loss of income.

(2) The sum of the deductions of the lessor in the taxable year with respect to such property, which are allowable solely by reason of section 162 (other than rents and reimbursed amounts), is less than 15% of the income produced by such property. With respect to the 15% test, the lessor may elect to: (a) treat all leased portions of a parcel of real property as subject to a single lease, and (b) exempt real property that has been in use for more than 5 years.

### 3. Items to Use in Computing the Limitation.—

**a.** Investment interest expense is the interest paid or accrued on indebtedness incurred or continued, to purchase or carry property held for investment or rental property subject to a net lease. Taxpayer's method of accounting will determine the amount of interest to include in the taxable year.

**b.** Exemption provided on lines 10(a) and (b), 11, 21 and 22.

**c.** Net investment income is the amount by which investment income ex-

investment property, and amounts recaptured as ordinary income from the sale or exchange of investment property subject to sections 1245, 1250 and 1254 provisions. (2) Investment expenses are those deductions directly connected with the production of investment income. Such deductions are those allowable by sections 162, 164(a)(1) or (2), 166, 167, 171, 212, or 611. Depreciation is limited to the amount computed under the straight line method. Depletion is limited to an amount based on cost. Investment income and expenses do not include any amounts connected with a trade or business.

**d.** Excess expenses from net lease property is the amount by which expenses allowable under sections 162, 163 (without any reduction for the limitations of section 163(d)), 164(a)(1) or (2), and 212 attributable to property subject to a net lease, exceeds the income produced by such property.

### 4. Source of Amounts to Include.—

**a.** Taxpayer's own investment interest expense and offset items.

**b.** Partnership.—Taxpayer's pro-rata share of partnership's investment interest expense and other items used in the computation.

**c.** Subchapter S corporation.—Taxpayer's pro-rata share of the corporation's investment interest expense and other items of income and expenses that would be taken into account if this limitation applied to such corporation. Such amounts will be apportioned among the shareholders.

**d.** Estates and trusts.—When there is distributable net income, taxpayers will include their share of: (1) the net investment income, and (2) the excess of net long-term capital gain over net short-term capital loss from the sale or exchange of investment property.

**5. Allowable Investment Interest.**—The nonbusiness portion of the allowable investment interest should be deducted as an itemized deduction on Schedule A (Form 1040). The allowable portion allocated to rental property should be shown on Schedule E (Form 1040), Part II.

The pro-rata share of allowable investment interest from a partnership should be deducted on Schedule E (Form 1040), Part III, unless the partnership notifies you that it relates to nonbusiness property which should be deducted on Schedule A (Form 1040).

The pro-rata share of disallowed investment interest from a subchapter S corporation should be added to the distributive share of income as reported on Schedule E (Form 1040), Part III. No adjustment should be made for the allowable portion since it has already been deducted by the corporation.

The allowable portion of investment interest attributable to estates and trusts are deducted on line 10, Form 1041.

The allowable portions for each of the above are figured by the following formula:

$$\frac{\text{Portion of investment interest}}{\text{Total investment interest}} \times \frac{\text{Total allowable investment interest}}{\text{Investment interest}}$$

All interest on investment indebtedness incurred before 12/17/69 is allowable without limitation.

**6. Carryover of Disallowed Interest.**—Amounts disallowed in the prior year because of the limitations are carried to the

curred after that date and subject to the same limitations.

**Preparing Form 4952.**—First complete lines 1, 5 through 9, 17 through 20, and 33. Then complete form in numerical sequence starting with line 2.

**Line 5.**—Enter your total investment interest expense, other than from partnerships and subchapter S corporations, paid or accrued in 1977, depending upon your method of accounting, attributable to obligations incurred after September 10, 1975. See General Instruction 3(a) for definition.

**Line 10.**—Individuals enter \$10,000 (\$5,000 if married filing separately). However, if you incurred investment interest in connection with the acquisition of stock in a corporation or partnership interest and you, your spouse and children own 50% or more of the stock or the capital interest in that enterprise, enter on line 10(b) an additional \$15,000 (\$7,500 if married filing separately) or the amount of this interest whichever is less.

**Lines 2, 12 and 23.**—Enter your pro-rata share of net investment income, as defined in General Instruction 3(c), from partnerships, subchapter S corporations, estates and trusts and all other investment income required to be reported on your Form 1040 or 1041 for 1977.

**If you paid or accrued during the year, investment interest attributable to the period prior to December 17, 1969, and had net investment income in 1977, then complete lines 2, 3, and 4 and enter the figure from line 4 on line 12(a).** If you did not pay or accrue during the year, investment interest attributable to the period prior to December 17, 1969, enter the total net investment income on line 12(a).

**Allocations of net investment income must be made for the periods prior to 12/17/69, prior to 9/11/75 but after 12/16/69, and after 9/10/75.** Formulas have been provided on lines 3 and 12(b) for this purpose.

**Lines 15 and 31.**—This is the allowable investment interest expense. Allocate this amount according to General Instruction 5.

**Lines 16 and 32.**—This is the disallowed investment interest. If you incurred any investment interest from subchapter S corporation, allocate this according to General Instruction 5 substituting this amount for the allowable investment interest.

**Line 17.**—Enter your total investment interest expense, other than from partnerships and subchapter S corporations, paid or accrued in 1977, depending upon your method of accounting, attributable to obligations incurred prior to September 11, 1975, but after December 16, 1969, or incurred after September 10, 1975, but subject to a written contract or commitment made prior to then. Indebtedness must be attributable to a specific item of property for a specified term.

**Line 25.**—For purposes of this computation only gains and losses attributable to the disposition of property held for investment should be taken into account.

**Line 38.**—Enter the smaller of lines 33 or 37. This is the investment interest from
