INTRODUCTION

The Individual Tax Model consists of a file of 95,316 Federal tax returns subsampled from the Statistics of Income sample of over 276,000 Forms 1040 filed for 1970. This file is used in conjunction with (1) a generalized manipulation program designed to select, compute, compare, arrange, and recode the data in the input file, and (2) a table generator program that will select, weight, and tabulate specified items in the manipulated input file and provide for stub and column identification in a flexible print format.

The Tax Model file, which is designed to simulate the administrative and revenue impact of tax law changes (as well as to provide general statistical tables), can be used by government or private researchers in two ways:

(1) The user can specify in writing the types of manipulations to be made and outline the format of the tabulations measuring these changes. If the Service determines that the specifications can be handled using the Model's programs, the IRS will prepare tables on a reimbursable basis insofar as the job does not interfere with the regular statistical processing.

(2) The user may purchase the Model file and develop his own programs to manipulate the data and/or produce the desired tabulations.

This general description provides an explanation of the codes and items, the file layout, sample counts and weights, technical specifications concerning the tapes (for those who wish to purchase the file), and facsimiles of Federal tax return forms for a reference to the line items which were abstracted for the 1970 program. Certain codes and fields are designated

INTRODUCTION--Cont.d

"for Statistics Division use only" in the explanations that follow. For those who purchase copies of this file, this means that either (1) the item has little or no value to the user because it was computed for a special internal purpose or (2) the item has been deleted to prevent disclosure of the individual taxpayer. ł

SAMPLE DESCRIPTION

The 1970 Individual Tax Model file is a random subsample of 95,316 returns selected from the Statistics of Income sample of over 276,000 Forms 1040 filed for 1970. Since the Model sample is about one-third the size of the full sample, the relative sampling variability of estimates derived from the Model can be expected to be somewhat less than twice that of similar estimates produced from the larger sample. A description of the Statistics of Income sample, as well as measures of sampling variability for selected estimates, are shown in the complete report, Statistics of Income--1970, Individual Income Tax Returns.

Sample counts and weighting factors for the Model file are shown on page 5. The sample code identifies the stratum from which a return was selected and indicates the weight factor to be applied to that return. Because of the way returns are processed prior to sampling, there are a few cases where the adjusted gross income is outside the range for the sample code assigned. Similarly, a few returns with business schedules (Schedules C of F) are classified in nonbusiness sample codes, and vice versa. However, in all cases, the sample code assigned to the return is governing and should not be changed.

TECHNICAL DESCRIPTION OF THE FILES

Each "data record" in the file, representing one tax return, is composed of 846 bytes. Logical tape records are made up of 5 data records and are separated by a 3/4 inch "inter record gap" (IRG). There is no special indication of the end of a logical tape record other than the IRG, and no indication of the end of a data record.

Tape characters are recorded in EBCDIC (extended binary coded decimal interchange) on standard 2,400 1/2 inch, nine-track tape, at a density of 1600 bpi (bytes per inch) in the PE (phase encoding) mode. In this mode a 1-bit and a 0-bic are recorded as signals of opposite polarity in ODD parity (a parity bit is set to 1 or 0 so that there is always an ODD number of 1-bits in a nine-bit character).

Each code and data field is numeric and defined as packed decimal. In the packed decimal format, each byte contains two decimal digits, except the byte containing the units digit. This byte contains the unit digit and the sign of the field. Each code and field, except document locator number and social security number, is defined as being signed and contains the bit configuration for the plus sign (C, binary 1100). DLN and SSN are unsigned and contains the bit configuration for the plus sign (F, binary 1111).

Codes are defined as 1 or 2 bytes in length. The one-byte codes contain a decimal digit from 0 thru 9. The two-byte codes contain three decimal digits in the range 000 thru 099. The largest decimal value is 99. The six-byte DLN contains 11 decimal digits and the

five-byte SSN contains 9 decimal digits. The remaining fields in the file are five-bytes in length and contain 9 decimal digits with leading zeroes. The first 10 fields are number fields and contain decimal values in the range of 0 thru 99. Fields 11 thru 150 have a maximum of eight significant digits. The district weight field contains zeroes. The national weight field contains an integer weight value.

The file is a single data set on multiple volumes and uses IBM 360 Standard labels. A standard set of 360 labels consists of a volume label, two header labels and two trailer labels. All labels are 80 characters in length, recorded in EBCDIC, in ODD parity.

The IBM Standard value label (VOLI) is used to identify the tape volume and its owner. It is always the first record on an IBM Standard labeled tape.

The volume label is followed by data set label 1 (HDR1). The HDR1 label contains such information as "HDR1", the data set name, expiration date and block count.

Data set label 2 (HDR2) follows data set label 1. The HDR2 label contains such information as "HDR2", the record format, ie; fixed, variable or underfined length, record length, block length, and other attributes of the data set.

The HDR2 label is followed by a tape mark, the data set or part of the data set for multiple volumes, a tape mark, a data set label 1 (EOVI or EOF1) containing the same information as the "HDR1" label, a

data suc label 2 (EOV2 or EOF2) containing the same information as the "EDE2" label. An EOV2 label is followed by a tape mark. An EOF2 label is followed by two tape marks which indicate the end of the data set.

Comments on TBM Standard Labels used with the 360 Version of the Tax Model

The information provided on header labels for the 7074 Tax Model runs were Data Center conventions and may not have been useful to other users. The format of the IBM Standard Labels are standard; however, most of the information is not used and will vary each time we create a file.

There are three types of labels and a total of five labels on each reel. Most of the information will vary from reel to reel and is not used by the operating system.

A narrative description of each type of label as defined in the IBM Publication is included because a regular format is difficult to lay out.

A regular LBM-360 user needs the following information:

1. Volume serial number - on outside of reel.

2. Data set name (DSN or DSNAME) - as requested.

3. Record length - 846 bytes.

ſ

4. Record format - FB for fixed block.

Non-360 users would need the tape density, blocksize and recording mode.

For your information and as a reference for any user, a layout of the three types of labels may be found in the IBM Publication - "IBM System/360 Operating System, Tape Labels, Order Number GC 28-6680-3".

VOL1 is figure 5 on page 32, Data Set Label 1 is figure 6 on page 36 and Data Set Label 2 is figure 7 on page 42.

Computation of Standard Deduction for 1970 if Adjusted Gross Income is Under \$10,000 (For base period years see instruction 1 on page 4)

1

1	I Enter 10% of line 18, Form 1040, but not more than \$500 if you are married and filing separately (If you are married filing separately, complete only lines 2 and 3. All other filers complete only lines 4 through 14.)	
2	2 Enter the sum of \$100 plus \$100 for each exemption claimed on line 11, Form 1040, but not more than \$500	
3	than \$500	
	3 Enter amount from either line 1 or 2. This is your standard deduction. Note: If your spouse uses the	
	percentage standard deduction (fine 1), you may not use the low income allowance (line 2)	·
4	4 Basic allowance. Enter the sum of \$200 plus \$100 for each exemption claimed on line 11, Form 1040,	
	but not more than \$1,000	
_	Computation of additional allowance:	
	5 Limitation\$900.00	
6	5 Enter \$100 for each exemption claimed on line 11, Form 1040	
7	7 Enter amount from line 18, Form 1040	
	Enter the sum of \$1,100 plus \$625 for each	
	exemption claimed on line 11, Form 1040 .	
9	Subtract line 8 from line 7. If less than	
	zero, enter zero	
10) Enter one-half of amount on line 9	
11	Add lines 6 and 10	
12	Additional allowance. Subtract line 11 from line 5. It less than zero, enter zero. (Note: If you are en-	
	titled to an additional allowance, you do not qualify for income averaging because your averagable in-	
	come will not be more than \$3,000.)	
13	Low income allowance. Add lines 4 and 12	
14	Standard deduction. Enter amount from line 1 or line 13, whichever is greater.	·····

Use this space for additional information such as determining base period income in accordance with General Instruction C or itemizing of line 3, etc.

Page 2

This schedule must be attached to your Form 1040 to choose the benefits of income averaging. Only individuals who are citizens or residents of the United States throughout 1970 are eligible for averaging. Corporations, estates and trusts do not qualify.

The income averaging method of computing tax may be to your advantage if your income has increased substantially this year. Under this method your 1970 income which exceeds 30 percent of the sum of your four prior years (1966–1969) income is taxed, in effect, by averaging that excess over the five-year period (1966–1970). Basically, the taxable income for each year is the figure utilized. However, since accumulation distributions subject to section 668(a) and certain other items of income described in instruction 3 are not subject to overaging, adjustments to the taxable income, as it appears on Form 1040 for each year, are necessary.

A. WHO MAY FILE.—Generally, you may choose the previsions of income averaging for 1970, by filing Schedule G with your Form 1040 if you meet the requirements of (1) citizenship or residence, and (2) support. On a joint return both husband and wife must meet the requirements.

(1) Citizenship or residence requirement.—You must have been a citizen or resident of the United States throughout 1970. A nonresident alien at any time during the five taxable year period ending with 1970 is not eligible.

(2) Support requirement.—You must have furnished at least 50 percent of your own support for each of the years 1966 through 1969. In a year in which you were married it is only necessary that you together with your wife provided at least 50 percent of the support of both of you. For definition of support see page 5 of the Form 1040 Instructions.

Exceptions. The support requirement is waived if---

(1) You were age 25 or more before the end of 1970 and you were not a full-time student during at least any four of your taxable years beginning after you have attained the age of 21. Thus, generally, if you are age 25 or over and have been out of school for 4 years since age 21, you are aligible for averaging. You are a student for a taxable year if during 5 calendar months of that year you were a full-time student at an educational institution or were pursuing a full-time course of institutional on-farm training under the supervision of a state or political subdivision of a State.

(2) More than 50 percent of your adjusted taxable income for 1970 (line 5, column (a)) is altributable to work performed by you in substantial part during two or more of the four taxable years preceding 1970, or

(3) You file a joint return for 1970 and not more than 25 percent of the aggregate adjusted gross income (Form 1040, line 18) is attributable to you.

B. FROVISIONS INAPPLICABLE.—If you file Schedule G you may not---

(1) Exclude from income any part of your earned income from sources without the United States (see section 911 and Form 2555) or any income from sources within possessions of the United States (see sections 931–934 and Form 4563).

(2) Use tax tables 1-15 in the Form 1040 instructions. You may, however, use the standard deduction.

(3) Avail yourself of the limitation on tax under section 72(n)(2) for income resulting from certain distributions from an employees' trust.

(4) Avail yourself of the advantages of alternative tax on capital gain under section 1201(b).

C. BASE PERIOD INCOME RILLES.---Your base period income for each of your base period years (1966-1969) must be determined in a manner consistent with your return

for 1970. If you make a separate return for 1970, you must determine your separate base period income for each of your base period years. If a husband and wife make a joint return for 1970, they must determine the sum of their separate base period incomes for each base period year. Thus, if you and your wife make a joint return for 1970 and were married and made joint returns with each other for any base period year, your base period income for each such year is to be figured on the basis of your aggregate taxable income for that year. If you make a return for 1970 as a surviving widow(er) (under section 2(a)), your base period income for each of the base period years (1966–1969) is the sum of your base period income and that of your deceased husband (wife) for each such year. If a husband and wife married in 1970 and make a joint return for 1970, and neither person was married from 1966 through 1969, their base period incomes for each of those years is the sum of the husband's separate base period income and that of his wife for each such year.

In some cases the computation of your separate base period income for a base period year may require as many as three computations. The facts in each case determine how many computations are necessary. For instance, if you were married for 1970 and made a joint return with your wife (husband), but had a different wife (husband) for 1970 than for a base period year, two computations are necessary. In such case, your separate base period income for the year in question is the larger of the following amounts:

(1) The amount of your adjusted separate income and deductions for the base period year.

(2) One-half the total amount of base period income resulting from adding your adjusted separate income and deductions to the adjusted separate income and deductions of your wife (husband) for that base period year.

However, if you and your wife file separate returns for 1970, a third computation is necessary. Your separate base period income will be the largest of the amounts determined under (1) and (2) above and:

(3) One-half the total amount of the base period income resulting from adding your adjusted separate income and deductions to the adjusted separate income and deductions of your wife (husband) for 1970 for that base period year.

The amount of your separate income and deductions for a base period year is the excess of your gross income for that year over your allowable deductions. Your separate deductions for any base period year for which you made a separate return are the deductions allowable on that return. If you made a joint return for a base period year, your separate deductions are (1) in the case of deductions allowable in computing your adjusted gross income, the sum of such deductions attributable to your gross income, and (2) in the case of deductions allowable in computing taxable income (exemptions and itemized deductions), the amount resulting from multiplying the amount of such deductions allowable on the joint return by a fraction whose numerator is your adjusted gross income and whose denominator is the aggre-

gate adjusted gross income on the joint return. However, if 85 percent or more of the aggregate adjusted gross income of a husband and wife is attributable to either one, all of the deductions allowable in computing taxable income are allowable to the one to whom such income is attributable. See specific instruction 1 on adjusted gross income.

In computing your separate base period income when community property laws are applicable, you must take into account ail of the earned income you earned, without regard to the community property laws, or your share of the community earned income under the community property laws, whichever is greater.

Page 4

If you must determine your separate base period income for any of the base period years, show the computation and give names under which the returns were filed in the space provided on page 2. If additional space is needed show your computation on an attachment. An example illustrating such computation follows:

H and W are calendar year taxpayers who were married and otherwise eligible to choose the benefits of income averaging for the taxable year 1970 for which they made a joint return. W, however, was married to and made a joint return with A for the taxable year 1966. H was unmarried for 1966. H and W compute their base period income for 1966 in the following manner:

-	A & W (Joint Return)	Α	W	н
Salary	\$16,000	\$11,500	\$4,500	\$3,000
Dividends,	2,000	500	1,500	1,000
Adjusted Gross Income	\$18,000	\$12,000	\$6,000	\$4,000
Total of itemized deductions and personal exemptions		2,400	1,200 (1)	1,600
Taxable Income (Separate Income and Deductions) .	\$14,400	\$9,600	\$4,800	\$2,400
(1) 6000 (Wis separate adjusted gross				

separate adjusted gro

income) (Total of itemized deductions and personal 28000 (A and W's adjusted gross \times 3600 exemptions on A & W's joint return) income) = 1200income from joint return)

\$4,800 Method No. 2 — W and A's taxable income from joint return, \$14,400×50 percent \$7,200 W's separate base period income is \$7,200, the larger of the two methods. H and W's base period income (since there are no adjustments) for 1966 is \$9,600 (H's separate base period income of \$2,400 (unmarried in 1966) plus W's separate base period income of \$7,200).

SPECIFIC INSTRUCTIONS

The following instructions are numbered to correspond with the line numbers on the form.

Taxable Income and Adjustments

1 Except as noted below, enter on this line the amount (never less than zero) from-

- (a) Form 1040 (1970)-line 50
- (b) Schedule T (1969)--line 5
- (c) Form 1040 (1965-68)-here 11d, page 1
 - Tex Computation

(d) Form 104CA (1956-68)--line 5, page 4 Schedule Form 1040A Instructions

For any year for which you use the tax tables to compute your tax, you may arrive at the amount to he entered in line 1, by subtracting from your adjusted gross income (see below) the standard deduction and \$600 (\$625 for 1970) multiplied by the number of exemptions, Adjusted gross income is--

- (a) Form 1040 (1970)—line 18
 (b) Form 1040 (1969)—line 15c
- (c) Form 1040 (1966-68)-line 9, page 1
- (d) Form 1040A (1966-68)-item 7, page 1

If for 1970, line 18, Form 1040 is less than \$10,000, use schedule on page 2 to compute your standard deduction.

NOTE: If you were not married to and did not file a joint return with the same wife (husband) for every year after 1965, or were not single for all those years, it will be necessary to determine the amount to be entered in columns (b), (c), (d), and (e) in accordance with General Instruction C.

2 Enter on this line for each base period year the net amount of income previously excluded from income because it was earned income derived from sources without the United States or from income within its possessions (sections 911 and 931-934). For 1970 you may not exclude such amounts from gross income and they will therefore be reflected in taxable income.

3 Include income attributable to the following sources in the total to be entered on this line (show itemization in space provided on page 2):

(a) Excess Community Income. If you are married, a resident of a community property state, and file a separate return for 1970, you must include in this line the excess of the community earned income reportable by you over the amount of such income attributable to your services. No adjustment need be made where the community earned income attributable to your services exceeds 50 percent of the aggregate community earned income. The following example illustrates this.-

Attributable to Service of н W Total

Community Earned Income , \$40,000 \$20,000 \$60,000 (1) H filing a separate return has no adjustment since the amount of earned income attributable to his services (\$40,000) exceeds 50 percent of the aggregate community earned income (\$30,000).

(2) W filing a separate return must include in the total for this line \$10,000, the excess of the community earned income reportable by her (\$30,000) over the amount of community earned income attributable to her services (\$20,000).

(b) Certain amounts received by owner-employees. The amount of income resulting from a premature or excessive distribution from a qualified employees' pension plan or trust to an employee who is (or was) also an owner of the business. The amount of such income is the amount subject to a penalty under section 72(m)(5).

Computation of Tax

To figure your tax use tax rate schedule X, Y, or Z in the instruction booklet for Form 1040.

Instructions

WHO MUST FILE.—Individuals with items of tax preference in excess of \$15,000 must file this form even though there is no minimum fam out. If short period return, see note in instructions for line 3.

Line 1-ITEMS OF TAX PREFERENCE

(a) Excess investment interest

Subtract net investment income from investment interest expense and enter balance.

Investment interest expanse means interest paid or accrued on indebtedness incurred or continued to purchase or carry property held for investment. However, interest paid or accrued on indebtedness incurred or continued in connection with the construction of property to be used in a trade or business is not to be treated as an investment interest expense.

Property subject to a net lease entered into after October 9, 1969 is property held for investment. Property is considered subject to a net lease if

- the sum of the deductions allowable solely by reason of sec. 162 is less than 15 percent of the rental mome produced by the property, or
- (2) the lessor is either guaranteed a specified return or is guaranteed in whole or in part against loss of income.

Net investment income means the excess of investment income over investment expenses.

investment income consists of the gross income from interest, dividends, rents, and royalties, net short-term capital gain from investment property, and sec. 1245 and sec. 1250 gain if such income, gains, and profits are not derived from the conduct of a trade or business. Investment expense consists of real property taxes (State and local, foreign), personal property taxes (State and local), bad debts, depreciation (actual deduction unless straight-line method chosen), amortizable bond premium, expenses for production of income, and depletion (actual deduction unless cost depletion chosen) directly connected with the production of investment income.

(b) Accelerated depreciation on real property:

(1) Low-income rental housing under sec. 167(k)

(2) Other real property

Enter on the appropriate line(s) the excess of depreciation allowable over the depreciation that would nave been allowable if the straight-line method had been used. This excess must be computed on a property by property basis. Note: If you amortized certain rehabilitation expenditures for sec. 1250 property over a 5year period, enter on line (b)(1) the amount by which this amortization exceeds straight-line depreciation over the normal useful life of the improvements.

(c) Accelerated depreciation on personal property subject to a net lease

Enter the excess of depreciation allowable over the depreciation that would have been allowable if the straight-line method had been used. This excess must be computed on a property by property basis.

(d) Amertization of certified pollution control facilities, ano

(e) Amortization of railroad rolling stock

For items (d) and (e) with respect to each certified pollution control facility and each unit of railroad rolling stock, enter the amount by which the amortization allowable exceeds the depreciation deduction otherwise allowable.

(f) Stock options

If you received stock subject to qualified or restricted stock options, enter amount by which the fair market

value of the shares at the time of exercise exceeds the option price.

(g) Reserves for losses on bad debts of financiat institutions

Enter your share of the excess of the addition to reserve for bao debts over the reasonable addition to the reserve for bad debts that would have been allowable if the bad debt reserve had been maintained for all taxable years on the basis of actual experience. See sec. 57(a)(7).

(h) Depletion

Determine any excess of deduction for depletion allowable under sec. 611 over the adjusted basis of the property at the end of the year (determined without regard to depletion deduction for the taxable year). Enter that amount here. This excess must be computed on a property by property basis.

(i) Capital gains

Enter one-half of the amount by which the net longterm capital gain exceeds the net short-term capital loss for the taxable year. (Amount from Schedule D, Part I, line 15(a). However, if capital gain distributions are reported on Form 1040, line 39, enter amount included on line 39 here.)

Partners, beneficiaries of estates and trusts, etc. Each partner must take into account separately his distributive share of items of income and deductions which enter into the computation of items of tax preferences. If you are a partner and have elected the optional adjustment to basis (see sec. 743), adjust the applicable items of tax preference to reflect the election. If you are a:

beneficiary of an estate or trust; see sec. 58(c);

- shareholder of an electing small business corporation, see sec. 58(d);
- participant in a common trust fund, see sec. 58(e); shareholder or holder of beneficial interest in a regulated investment company or a real estate investment trust, see sec. 58(f).
- If you have tax preferences attributable to foreign sources, see sec. 58(g).

Line 3—Adjustment in Exclusion for Computing -Minimum Tax for Tax Preferences for Short Period Returns

If this return is for a short period, enter your adjusted exclusion on line 3 computed by using this formula:

$30,000 \times \frac{\text{number of days in taxable year}}{365}$

However, if you are married filing separately or "certain married individuals living apart," substitute \$15,000 for the \$30,000.

Note: if line 2 is more than either the adjusted exclusion or \$15,000, file this form even though there is no minimum tax due.

Line 10--1970 Net Operating Loss Carryover to 1971

Under certain conditions, part or all of the amount shown on line 9 may be deferred to a subsequent year. See sec. 56(b).

Line 13—Minimum Tax Deferred From Prior Year Enter amount of minimum tax deferred from fiscal year 1969–70, if any. See section 56(b). In computing the amount of minimum tax deferred from fiscal year 1969–70 which is imposed in a subsequent taxable year, the same proration rule applies to the subsequent computation that applied to the computation of the initial minimum tax liability in fiscal year 1969–70. See sec. 301(c) of Public Law 91–172 (Tax Reform Act of 1969).
